## E-Acc Shares

30 November 2021

**This marketing communication is for Professional investors in Continental European countries as defined in the important information section. Investors should read the legal documents prior to investing.**

### Summary of fund objective

The Fund is actively managed. The Fund aims to achieve a positive total return over a market cycle with a low to moderate correlation to traditional market indices, while seeking to limit the drawdown levels of the net asset value of the Fund over a rolling 12 month period. Drawdown is intended to represent the differential between the highest price achieved by the fund and lowest price observed over a 12 month period. For the full objectives and investment policy please consult the current prospectus.

★★

### Risk Warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the fund.

### Fund Strategy

In order to achieve the desired risk-return profile, the fund targets a broad diversification within asset classes and investment factors. Furthermore, the investment team aims to create additional value by applying a tactical asset allocation. As a last step, the team uses sophisticated risk management techniques based on state-of-the-art statistical models to ensure, that the portfolio is in line with the pre-defined risk tolerance at any time. The resulting portfolio is a rigorously risk-managed multi-asset multi-factor strategy that exclusively uses its risk budget to apply diversified factor and asset class positions in order to create a superior risk-return profile on an absolute basis.

**Past performance does not predict future returns.** The performance period shown here starts on the last day of the first indicated month and ends on the last day of the last indicated month.

### Cumulative performance\*

in %	YTD	1 month	1 year	3 years	5 years
Fund	2.11	-0.09	3.00	1.14	-0.56
Benchmark	-0.50	-0.05	-0.55	-1.30	-1.94
