

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. This information is required by law to help you to understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Emerging Markets

## Sub-fund of KBC Bonds

Capitalisation: LU0082283374 (ISIN-code for Capitalisation shares)

managed by IVESAM NV

## OBJECTIVES AND INVESTMENT POLICY

KBC Bonds Emerging Markets aims to generate a return by investing at least two-thirds of its assets across a range of bonds issued by issuers that have their registered office in emerging markets or that generate a significant portion of their economic activity in emerging markets, such as Southeast Asia, Latin America, Eastern Europe and Africa.

Securities issued by Russian issuers must be listed or traded on a regulated market in Western Europe or North America.

No more than one-quarter of the fund's assets are invested in convertible bonds and bonds with options. The fund may invest in 'closed' bond markets or bond markets to which private individuals have limited access.

The fund may invest its assets in money market instruments (up to one-third), in bank deposits (up to one-third) and/or in shares and other units (up to one-tenth).

The fund may invest up to 100% of its assets in bonds and debt instruments whose credit rating is below investment grade and/or whose issuer has a credit rating below investment grade, i.e. lower than BBB-/Baa3 (long term), A3/F3/P3 (short term) from Standard & Poor's or an equivalent rating from Moody's or Fitch.

The fund can invest a maximum 10% of its assets in bonds and debt instruments that have not received a rating from the aforementioned agencies and/or the issuer of which does not have a rating from any of the agencies listed above.

The sub-fund may invest up to 10% of its assets in distressed and defaulted securities at the time of purchase.

These are securities which are rated lower than CCC by at least one of the following rating agencies: Moody's Investor Service, Standard & Poor's or Fitch Ratings, or which do not have a rating from one of the above rating agencies. Investments in this type of asset carry a high risk of loss because the issuers are in serious financial difficulties or have gone bankrupt.

The asset manager will do everything possible to achieve the fund's objectives by making timely investments and regularly hedging the exchange rate risk.

The fund's reference index is JP Morgan Emerging Markets Bond Index Global Diversified. The compartment has the objective of outperforming the reference index. For detailed information on the index, see [www.jpmorgan.com](http://www.jpmorgan.com).

The sub-fund is actively managed and does not set out to track the benchmark index. The benchmark is used for measuring the fund's portfolio in terms of performance and composition. The majority of the fund's bond holdings will be components of the benchmark. The manager may use discretionary powers to invest in bonds not included in the benchmark index in order to benefit from the sub-fund's specific investment opportunities.

The sub-fund's investment policy restricts the extent to which the portfolio holdings may deviate from the benchmark. This deviation is measured by means of the tracking error, which indicates volatility in the performance difference between the sub-fund and its benchmark. The tracking error is set at 1.5 %. Investors should be aware that the actual tracking error may vary depending on market conditions. A fund that deviates less from the benchmark is less likely to outperform it.

The fund reinvests any income received in the manner set out in the prospectus (for more details, see section 13 of the prospectus).

Orders for fund units are executed daily (for more details see section 9 of the prospectus). Investors may on request receive reimbursement of their UCITS units on any day (for more information, see section 9 of the prospectus).

## RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This figure is based on data from the past, which is not always a reliable indication of risk and return in the future.

The risk and reward indicator is assessed regularly and can therefore go up or down.

The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return. While the figure gives an indication of the return the fund might generate, it also indicates the risk involved. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. You might even sustain a loss.

The figure has been calculated from the viewpoint of an investor in American dollar.

### Why does this fund have a risk and reward indicator of 4?

4 is typical for bond funds, which tend to have an indicator of 3 or 4. Bond funds are generally less sensitive to the markets than equity funds, which tend to have an indicator of 6 or even 7 in some cases. The value of bond funds is especially sensitive to changes in interest rates, since the interest on these bonds is fixed in advance and does not go up when market rates increase.

Moreover, an investment in this fund involves:

- A moderate level of inflation risk: there is no protection against an increase of the inflation.
- A high level of credit risk: a substantial part of the assets can be invested in bonds with a lower level of creditworthiness. Consequently there is a significant risk that an issuer can no longer meet its obligations. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- A moderate level of concentration risk: there is a concentration of investments in emerging markets.
- A moderate level of liquidity risk: since there will be partly invested in less liquid bonds, investors run the risk of not being able to sell a position on time and at a reasonable price.

There is no capital protection.

## CHARGES

These charges are used to cover, among other things, the management costs of the fund, including marketing and distribution expenses. They reduce the investment's ability to grow. You can find additional information on the charges in the information for this sub-fund in the prospectus.

### One-off charges taken before or after you invest

Entry charge	2.50%
Exit charge	1.00%

This is the *maximum* that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you will pay less. For more information on the actual entry and exit charges, please contact your financial adviser or distributor.

Switching from one sub-fund to another

If you would like to exchange your units in this sub-fund\* for units in another sub-fund, you will be charged a fee in certain cases (for more information, see the information for this sub-fund in the prospectus).

### Charges taken from the fund over a year

Ongoing charge	1.44%
----------------	-------

The figure for the ongoing charge is based on the charges for the year ending on 30 September 2022. This figure does not include transaction charges, except if the fund pays entry or exit charges when units in other funds are bought or sold, and may change from year to year.

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

## PAST PERFORMANCE

Past performance should not be seen as a good indicator of future performance.

The calculation of past performance includes all charges and fees, except taxes and entry and exit charges.

Current benchmark composition: JP Morgan Emerging Markets Bond Index Global Diversified

\* These performances were achieved under circumstances that no longer apply.

The Fund does not intend to track the Reference Benchmark.

Start year: 1997

Currency: American dollar
