KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme constituted in Ireland that aims to maximise total return consisting of income and capital appreciation by investing at least two-thirds of its total asset value in Investment Grade securities denominated in currencies of, or from issuers located in, Specified Countries.
- You may receive semi-annual distributions if you invest in Class A US\$ Distributing (S) or quarterly distributions if you invest in Class A SGD Distributing (Q)(Hedged).

Refer to Section 1, Section 2.4 and Section 5.1 of the Prospectus for further information on features of the product.

Investment Strategy

- The Fund will invest at all times at least two-thirds of its total asset value in debt securities that are:
 - rated Investment Grade (at time of purchase);
 - listed or traded on Regulated Markets primarily in Specified Countries; and
 - denominated in currencies of, or issuers located in, primarily Specified Countries.

Refer to Section 5.1 of the Prospectus for further information on the investment strategy of the product.

¹ The Prospectus is available for collection during normal business hours from 1 George Street, #23-02, Singapore 049145 or accessible at www.leggmason.com.sg.

² Inception date of the earliest incepted Share Class offered in the Prospectus.

<ul style="list-style-type: none"> The Fund may also invest in Investment Grade debt securities listed or traded on Regulated Markets located in other Developed Countries and may invest up to 10% of its net asset value in Investment Grade debt securities of issuers located in other Emerging Market Countries (which are not Specified Countries) (provided the long-term sovereign debt of the relevant Emerging Market Country is also rated Investment Grade). The types of debt securities the Fund may invest in include debt securities issued or guaranteed by national governments (including inflation-protected securities), debt securities of supranational organisations, corporate debt securities, mortgage-backed and asset-backed securities. The Sub-Investment Manager follows a value approach to investing and seeks to identify relative value in the global bond market. The Sub-Investment Manager defines as undervalued those markets where real interest rates are high and the currency is undervalued and stable or appreciating. The Sub-Investment Manager will concentrate investments in those undervalued markets where cyclical business conditions as well as secular economic and political trends provide the best opportunity for declining interest rates and a return to lower real rates over time. The Fund will normally hold a portfolio of debt securities of issuers located in a minimum of 6 countries, and the averaged weighted duration of the Fund's portfolio generally ranges from 2 to 10 years. The Fund may also invest in certain types of derivative instruments for efficient portfolio management purposes and/or investment purposes. 	
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Fund is constituted as a sub-fund under the Irish-domiciled Legg Mason Global Funds Plc. The Investment Manager is Legg Mason Investments (Europe) Limited, the Sub-Investment Manager is Brandywine Global Investment Management, LLC, and the Custodian is BNY Mellon Trust Company (Ireland) Limited. 	<p>Refer to Section 1 and Section 3 of the Prospectus for further information on the role and responsibilities of these entities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to Section 8 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risks. <ul style="list-style-type: none"> The value of your investments may go up or down due to changing economic conditions or developments regarding individual issuers of debt securities that the Fund invests in. You are exposed to currency risks. <ul style="list-style-type: none"> An investment in the shares of the Fund may entail exchange rate risks as the share class you may invest in may be denominated in a currency other than the base currency of the Fund and the underlying assets of the Fund may be denominated in currencies other than the base currency of the Fund. For Class A SGD Distributing (Q)(Hedged), while the relevant Investment Manager, Sub-Investment Manager or currency administrator will attempt to hedge the risk of changes in the value between the base currency of the Fund (i.e. US Dollars) and the currency of the Share Class (i.e. SGD), there can be no guarantee it will be successful doing so. If you invest in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed in Singapore and you can redeem your shares only on Dealing Days. <ul style="list-style-type: none"> There is no secondary market in Singapore for the Fund. All redemption requests may only be made in the manner described in the Prospectus. 	

<ul style="list-style-type: none"> • Your redemption request may be deferred. <ul style="list-style-type: none"> ○ If you submit a redemption request on a Dealing Day where total redemption requests exceed 10% of the Fund's shares in issue, your redemption request may be deferred to subsequent Dealing Days. • You will not be able to redeem your shares during any period where redemption is suspended. <ul style="list-style-type: none"> ○ Your right to redeem your shares may be temporarily suspended under certain circumstances. 							
Product-Specific Risks							
<ul style="list-style-type: none"> • You are exposed to the risks of debt securities as this is a fixed income fund. <ul style="list-style-type: none"> ○ Prices of debt securities fluctuate in response to perceptions of the issuer's creditworthiness and also tend to vary inversely with market interest rates. • You may be exposed to risks of securities of supranational organisations. <ul style="list-style-type: none"> ○ The Fund will invest in securities of supranational organisations (i.e. entities designated or supported by governments or governmental entities to promote economic development), which have no taxing authority and are dependent upon their members for payments of interest and principal. • You may be exposed to risks of inflation-protected securities. <ul style="list-style-type: none"> ○ The Fund may invest in inflation-protected securities, the value of which generally fluctuates in response to changes in real interest rates. The market for inflation-protected securities may be less developed or liquid, and more volatile, than certain other securities markets. • You may be exposed to risks of investments in mortgage-backed securities ("MBS") and asset-backed securities ("ABS"). <ul style="list-style-type: none"> ○ Prepayments on the MBS or ABS held by the Fund may result in a loss to the Fund in certain circumstances. You should also note that a negative effect of interest rate increase on the market value of a MBS is usually more pronounced than it is for other types of fixed-income securities. • You are exposed to derivatives risks. <ul style="list-style-type: none"> ○ Derivatives in general involve special risks and costs and may result in losses to the Fund. The successful use of derivatives requires sophisticated management and the Fund will depend on the ability of the Investment Manager or Sub-Investment Manager to analyse and manage derivative transactions. ○ A liquid secondary market may not always exist for the Fund's derivatives positions at any time. In addition, over-the-counter instruments also expose the Fund to risk that a counterparty will not meet its obligations to the Fund because of, for instance, a dispute over its terms or a credit or liquidity problem, which may cause the Fund to suffer a loss.
