#### **GENERAL INFORMATION**

The following information is derived from and should be read in conjunction with the full text and definitions section of the prospectus.

The Principal Global Investors Funds ("the Trust") was constituted on 13 October 1992 as an open-ended umbrella Unit Trust established as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland. The Unit Trust has created a number of sub-funds (the "Funds", individually referred to as "Fund"). The Trust has been authorised in Ireland pursuant to the European Communities (Undertakings for Collective Investments in Transferable Securities) Regulations, 2011, (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2019 (the "Central Bank UCITS Regulations").

Units are unhedged, except where otherwise noted.

For the year to 30 September 2023, the Trust comprised of the following Funds:

Principal Global Investors (Ireland) Limited (the "Manager") may, with the prior consent of the Central Bank and approval of The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary") and the Board of Directors of the Manager (the "Directors"), add additional Funds.

The financial statements are published on the www.principalglobal.com website. The Directors, together with the Manager and Principal Global Investors, LLC (the "Investment Adviser") are responsible for the maintenance and integrity of the financial information included on this website.

#### **PRICES**

There will be a single price for buying, selling and switching units in each of the Funds. This will be represented by the Net Asset Value ("NAV") per Unit (less/plus duties and charges where applicable).

#### **DEALING**

The dealing deadline (being the time by which subscription and redemption requests for units must be received in Dublin in order for such requests to be dealt with in normal circumstances on a particular dealing day) is 10.00 a.m. (Irish time) on that dealing day. The dealing deadline for requests from Hong Kong investors is 5.00 p.m. (Hong Kong time) on that dealing day. All dealing requests should be addressed to:

#### **DISTRIBUTIONS AND DISTRIBUTOR STATUS**

The Trust Deed provides for the Manager to decide to make, and for the Trustee on each distribution date to make, distributions among holders of income units and income plus units in each of the Funds. It is the intention of the Manager to make distributions to the extent that they are covered by income received from underlying investments. It is also the intention of the Manager that distributions will be declared on 30 September each year or nearest business day for all Income Unit Classes and Income Plus Unit Classes where possible. Annual distributions will be payable in respect of the A Income Unit Class on the Global Responsible Equity Fund, the A Income Unit Class on the European Responsible Equity Fund, the A, A2, D, I, I2 and N Income Unit Classes on the Global Properties Securities Fund, the D and N Income Unit Classes on the U.S. Blue Chip Equity Fund and the I Income Unit Class on the China Opportunities Equity Fund<sup>1</sup>. Quarterly distributions will be payable in respect of the A, I, D, F, N, P and X Income Unit Classes on the Preferred Securities Fund, the A, I, D and N Income Unit Classes on the Global High Yield Fund, the A2 (Quarterly) and D2 Income Plus Unit Class, I (Quarterly) Income Unit Classes of the Global Property Securities Fund, the A, A2 and I Income Unit Classes on the Post Short Duration High Yield Fund, the A, A2, I, I2, I3, D, F, N Income Unit, A2 and P2 Income Plus Unit Classes on the Finisterre Unconstrained Emerging Markets Fixed Income Fund, the I2 and A2 Income Unit Class on Asian High Yield Fund, the I2 Income Unit Class on the Finisterre VAG Unconstrained EM Fixed Income Fund, the N Income Unit Class on the Finisterre Emerging Markets Debt Euro Income Fund and the A Income Unit Class on the China Opportunities Equity Fund<sup>1</sup>. Monthly distributions will be payable in respect of the D2 Income Unit and D2 Income Plus Unit Classes on the Preferred Securities Fund, the D2 Income Plus Unit Class on the Global High Yield Fund, the D2 Income Unit Class on the Global Property Securities Fund, the D2 Income Unit and D2 Income Plus Unit Classes on the Post Short Duration High Yield Fund, the D Income Unit and D Income Plus Unit Classes on the Global Diversified Income Fund, the D2 Income Unit and the D2 Income Plus Unit Classes on the Asian High Yield Fund. There are no D2 Income Unit Classes in issue currently on the Finisterre Unconstrained Emerging Markets Fixed Income Fund. Monthly distributions will also be payable in respect of the N2 Income Unit Class on the Preferred Securities Fund. There are no N2 Income Unit Classes in issue currently on the Preferred Securities Fund. There were distributions out of capital of \$414,027 (2022: \$614,046).

Upon the expiry of the period of six years after the relevant Distribution Date, the Holder and any person claiming through, under or in trust for him shall forfeit any right to any distribution not paid, and such amount shall become part of the relevant Fund.

#### **CORPORATE GOVERNANCE**

The Board of Directors of the Manager has adopted and applied standards of corporate governance that are consistent with the Irish Funds Code for the year ended 30 September 2023 and 30 September 2022.

#### **CONNECTED PERSONS**

The Central Bank of Ireland ("CBI") UCITS Regulations, Section 43(1), Restrictions on transactions with connected persons - requires that any transaction carried out with a UCITS by a distributor, manager, trustee, administrator, Depositary, investment adviser, sub-adviser and/or associated or group companies of these ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the Unitholders of the UCITS.

Having regard to confirmations from the Manager's Designated Person for Capital and Financial Management, and the Trustee, the Board of Directors of the Manager is satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and is satisfied that transactions with connected persons entered into during the period complied with these obligations.

None of the Directors had any interests in the units of the Funds for the period from 1 October 2022 to 30 September 2023 and 1 October 2021 to 30 September 2022.

<sup>&</sup>lt;sup>2</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

<sup>&</sup>lt;sup>1</sup>China Opportunities Equity Fund terminated on 11 April 2023.

#### **GENERAL INFORMATION (continued)**

#### SIGNIFICANT EVENTS DURING THE YEAR

#### **Prospectus and Supplement changes**

- Effective from 1 December 2022, update to the Addendum to the Prospectus to incorporate amendments to Sustainable Finance Disclosures and Taxonomy Regulation Disclosures.
- New supplement was issued for Asian High Yield Fund, European Responsible Equity Fund, Finisterre Emerging Markets Debt Euro Income Fund, Finisterre Unconstrained Emerging Markets Fixed Income Fund, Finisterre VAG Unconstrained EM Fixed Income Fund, Global High Yield Fund, Global Property Securities Fund, Global Responsible Equity Fund, Global Sustainable Listed Infrastructure Fund, Origin Global Emerging Markets Fund, Origin Global. Smaller Companies Fund, Post Short Duration High Yield Fund, and Preferred Securities Fund on 1 December 2022.
- Effective from 1 December 2022 Finisterre Emerging Markets Debt Euro Income Fund, Finisterre Unconstrained Emerging Markets Fixed Income Fund, Finisterre VAG Unconstrained EM Fixed Income Fund, and Global Property Securities Fund were classified as ESG Oriented Funds under SFDR.
- New supplement was issued for Global High Yield Fund on 8 March 2023.
- New supplement was issued for Global Property Securities Fund and Global Sustainable Listed Infrastructure Fund on 11 April 2023.
- New supplement was issued for U.S. Blue Chip Equity Fund on 2 May 2023.

#### Launches during the year:

#### Fund

• CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

#### **Share Class**

- Finisterre Unconstrained Emerging Markets Fixed Income Fund I2 Class Income Units (CAD) on 2 February 2023.
- Finisterre Unconstrained Emerging Markets Fixed Income Fund I3 Class Income Units (GBP hedged) on 2 February 2023.

#### Re-Launches during the period Share Class:

- Finisterre Unconstrained Emerging Markets Fixed Income Fund I3 Income (EUR Hedged) on 9 February 2023.
- Global Property Securities Fund D Class Income on 28 July 2023.

#### Closures during the period:

China Opportunities Equity Fund closed on 11 April 2023.

#### Share Class

- Global Property Securities Fund I Class Income (GBP Hedged), D Class Income, I Class Accumulation, I Class Income, A2 Class Income (Quarterly) (EUR Hedged) and A2 Class Income (Quarterly) (SGD Hedged) on 11 October 2022.
- Finisterre Unconstrained Emerging Markets Fixed Income Fund A Class Accumulation (SGD Hedged) and A2 Class Income (SGD) Accumulation on 11 October 2022.
- Preferred Securities Fund X Accumulation and X Income on 28 February 2023.

#### Other Events

- James Bowers was appointed as Director of the Manager effective 27 February 2023.
- Donnacha Loughrey was appointed as Director of the Manager effective 6 March 2023.
- In March 2023, the global banking sector has been experiencing a series of shocks prompted by the collapse of California's Silicon Valley Bank ("SVB") and New York's Signature Bank in the U.S. and the UBS emergency rescue of Credit Suisse in Switzerland. The Funds' did not have any exposure to these banks as at period end.
- Kamal Bhatia resigned as Director effective 27 September 2023.

There have been no other significant events affecting the Funds during the year ended 30 September 2023.

#### SIGNIFICANT EVENTS AFTER THE YEAR END

A revised prospectus for the Unit Trust was issued on 14 December 2023.

New supplement was issued for all funds on 14 December 2023.

There have been no other significant events affecting the Funds after the year ended 30 September 2023.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023

#### **Global Responsible Equity Fund**

For the twelve-month period ending 30 September 2023, the Global Responsible Equity Fund reported net performance of 26.98% compared to 20.80% for the index, MSCI ACWI Index.

Over the past year, NVIDIA, 3i Group and Eli Lilly were the top three contributors.

Top detractors over the past year were Northland Power, Darling Ingredients and Blackstone.

The majority of sectors relatively outperformed led by IT, health care and consumer discretionary while utilities and energy were the lone sectors to underperform over the past year. From a country perspective, the United States, Denmark and the United Kingdom led the strength while Canada and Japan lagged overall.

Much of the equity market recovery from the October 2022 lows has been attributable to optimism about a "pivot" to more dovish monetary policy. Following the equity strength, expectations are for a more challenging backdrop in the near-term driven by:

- Central Banks to maintain rates higher for longer
- Elevated oil prices undermining progress on inflation
- Consumer pressures led by inflation and expiring student loan moratorium
- Geopolitics

Upward pressure on interest rates remains an overhang on broader risk sentiment with the focus being primarily on oil and Central Banks. Even as some investors are increasingly hopeful about the end of the current tightening cycle, there is risk that the full impact from tighter monetary policy has not yet been experienced. Officials have noted that rates may have to stay higher for longer than the market has expected.

This is not to say opportunities aren't in front of us but rather risks are on the rise. Supportive elements do remain in place, noted below, though have been tempered with the evolving backdrop and healthy gains year-to-date:

- Inflation normalizing
- Economic soft landing
- Central Banks signal rate cuts

#### **European Responsible Equity Fund**

For the twelve-month period ending 30 September 2023, the European Responsible Equity Fund reported net performance of 25.37% compared to 28.85% for the index, MSCI Europe Index.

Over the past year, 3i Group, Novo Nordisk and Pandora were the top three contributors. Top detractors over the past year were Roche, NIBE Industries and Capgemini.

Sectoral performance was mixed overall with outperformance from consumer discretionary, materials and communication services being more than offset by weakness in industrials, energy and IT. From a country perspective, the United Kingdom and Denmark outperformed while France and Switzerland were weak overall.

Much of the equity market recovery from the October 2022 lows has been attributable to optimism about a "pivot" to more dovish monetary policy. Following the equity strength, expectations are for a more challenging backdrop in the near-term driven by:

- Central Banks to maintain rates higher for longer
- Elevated oil prices undermining progress on inflation
- Consumer pressures led by inflation and expiring student loan moratorium
- Geopolitics

Upward pressure on interest rates remains an overhang on broader risk sentiment with the focus being primarily on oil and Central Banks. Even as some investors are increasingly hopeful about the end of the current tightening cycle, there is risk that the full impact from tighter monetary policy has not yet been experienced. Officials have noted that rates may have to stay higher for longer than the market has expected.

#### **INVESTMENT ADVISER REPORT**

#### for the year ended 30 September 2023 (continued)

#### **Preferred Securities Fund**

For the twelve-month period ending 30 September 2022, the Preferred Securities Fund reported net performance of 7.38% compared to 3.83% for the index, Bloomberg Barclays Global Aggregate Corporate USD TR Index.

The Fund, on average for the period, is 58% weight \$1000par Junior Subordinated Debt, 30% weight Contingent Convertible Securities (CoCos) and 7% weight Subordinated Debt; the remaining 5% is primarily split between \$25par Hybrids and Senior Debt. The three most significant additions were \$82mm of USD forwards from GBP sterling as we bought sterling denominated AT1 which was cheap to USD alternatives, \$68mm Toronto Dominion 8.125 At1 and \$32mm ING Group AT1; the three most significant subtractions were \$64mm Barclays 7.75%, \$52mm Sumitomo 6.50% Jr. sub debt and \$46mm Southern Company jr. sub debt.

The period can be defined as not only a period of denial for bond investor fears of the US Federal Reserve Bank's resolve against inflation (despite being late to address it), but also a period of capitulation to the Fed's anti-inflation mission. There was a clear divergence in credit prices compared to US Treasury bond prices (e.g. the UST10yr note) during the first 4 months of the period when hybrid prices bull tightened while US treasuries rallied too from a significant more to invert the yield curve. The fund performed well by rising over 8% only to decline by more than 4% after the inverted yield curve and high nominal rates caused a few bankruptcies from deposit flight and funding problems. The CoCo sector was shocked by the failure of Credit Suisse in March, but the fund was able to trade out of Credit Suisse CoCos before the bank went under. From April to July the fund has four straight positive return periods and some moderate slippage in August and September as the US treasury market digested the Fed's resolve to keep rates elevated for an extended period well into (if not for all) of 2024.

The macro backdrop for the period ran into significant headwinds given the Fed's desire to keep raising the Federal Funds rate while unwinding (i.e., running-off) QE4 bond purchases. The Fed has paused its rate increases since July and we expect that pause to be ongoing as the lagged effects take hold to dampen growth and inflationary pressures. Yields in hybrids are quite compelling ranging from 7% to 9.5%, which is higher than the past three bottoms of the credit cycle. While there may be some intermittent rallies in US treasury bonds over jubilee that the Fed may be done raising rates, we do not believe that long term rates are on a sustainable rally pace just yet. There will be an important transition period from a market focused on the Fed pause (and the next rally on the nest rate cuts), to a period of stagflation and significant supply in the face of the Fed also being a net seller while on pause. We expect this to create an extended opportunity to buy compelling yields in hybrid paper that beat IG paper and BIG paper net of inflation and net of historic default. The fixed-to refixed nature of the hybrid product offers protection against US treasury yields rising more (and staying higher for longer) because coupons can be reset higher if this higher for longer yield environment stays higher forever. So, to prepare for the longer term, we look to keep a dominant position in institutional preferred securities, junior subordinated debt and CoCos to mitigate capital risks with a "pull toward par" as the product ages to the time of coupon reset and the prospect of higher income.

#### Global High Yield Fund

For the twelve-month period ending 30 September 2023, the Global High Yield Fund report net performance of 11.69% compared to 11.39% for the index, ICE BofA Global High Yield USD Hedged Index.

Security selection positively impacted returns due to the outperformance from overweights to, and our positioning within the capital structures of Ahern Rentals, Novafives SA, Summer Bidco BV, Triumph Group, and Global Aircraft Leasing Co. This was somewhat offset by the underperformance from overweights to Voyage Care, Aryzta AG, and Lions Gate Capital Holdings, underweights to Carnival Corp, and Petroleos Mexicanos, and our positioning within the capital structures of Carnival Corp. Sector allocation outperformed due to an underweight to Real Estate, and an overweight to Leisure. However, this was somewhat offset due to an overweight to Media, and an underweight to Energy.

The High Yield market saw a volatile 3rd quarter. Treasury yields saw a significant move higher while High Yield spreads increased modestly over the period. Despite this turbulence, High Yield posted a positive total return. Meanwhile, robust economic data showcased a stronger than expected U.S. economy, which ultimately spurred a swing in expectations around the outlook for the Federal Reserve's monetary policy. Investors are more strongly considering a "higher for longer" interest rate scenario and its implications on an economic soft landing. In terms of performance for the quarter, lower quality bonds led the way: CCCs outperformed BBs, followed by single Bs. The Federal Reserve's aggressive monetary policy campaign appears to be conquering the threat of ramped inflation; however, during the 3rd quarter, investor's expectations of a quick pivot to rate cuts were diminished. The 10-year Treasury yield pushed higher by over 75 basis points while High Yield spreads only widened by a modest 3 basis points. Returns by sector for the quarter were mixed. The leaders were Banking, Oil Field Services, and Brokerage/Asset Managers/Exchanges. The laggards were Office REITs, Healthcare REITs, and Natural Gas. With respect to capital markets, a busy September (\$23B) brings year-to-date issuance to just over \$131 billion. For the quarter, total High Yield issuance was \$40.7B, as compared to \$38.9B and \$53.8B in Q1 and Q2, respectively.

#### **INVESTMENT ADVISER REPORT**

#### for the year ended 30 September 2023 (continued)

#### Global High Yield Fund (continued)

Over the previous 3 months, corporate defaults have continued to increase. As of August month-end, the trailing 12-month global speculative-grade default rate was 4.3%, up from 4.2% a month earlier, both surpassing the long-term average of 4.1%. Globally, the market saw a total of 28 corporate defaults in in Q3, totaling \$42.1B of default volume. Notably, Moody's continues to revise its 12-month forward-looking default rate expectation lower to 4.19%, down from their 4.63% forecast made last quarter. Our baseline forecast for year-end default rates remains unchanged at 4%.

High Yield mutual funds and ETFs reported outflows of -\$2.8 billion for the month of September. This brings the 3rd quarter to a total outflow of -\$3.3 billion. Year-to-date, the High Yield market has seen total outflows of -\$16.4B.

Heading into October and the final quarter of the year, Treasury yields have continued to break out and set new 15-year highs. The increase begs investors to contemplate the level of conviction held by the Federal Reserve and their view on rates. With ramped inflation potentially behind us, the market is keen to see a pivot to rate cuts by the Federal Reserve. The longer it is until investors see this path to lower rates, the less likely a soft-landing scenario appears. While the U.S. economy has remained mostly resilient, cracks are starting to show. In the second quarter, many U.S. corporations, including High Yield issuers, experienced a dip in earnings. It's possible this trend persists into third quarter earnings. As mentioned previously, we do foresee earnings improving in 2024. Until then, our base case remains that credit spreads will widen marginally into year-end.

Even assuming modest spread widening, we view the current state of the High Yield market to be attractive. While spreads may appear relatively tight in the current environment, historical data would suggest a positive correlation between elevated yields and a 12-month forward return for the High Yield asset class. When yields are at elevated levels, the income generated by the market provides an attractive risk-return profile and a buffer for potential economic turbulence and spreadwidening. Additionally, following a pause in Fed Funds rate hikes, High Yield returns over the next 12 months have provided investors double digit returns.

Turning to portfolio construction, our position relative to the benchmark remains conservative and focused on higher quality bonds. While the economy continues to face pressure from higher rates and other economic factors, our goal is to ensure that portfolio positioning offers resilience and stability. We're also keenly focused on avoiding cyclically challenged industries and are prepared to navigate more extreme economic headwinds if presented.

In terms of sectors, we've maintained our positioning with overweights to the Metals and Mining, Independent Energy, and Healthcare Insurance sectors. Our biggest underweights continue to be Media and Entertainment, Wirelines, and Technology.

As part of our evolving high yield investment process, we continue to incorporate our dynamic environmental, social, and governance (ESG) and data science initiatives into our fundamental research. These proprietary tools have been instrumental in testing our investment biases, highlighting investment opportunities, and expanding efficiencies across the high yield team. Using our internal ESG scores, we have improved the overall portfolio's exposure to these factors. Moreover, we maintain our focus on reducing the portfolio's overall carbon footprint.

#### **Global Property Securities Fund**

For the twelve-month period ending 30 September 2023, the Global Property Securities Fund reported net performance of 0.11% compared to 1.64% for the index, FTSE EPRA NAREIT Developed NTR Index.

The portfolio did enjoy good positive selection in Europe from owning better quality French and Spanish commercial landlords with strong balance sheets. These benefitted from reporting firm improvements in operating trends. This positive selection in Europe was largely offset by negative selection in the Americas from ownership of a tower company which lagged on concerns over slowing carrier spend. An underweight to US retail also hurt as a more resilient than expected US consumer and improving operating metrics led the sector to outperform. Allocation gains came from holding cash during elevated periods of market volatility.

Our strategy strives to deliver consistent and attractive risk-adjusted excess total returns over the long term. We focus on constructing benchmark-differentiated portfolios with our sources of potential alpha broadly diversified. We invest in listed equity of REITs, REOCs, and other real estate companies that own income-producing property, develop real estate assets or perform other property related activities in global markets.

We believe that reliable and consistent alpha generation can be achieved through skill, rigorous fundamental analysis, and an emphasis on diversified, bottom up stock selection that favors higher quality companies.

#### **INVESTMENT ADVISER REPORT**

#### for the year ended 30 September 2023 (continued)

#### **Global Property Securities Fund (continued)**

After a promising start to the year, global REITs have now given back the initial outperformance against equities. Much of the relative underperformance against equities started from March, as the prospect of a banking crisis driven credit crunch weighed heavily on the capital-intensive real estate sector. In recent months, global bond yields have moved higher once again on prospects for firmer than expected U.S. economic growth despite signs of softening inflation. Burgeoning budget deficits and larger U.S. Treasury issuance plans have also been a factor. Meanwhile central banks have also been unwilling to dial back hawkish rhetoric with the Fed in particular, surprising in its higher for longer messaging at its recent September meeting. This has pushed back expectations for central bank rate cuts, increasing upward pressure on bond yields and pressuring REIT performance.

Higher bond yields are coming at a time where the US economy is decelerating. Leading indicators tracked by the U.S. Conference Board are already in recessionary territory. Even if the U.S. is able to skirt a recession in the next few quarters, sustained elevated bond yields will further tighten financial conditions serving as an added brake on the economy. There is already growing evidence that the US labor market is starting to cool gradually based on job openings, hours worked and quit rates. More concrete signs of disinflation and moderating economic growth could provide central banks more latitude to skew dovish and eventually cut interest rates.

REITs tend to perform better against equities in the later stages of the rate hike cycle with their relative outperformance becoming more marked as rates peak and fall. REITs have delivered strong positive returns in the 12 months after real yields have peaked. We believe a recession is needed to tame inflation and this will eventually result in falling interest rates. Given our cautious view of the world, we continue to maintain a core of select a) structural growth stocks which we believe have pricing power given strong demand supply fundamentals and to b) avoid companies with bad balance sheets. This should position us well to weather any growth slowdown driven by overzealous central bank rate hikes or other geopolitical concerns.

#### **Post Short Duration High Yield Fund**

For the twelve-month period ending 30 September 2023, the Fund reported net performance of 8.14% compared to 2.46% for the index, ICE U.S. Treasury 1-3 Year Bond Index.

Over the last twelve-months, performance has been strong for the broader high yield market as well as the higher quality short duration high yield asset class, therefore, all ratings and almost all sectors generated positive performance for the period. With the meaningful increase in Treasury yields, shorter duration assets (most of the fund has a duration inside of three years) generally outperformed longer duration assets, especially bank loans, which were accretive due to their floating rate coupon and minimal interest sensitivity. Individual security selection also contributed meaningfully to performance.

The fund generated solid returns, consistent with the broader high yield market rally, and meaningfully outperformed the ICE U.S. Treasury 1-3 Year Bond Index. New issue activity has rebounded since the second half of 2022, yet remains below historical averages, therefore refinancing and new issue opportunities were limited. With the goal of maintaining yield and duration, the fund participated in select high quality new issues and has also actively swapped shorter duration lower yielding holdings for longer duration and higher yielding assets, often within the same capital structure. Over the period, the fund continued to upgrade the quality of holdings, and increased the exposure to BB's while decreasing the exposure to single B's and triple C's. Over the same period, the funds exposure to technology and consumer products increased while its exposure to gaming, healthcare, and environmental declined.

We expect credit fundamentals to modestly deteriorate, which should lead to higher default rates and some spread widening, yet our view on high yield remains balanced as we also recognize the solid credit fundamentals, which could withstand additional deterioration, and elevated yields in the current market. We believe high quality short duration is particularly attractive and well positioned in the current environment given the absolute level of yields and its focus on higher quality issuers which we expect to be less susceptible to a slowing economy. In addition, with the average dollar price of the assets in the fund below par, we believe the fund has upside potential from either a decline in Treasury yields (as inflation subsides) or from issuers proactively refinancing their debt well in advance of the actual maturity.

#### **Origin Global Emerging Markets Fund**

For the twelve-month period ending 30 September 2023, the Origin Global Emerging Markets Fund reported a net performance of 12.12% compared to 11.70% for the index, MSCI Emerging Markets NTR Index.

The Fund outperformed its benchmark during the twelve-month period. Allocation to and stock selection within Information Technology provided the most significant positive effect at sector level, followed by stock selection within Consumer Staples. Geographically, stock selection within Taiwan was the leading contributor, followed by Korea, while the China was the leading detractor from relative performance.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023 (continued)

#### **Origin Global Emerging Markets Fund (continued)**

Over the twelve-month period, the Fund's positions in Brazil and China were significantly decreased in favour of Turkey and Mexico. Consumer Discretionary and Industrials positions were also increased, mainly at the expense of Materials and Financials.

Origin will continue to bias our portfolios towards high quality growing companies with reasonable valuations, above market EPS revisions and relative price strength. Braver investors than us will try to time individual markets and sectors but with much increased volatility, we feel that kind of approach is the investing equivalent of a game of Russian roulette. At times like this it is all the more important for us to stay in our lane.

#### **Origin Global Smaller Companies Fund**

For the twelve-month period ending 30 September 2023, the Origin Global Smaller Companies Fund reported a net performance of 19.61% compared to 15.24% for the index, MSCI All Country World Small Cap Index.

The Fund outperformed its benchmark during the twelve-month period. Allocation to and stock selection within Information Technology provided the most significant positive effect at sector level, while Energy proved a marginal drag. Geographically, stock selection within North America was the standout contributor, followed by Asia ex Japan, while Japan was marginally detracting.

Over the twelve-month period, the Fund's position in North America was decreased, mainly in favour of the UK, which now represents the largest regional overweight. Information Technology was also increased, mainly at the expense of Real Estate positions.

Origin will continue to bias our portfolios towards high quality growing companies with reasonable valuations, above market EPS revisions and relative price strength. Braver investors than us will try to time individual markets and sectors but with much increased volatility, we feel that kind of approach is the investing equivalent of a game of Russian roulette. At times like this it is all the more important for us to stay in our lane.

#### Finisterre Unconstrained Emerging Markets Fixed Income Fund

For the twelve-month period ending 30 September 2023, the Finisterre Unconstrained Emerging Markets Fixed Income Fund reported a net performance of 12.24%.

Local market performance was very strong, particularly in 1H23; large positions in Mexico and Brazil and to a lesser extent in South Africa, Peru, and Poland contributed strongly to performance. Much more aggressive central banks had created huge real rate buffers into yields, a phenomenon that remains in place today in some of these markets. In hard currency, performance was supported by strong bounce backs after the EM selloffs in mid-2022 and again in the autumn of 2023. Large positions in more beta sovereigns were a key positive driver, with Angola, Ivory Coast, and Oman all doing well. Idiosyncratic stories were also a big performance driver as much value had been created in the 2022 selloff and as we saw catalysts for performance. El Salvador was the best performer in this space as bonds more than doubled on Bukele's newfound fiscal restraint and multilateral lending got them over their 2023 eurobond maturity. Sri Lanka had lurched into a messy default and we added with the view that this is a relatively high growth economy with a decent IMF relationship; this position paid off nicely and we exited. Our long-term holdings in Iraq and Ukraine also returned nicely.

Detractors were largely focused on tactical hedges; in a market that spent much of the last 12 months rallying, hedges detracted. We still believe strongly that tactical hedges remain a key source of ability to limit drawdowns. Turkey was the biggest detractor in our external sovereign positions as our bearishness was proven unfounded as Erdogan won re-election and took a hard shift to a more orthodox policy mix.

We continue to search for alpha in Rates relative value ideas (Long Mex vs Chile 2Y) or possibly curve steepeners, together with continued selection and positioning in the sovereign and corporate distressed and special situation space (we recently bought the bond of Samarco, a defaulted Brazilian iron ore pellet producer co-owned by BHP and Vale, which is about to complete a restructuring after years of workout and remediation since the tragic 2015 failure of a tailings dam). We remain active and alert on both momentum positions and portfolio hedges, preferring to use liquid instruments to quickly adjust positions, be that UST futures, CDS indices in EMD, US or EU HY or FX forwards in liquid EM currencies. However, although EMD remains a cheap, underowned, well priced asset class where most risks are well identified, we will need a US growth slowdown catalyst to expect some inflows to start lifting all boats. This should not be too long but may need to wait until November-December. Until then we remain paid to wait with a gross USD Yield to Maturity of 8.70 (6.69% current yield), for 5.49Y of duration and a BB+ average rating.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023 (continued)

#### Finisterre Unconstrained Emerging Markets Fixed Income Fund (continued)

As far as the Finisterre EMD strategy is concerned, this US duration sell-off felt excessive at every turn, given the evidence of continuing disinflation and resilient growth in the US and EMs. Lingering concerns about the take-up for the large US fiscal issuance announced in August are often cited, although we estimate this risk to be worth perhaps 40bp in yields, but not the 120bp surge which we have witnessed in two months. Although there was no repeat of the strong August EMD outflows, September continued to see regular weekly EMD fund outflows, largely at the hands of ETFs. Yet, until month end it never felt like a capitulation.

Therefore, the challenge for investors like us, in deciding if/when to cut risk exposure, was that any soothing data or catalyst could possibly lead to a violent snap back in duration and risk appetite. Technicals are notoriously difficult to appreciate on a day-to-day basis, as no reliable data can summarise the full picture. Our best defence remains to be rational and stick to our beliefs as long as we don't think that the macro narrative has fundamentally changed. However, more than ever, the outlook for our asset class over the next 2 to 3 months, is dependent on a slowdown US growth data (as, even evidence of continuing disinflation is not able to appease markets nor the FED). While we articulate a number of reasons why this may happen sooner than later, we have to remain patient and alert and continue to focus on what makes sense at this juncture, i.e. the maximization of income, through a well invested portfolio in 5 to 7 year Sovereign, corporate credits and high yielding local bonds.

#### U. S. Blue Chip Equity Fund

For the twelve-month period ending 30 September 2023, the U.S. Blue Chip Equity Fund reported net performance of 25.27% compared to 27.35% for the index, Russell 1000 Growth NTR Index.

Company selection contributed to relative performance. Companies owned in the industrials, information technology and materials sectors contributed most. Companies owned in the real estate sector detracted from relative performance.

The year-end recovery in U.S. equity markets continued into 2023, driven by mega-cap technology companies. While the Fund benefitted from owning some of these companies, the biggest contributors over the past twelve months, were a diverse mix of businesses, from software, to aerospace components to global payments. These companies in the portfolio, share common traits of wide competitive moats and being deeply ingrained in their customer's daily operations. The heavier weight in the financials and real estate sectors detracted from relative performance, likely on the perceived impact of higher interest rates in the U.S., despite resilient operating performance. The portfolio remains fully invested in quality businesses.

Given our time horizon as long-term, fundamental investors that commonly own shares in companies for several years, we do not have a near-term market outlook. We will continue to seek opportunities to invest in high quality companies that are managed by owner-operators and trade at a discount to our estimate of their intrinsic value.

#### **Asian High Yield Fund**

For the twelve-month period ending 30 September 2023, the Asian High Yield Fund reported net performance of 6.91% compared to 12.34% for the index, ICE BofA Asian Dollar High Yield Index.

Over the period, the fund benefited from positive absolute return contributions from all major sectors except the China real estate sector. The major sectors that contributed to positive absolute returns were leisure, frontier sovereigns, basic industry, utilities, banking and energy. The fund's main absolute return drag came from the real estate sector where defaults continued to rise leading to negative returns, despite hopes of policy easing allowing for improved industry fundamentals.

The underweight in leisure, utility, capital goods, basic industry, transportation and local government sectors were the key drags of relative performance as these sectors posted strong positive returns over the last twelve months on the back of rebound from oversold conditions. The fund was defensively positioned overall due to the ongoing rate hikes by the US Federal Reserve and slower than expected Chinese economic rebound, and experienced drag vs benchmark as a result. On the other hand, the fund benefited from its underweight position and stock selection within the Chinese real estate sector as the industry experienced ongoing defaults due to the tight policy stance and the lack of a positive market response to the previously announced measures. Additionally, the overweight to telecom and technology sectors as well as off benchmark positions in the financial services sector proved to be positive relative contributors to the fund's performance.

Asia high yield markets have outperformed during the 12 months ending September 2023 with returns back in positive territory although the China property sector continues to remain under pressure.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023 (continued)

#### **Asian High Yield Fund (continued)**

We continue to believe the impact of the Federal Reserve's (Fed) aggressive monetary tightening has yet to be fully realized and continue to expect economic data to soften into the end of the year. In China, we expect pressures to sustain in the near-term as translation of policy into implementation takes time and onshore sentiment remains depressed despite recent improvements. In non-China Asia, we prefer the stronger fundamental stories in India and Indonesia, as well as better positioned names in China, outside of real estate. Fund's strategy remains focused on bottom-up credit selection in view of the higher default rates in China property HY as well as increased allocation to non-property HY which have a better fundamental outlook. The overall underweight in Asia high yield is coupled with off benchmark positions in investment grade rated issuers where the risk reward is reasonable, and the carry is attractive. The fund continues to run higher than typical cash levels that can be deployed when the outlook on the real estate sector improves or when the volatility in global markets subsides.

Even as China HY trades in a choppy manner, we continue to see value in the asset class with attractive valuations, lowered exposure to China real estate, even as global credit spreads have compressed. Weaker fundamentals in China HY require forceful policy response which have come in small doses rather than one significant announcement. We are watching for better restructuring outcomes and improved market liquidity to be introduced back into the space to realize its underlying value. Since it may be months away before the Fed shifts to an easing cycle, and China property remains under stress, we expect the markets to consolidate in the near-term and be led by the evolution of macroeconomic conditions in the U.S., with Asian HY continuing to offer a less correlated and value option.

#### Finisterre VAG Unconstrained EM Fixed Income Fund

For the twelve-month period ending 30 September 2023, the Finisterre VAG Unconstrained EM Fixed Income Fund reported net performance of 9.85%.

Local market performance was very strong, particularly in 1H23; large positions in Mexico and Brazil and to a lesser extent in South Africa, Peru, and Poland contributed strongly to performance. Much more aggressive central banks had created huge real rate buffers into yields, a phenomenon that remains in place today in some of these markets. In hard currency, performance was supported by strong bounce backs after the EM selloffs in mid-2022 and again in the autumn of 2023. Large positions in more beta sovereigns were a key positive driver, with Ivory Coast, and Oman doing well. Idiosyncratic stories were also a big performance driver as much value had been created in the 2022 selloff and as we saw catalysts for performance our long-term holdings in Iraq and Ukraine also returned nicely.

Detractors were largely focused on tactical hedges; in a market that spent much of the last 12 months rallying, hedges detracted. We still believe strongly that tactical hedges remain a key source of ability to limit drawdowns. Turkey was the biggest detractor in our external sovereign positions as our bearishness was proven unfounded as Erdogan won re-election and took a hard shift to a more orthodox policy mix.

We continue to search for alpha in Rates relative value ideas (Long Mex vs Chile 2Y) or possibly curve steepeners. We remain active and alert on both momentum positions and portfolio hedges, preferring to use liquid instruments to quickly adjust positions, be that UST futures, CDS indices in EMD, US or EU HY or FX forwards in liquid EM currencies. However, although EMD remains a cheap, underowned, well priced asset class where most risks are well identified, we will need a US growth slowdown catalyst to expect some inflows to start lifting all boats. This should not be too long but may need to wait until November-December. Until then we remain paid to wait with a gross USD Yield to Maturity of 8.14% (6.42% current yield), for 5.44Y of duration and BBB- average rating.

As far as the Finisterre EMD strategy is concerned, this US duration sell-off felt excessive at every turn, given the evidence of continuing disinflation and resilient growth in the US and EMs. Lingering concerns about the take-up for the large US fiscal issuance announced in August are often cited, although we estimate this risk to be worth perhaps 40bp in yields, but not the 120bp surge which we have witnessed in two months. Although there was no repeat of the strong August EMD outflows, September continued to see regular weekly EMD fund outflows, largely at the hands of ETFs. Yet, until month end it never felt like a capitulation.

Therefore, the challenge for investors like us, in deciding if/when to cut risk exposure, was that any soothing data or catalyst could possibly lead to a violent snap back in duration and risk appetite. Technicals are notoriously difficult to appreciate on a day-to-day basis, as no reliable data can summarise the full picture. Our best defence remains to be rational and stick to our beliefs as long as we don't think that the macro narrative has fundamentally changed. However, more than ever, the outlook for our asset class over the next 2 to 3 months, is dependent on a slowdown US growth data (as, even evidence of continuing disinflation is not able to appease markets nor the FED). While we articulate a number of reasons why this may happen sooner than later, we have to remain patient and alert and continue to focus on what makes sense at this juncture, i.e. the maximization of income, through a well invested portfolio in 5 to 7 year Sovereign and corporate credits.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023 (continued)

#### **Finisterre Emerging Markets Debt Euro Income Fund**

For the twelve-month period ending 30 September 2023, the Finisterre Emerging Markets Debt Euro Income Fund reported net performance of 7.92%.

Local market performance was very strong, particularly in 1H23; large positions in Mexico and Brazil contributed strongly to performance, and to a lesser extent in Romania, Poland and Hungary. Much more aggressive central banks had created huge real rate buffers into yields, a phenomenon that remains in place today in some of these markets. In hard currency, performance was supported by strong bounce backs after the EM selloffs in mid-2022 and again in the autumn of 2023. Large positions in more beta sovereigns were a key positive driver with Ivory Coast and Serbia doing well. Idiosyncratic stories were also a big performance driver as much value had been created in the 2022 selloff and as we saw catalysts for performance our long-term holdings in Iraq also returned nicely.

Our main detractor for the period was the China Real Estate name Country Garden, as a missed payment saw the bonds reach new lows.

We continue to search for alpha in the idiosyncratic sovereign and corporate buckets. In recent months we've added to names like Acu Petroleo, a Brazilian transhipment port which is a play on the country's rapidly growing oil exports. We also have maintained our long-held position in Iraq as well as added to Egypt where we see room for alpha after lagging most of its distressed peers and as they look to be getting some traction again on their relationship with the IMF.

We remain active and alert, ready to modestly increase duration but in the meantime this remains quite an interesting environment for a shorter-duration, income-focused portfolio. However, although EMD remains a cheap, underowned, well priced asset class where most risks are well identified, we will need a US growth slowdown catalyst to expect some inflows to start lifting all boats. This should not be too long but may need to wait until November-December. Until then we remain paid to wait with a gross Yield to Maturity of 7.11% (6.03% current yield) in the Euro Income portfolio, for 3.94Y of duration and a BBB- average rating.

The relentless selloff in rates accelerated in September with Bund yields hitting 12-year highs. The Euro Income portfolio naturally has a lower duration than the broader EM universe and that helped it withstand the broader and continue to generate solid carry across a number of names. We are watching for opportunities to tactically increase duration modestly but our focus is and remains finding new income generating positions. As to our local positions, we have maintained our core positions in Mexico and Brazil despite the selloff in September.

Technicals are notoriously difficult to appreciate on a day-to-day basis, as no reliable data can summarise the full picture. Our best defence remains to be rational and stick to our beliefs as long as we don't think that the macro narrative has fundamentally changed. However, more than ever, the outlook for our asset class over the next 2 to 3 months, is dependent on a slowdown US growth data (as, even evidence of continuing disinflation is not able to appease markets nor the FED). While we articulate a number of reasons why this may happen sooner than later, we have to remain patient and alert and continue to focus on what makes sense at this juncture, i.e. the maximization of income, through a well invested portfolio in 5 - 10 year Sovereign, corporate credits and high yielding local bonds.

#### **China Opportunities Equity Fund**

For the period from 1 October 2022 to 11 April 2023 (date of closure of the Fund), the China Opportunities Equity Fund reported net performance of 22.47%.

Notable contributors were ZTE Corporation, Alibaba Group, BeiGene, Hua Hong Semiconductor, and Tencent. Notable detractors were Meituan, Zhongji Innolight, Ping An Insurance, Xinjiang Goldwind, and Kweichow Moutai.

Gains during the period were led by positive stock selection in health care and information technology sectors and overweight positions to industrials and communication services. These gains were partially offset by negative stock selection in the financials and real estate sectors.

China's economic activities were affected by the sudden relaxation of the Covid-zero policy in December 2022. However, starting from February, economics activities recovered quickly after the omicron impact faded out. Official Manufacturing PMI slightly decreased to 51.9 in March from 52.6 in February. Industrial production growth was 2.4% in first two months of the year. Exports growth was -6.8% yoy in the first two months, and imports growth was -10.2% in the first two months. Retail sales growth was 3.5% in the first two months. Total social financing was RMB3160bn in February, above expectation which was RMB2300bn.

In the first quarter, we saw strong economic recovery in China, especially in the service sector, like catering and lodging.

#### **INVESTMENT ADVISER REPORT**

#### for the year ended 30 September 2023 (continued)

#### **China Opportunities Equity Fund (continued)**

Our strategy remained constructive in the first quarter due to 1) expectation of economic recovery in China and 2) FED considering slowing down rate hikes. We increased our position in internet names, like Alibaba and Baidu, because we believed the government would continue to relax restriction on the industry and encourage growth of the companies. We increased positions in insurance companies like Ping An Insurance and China Pacific Insurance as we were positive the economic recovery and property market recovery would help the profitability of insurance companies in China.

We reduced some overweight in some consumption related stocks like Li Ning and Haier Smart Home as they rallied a lot during 4Q2022 and January.

The Fund was closed on 11 April 2023.

#### Global Sustainable Listed Infrastructure Fund

For the twelve-month period ending 30 September 2023, the Global Sustainable Listed Infrastructure Fund reported net performance of 4.84% compared to 0.51% for the index, FTSE Global Core Infrastructure 50/50 Index.

Our fund outperformed its benchmark over the trailing twelve months, mainly attributed to strong stock selection. Within North America, the largest component of positive contribution came from the Energy sector. The portfolio benefited from an overweight to Archaea Energy specifically. This leading renewable natural gas producer performed strongly due to its agreeing to be acquired at a meaningful premium by a major energy company. Archaea produces renewable natural gas (RNG) from landfills, which is treated and then blended with conventional natural gas for distribution by utilities to customers. An overweight to Chilean utilities was the main driver of Latin American outperformance. The stocks continued to benefit from receding political risk, normalization of business activity post-the pandemic and most recently, market anticipation of rate cuts in Chile. Our portfolio also benefited materially from an overweight to Europe. European transportation operators Vinci and Aena and utility companies Enel, National Grid and Severn Trent were notable positive contributors as the market rewarded compelling valuations. Foreign exchange provided a positive tailwind during the period.

Security selection in Asia was a modest detractor from performance. An underweight to Mexican airports also detracted. The stocks outperformed on continued strong passenger traffic recovery driving aeronautical and non-aeronautical revenue growth.

The resilience of the economy, coupled with stickier inflation and hawkish central bank rhetoric, has driven a reset in expectations for when interest rates will peak this cycle. Global equities have continued their recent outperformance over listed infrastructure as defensive stocks bear the brunt of market fears over higher-for-longer rates. Equity markets now appear to be reflecting an increased probability of a soft economic landing. At the same time, listed infrastructure screens at historically cheap levels vs global equities, creating a compelling entry point into a fundamentally resilient asset class at a time when the degree to which the rate hiking cycle will impact the economy remains uncertain.

Infrastructure stocks should ultimately benefit from more resilient fundamentals as economic growth slows and will be especially well-positioned if slowing growth coincides with unanticipated shocks and/or downward pressure on bond yields. Infrastructure businesses deliver essential services, the demand for which is relatively insensitive to economic cycles. They also enjoy numerous contractual and regulatory protections that are designed to enable them to operate from positions of financial strength in a variety of macroeconomic environments.

As infrastructure businesses are capital intensive, higher interest rates are having a modest impact on earnings. We have also seen many market participants revise valuations to reflect higher discount rates than would have been assumed to start the year. We believe the magnitude of these headwinds is more than reflected in the stock prices of many companies, however. Overall, we still expect structural growth drivers for listed infrastructure companies such as the energy transition and technological innovation to remain tailwinds that outlast today's macro concerns.

Our portfolio construction process remains focused on bottom-up stock selection. The sharp underperformance of listed infrastructure in 2023 has provided an opportunity for us to add high quality, structurally advantaged stocks to the portfolio at material discounts to our view of intrinsic value. In particular, we have continued to increase exposure to companies that we expect to show outsized earnings resilience on a 12+ month view, which is a key driver of our now material overweight to the cell phone tower subsector and recent purchases of utility and renewables stocks. We have also been placing heightened emphasis on companies with relative balance sheet strength. Although our portfolio is now likely to perform best as economic growth weakens and/or rates stabilize, we remain diligent in constructing a portfolio that can withstand shifts in performance leadership resulting from macro news flow.

#### INVESTMENT ADVISER REPORT

#### for the year ended 30 September 2023 (continued)

#### **CCB Principal China New Energy Innovation Fund**

For the period from 18 May 2023 (date of inception of the Fund) to 30 September 2023, CCB China New Energy Innovation Fund reported net performance of -15.20% compared to -26.27% for the index, CSI New Energy Index.

The Fund outperformed its index during the period. Stock selection within New Energy Vehicle provided the most significant positive effect at sector level, whilst the stock selection within PV saw the biggest drag on performance.

Following the inception of the fund, a neutral position has been maintained. Reductions were made in sectors facing overcapacity risks, such as lithium battery materials and photovoltaic components. Overweight positions were taken in intelligent automotive components and offshore wind power. However, amidst the overall beta decline in the new energy industry, the leading stocks in the core holdings showed mediocre performance, experiencing significant third-quarter retractions.

During the reporting period, the A-share market exhibited volatility and weakness, marked by substantial sector differentiations. Growth sectors demonstrated relative weakness, while cyclical and high-dividend stocks performed well. As a manufacturing growth sector with significant institutional holding positions, the new energy industry experienced a significant decline in the reporting period, with the CSI New Energy Index dropping by 21.77% since inception of the fund, significantly underperforming the CSI 300 Index and the ChiNext Index.

Fundamentally, in the context of photovoltaic deceleration and a price war due to oversupply, the weaker beta, coupled with downward pressure on the main industry chain's profitability, suggests substantial challenges. The first quarter of the upcoming year is anticipated to witness a preliminary bottoming of supply and demand dynamics, a subsequent clearance process is envisaged. Among auxiliary materials, photovoltaic glass is anticipated to be the first segment showing early sign of improvement, while inverter performance is contingent on European household production destocking progress and overseas large-scale storage demand, albeit currently at a stage of fundamental pressure. The lithium battery industry faces a relatively subdued demand year in FY24 concerning vehicle models, with a more optimistic outlook expected in FY25, driven by new model cycle and carbon emission assessments. With slowed supply-side expansion, the inventory cycle is projected to shift from destocking in FY23 to normalized inventory buildup in FY24, potentially improving material demand and profitability. As for wind power, the rebound scenario of an upward revision in domestic offshore wind installations for 2024 has concluded. In the short term, sustained speculative opportunities regarding domestic offshore wind are limited. Attention should shift to competitive bidding, deep-sea and overseas opportunities, as well as elevating in valuation anchor within the context of the 15th Five-Year Plan.

Principal Global Investors, LLC October 2023

# Independent auditors' report to the unitholders of the Funds of Principal Global Investors Funds

#### Report on the audit of the financial statements

#### **Opinion**

In our opinion, Principal Global Investors Funds' financial statements:

- · give a true and fair view of the Funds' assets, liabilities and financial position as at 30 September 2023 and of their results for the year then ended;
- · have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 30 September 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Movement in Net Assets Attributable to Redeemable Participating Unitholders for the year then ended:
- the Portfolio of Investments for each of the Funds as at 30 September 2023; and
- the notes to the financial statements for each of the Funds, which include a description of the significant accounting policies.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

#### Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of China Opportunities Equity Fund have been prepared on a basis other than going concern.

#### Conclusions relating to going concern

With the exception of China Opportunities Equity Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of China Opportunities Equity Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

#### Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the manager for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 27, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

#### Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of each of the Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

#### PRINCIPAL GLOBAL INVESTORS FUNDS

### REPORT FROM THE DEPOSITARY TO THE UNITHOLDERS DATED 09 JANUARY 2024

For the period from 1 October 2022 to 30 September 2023 (the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary", "us", "we", or "our") has enquired into the conduct of Principal Global Investors (Ireland) Limited (the "Manager") in respect of Principal Global Investors Funds (the "Trust") for the Period, in our capacity as Depositary to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

#### Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34 of the Regulations. One of those duties is to enquire into the conduct of the Manager in the management of the Trust in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the management has managed the Trust in that period in accordance with the provisions of the Trust's trust deed and the Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the management of the Trust has not done so, we as Depositary must state in what respects it has not done so and the steps which we have taken in respect thereof.

#### **Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34 of the Regulations and to ensure that, in all material respects, the management has managed the Trust (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and Depositary by the trust deed and the appropriate regulations and (ii) otherwise in accordance with the provisions of the trust deed and the appropriate regulations.

#### Opinion

In our opinion, the management has managed the Trust during the Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and Depositary by the trust deed and the Regulations; and
- (ii) otherwise in accordance with the provisions of the trust deed and the Regulations.

The Bank of New York Mellon SA/NV is a Belgian limited liability company, authorized and regulated as a significant credit institution by the European Central Bank and the National Bank of Belgium under the Single Supervisory Mechanism and by the Belgian Financial Services and Markets Authority.

#### STATEMENT OF MANAGER'S RESPONSIBILITIES

#### Manager

The Manager of the Trust is required by the UCITS Regulations to prepare financial statements for each accounting period which gives a true and fair view of the financial position of the Trust at the end of that period, the results of its operations and the movement in net assets for the period then ended. In preparing these financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are prudent and reasonable; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust will
  continue in operation.
- ensure that any transaction carried out with a UCITS by a management company or Depositary to the UCITS, the
  delegates or sub-delegates of the management company or Depositary, and any associate or group of such a
  management company, Depositary, delegate or sub-delegate ("connected persons") is carried out as if negotiated at
  arm's length. Transactions must be in the best interests of the Unitholders.

The Manager is responsible for keeping proper books of account which disclose with reasonable accuracy at any time the financial position of the Trust and for ensuring that the financial statements are prepared in accordance with accounting standards generally accepted in Ireland and for ensuring that they comply with the provisions of the Trust Deed, the UCITS Regulations and the Hong Kong Securities and Futures Commission's Code on Unit Trusts and Mutual Funds. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements are published on the www.principalglobal.com website. The Directors, together with the Manager and the Investment Adviser are responsible for the maintenance and integrity of the financial information included on this website.

**Principal Global Investors (Ireland) Limited** 

#### STATEMENT OF DEPOSITARY'S RESPONSIBILITIES

#### **Depositary**

The Depositary is required by the UCITS Regulations, to:

- maintain the assets of a Unit Trust in safekeeping;
- report to the Unitholders for each accounting period on the conduct of the Manager in the management of a Unit Trust.

The Bank of New York Mellon SA/NV, Dublin Branch

## PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS for the year ended 30 September 2023

## 1. FORMATION

The Principal Global Investors Funds ("the Trust") was constituted under the laws of Ireland by a Trust Deed dated 13 October 1992 as an open-ended umbrella Unit Trust established as an Undertaking for Collective Investment in Transferable Securities ("UCITS"). It is an umbrella Unit Trust in that different classes of units may be issued from time to time by the Manager. The Unit Trust has created a number of sub-funds (the "Funds"). Units of certain classes of the Trust were delisted from the Euronext Dublin (formerly the Irish Stock Exchange) on 13 May 2022. The Trust has been authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2019 (the "Central Bank UCITS Regulations").

The financial statements have been prepared for the year ended 30 September 2023.

The Funds of the Trust are listed on pages 4-8. The Portfolios of Investments are listed on pages 28-84.

## 2. PRINCIPAL ACCOUNTING POLICIES

## **Accounting Convention and Basis of Accounting**

The annual audited financial statements are prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 102, "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" and certain provisions of the UCITS Regulations and the Hong Kong Securities and Futures Commission's Code on Unit Trusts and Mutual Funds. Irish GAAP used in preparing financial statements which present a true and fair view are those standards issued by the Financial Reporting Council ("FRC").

The Trust has availed of the exemption available to open ended investment Funds that hold a substantial proportion of highly liquid and fair valued investments under Section 7 "Statement of Cash Flows" of FRS 102 and is not presenting cash flow statements.

The Directors have a reasonable expectation that the Trust has adequate resources to continue in operational existence for the foreseeable future. The report has been prepared for all Funds in the Trust on a going concern basis with the exception of the China Opportunities Equity Fund which terminated on 11 April 2023 – this Fund has been prepared on a basis other than going concern. The report has been prepared for all Funds in the Trust under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss. The report has been prepared in USD for all Funds except Finisterre Emerging Markets Debt Euro Income Fund. The functional currency of Finisterre Emerging Markets Debt Euro Income Fund is Euro.

The format and certain wordings of the financial statements have been adapted from those contained in Irish statute so that, in the opinion of the Directors, they more appropriately reflect the nature of the Trust's business as an investment Fund.

The information required by FRS 102, to be included in a single statement of comprehensive income for the reporting period displaying all items of income and expense recognised during the period including those items recognised in determining profit or loss and items of other comprehensive income and a Reconciliation of Movements in Unitholders' Funds are, in the opinion of the Directors, contained in the Statements of Comprehensive Income and the Statements of Movement in Net Assets Attributable to Redeemable Participating Unitholders. In arriving at the results for the year, all amounts in the Statements of Comprehensive Income relate to continuing activities except for China Opportunities Equity Fund which has terminated. In the opinion of the Directors, the financial statements give, in all other respects, the information required by the UCITS Regulations and the Hong Kong Securities and Futures Commission's Code on Unit Trusts and Mutual Funds.

All gains or losses for the year are reflected in the Statements of Comprehensive Income.

The significant accounting policies adopted by the Trust are set out overleaf. These policies have been consistently applied to the financial periods presented unless otherwise stated.

## PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS

for the year ended 30 September 2023 (continued)

## 2. PRINCIPAL ACCOUNTING POLICIES (continued)

## Financial Instruments at Fair Value through Profit or Loss

Under FRS 102, in accounting for its financial instruments a reporting entity is required to apply either (a) the full provisions of Section 11 "Basic Financial Instruments" and Section 12 "Other Financial Instruments Issues" of FRS 102, (b) the recognition and measurement provisions of International Accounting Standards ("IAS") 39 "Financial Instruments: Recognition and Measurement" ("IAS 39") and only the disclosure requirements of Sections 11 and 12 of FRS 102; or (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9 "Financial Instruments" ("IFRS 9") and the disclosure requirements of Sections 11 and 12. The Trust has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of Sections 11 and 12.

This category has two sub-categories: financial assets and liabilities held for trading, and those designated by the Valuation Committee of the Manager at fair value through profit or loss at inception. All instruments on the Portfolio of Investments are classified as held at fair value through profit or loss. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets are derecognised when the rights to receive the cashflow from the investments have expired or the Funds have transferred substantially all of the risks or rewards of ownership.

## **Accounting for Investments**

Investments are recognised at the trade date at last traded prices. Realised gains or losses on investment disposals are calculated using the average cost method. Realised gains or losses on investment transactions in debt instruments are calculated using the amortised cost method based on the effective interest rate.

## Valuation of Investments

The year end valuation date was 29 September 2023, the last business day of the year. Securities listed on a recognised stock exchange or traded on any other organised market, are valued at the current price at each valuation point on the stock exchange or market which constitutes the principal market for such securities. If trades are received after the dealing cut-off time they will be accounted for in the next valuation. If for specific assets the current prices do not, in the opinion of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction or the Manager may also apply a fair value adjustment where they deem appropriate in order to reflect fair value.

In the case of any security not listed, quoted or dealt on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Investment Adviser, Sub-Investment Adviser(s), a stockbroker or other competent person appointed by the Manager and approved for the purpose by the Trustee, using valuation techniques.

## **Futures**

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price at an agreed future date. Futures may be used subject to the conditions and limits laid down by the Central Bank and the Trust Deed and subject to any other restrictions or regulations which may affect the portfolio management of the Funds or the Investment Adviser/Sub-Investment Adviser(s). Certain Funds may buy or sell futures to provide an efficient, liquid and effective method for the management of risks by "locking in" gains and/or protecting against future declines in value. The fair value of open future contracts is calculated as the difference between the contracted rate and the current rate that would close out the contract on the Statement of Financial Position date. Gains or losses on futures are included in the Unrealised Gain/(Loss) on Open Future Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. When the contract is terminated, the Funds will recognise a realised gain or loss in the Statement of Comprehensive Income equal to the difference between the value of the contract at the time it was entered into and the time it was closed.

## **Forward Foreign Currency Exchange Contracts**

In a Forward Foreign Currency Exchange Contract, the Funds agree to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. The fair value of Forward Foreign Currency Exchange Contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on Forward Foreign Currency Exchange Contracts are included in the Unrealised Gain/(Loss) on Forward Foreign Currency Exchange Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. Any realised gains or losses are recognised in the Statement of Comprehensive Income at trade date. The Funds may enter into these contracts to hedge against changes in currency exchange rates. The Forward Foreign Currency Exchange Contracts are used to hedge the currency exposure on individual positions taken by the Funds and to hedge certain non base currency units.

## PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS

for the year ended 30 September 2023 (continued)

## 2. PRINCIPAL ACCOUNTING POLICIES (continued)

## **Spot Currency Contracts**

In a Spot Currency Contract the Fund agrees to receive or deliver a fixed quantity of one currency for another, at a predetermined price at a future date (the spot date). This date is typically within three business days of inception of the contract. The fair value of Open Spot Currency Contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on Spot Currency Contracts are included in the Unrealised Gain/(Loss) on Open Spot Currency Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. Any realised gains or losses are recognised in the Statement of Comprehensive Income at trade date.

## **Credit Default Swaps**

A Credit Default Swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset occurs. If such an event occurs, the party will then make a payment to the first party and the swap will terminate. When the swap terminates any realised gains or losses arising are reflected in the Statement of Comprehensive Income as part of the Net Gain/(Loss) on investment activities. A Credit Default Swap provides the Fund with an alternative to investing in assets themselves for a potentially higher return with the same risk or they may be used to obtain exposure to assets which the Fund could not otherwise acquire due to illiquidity in the relevant market. The Fund recognises the swap when it becomes party to the contract. The Credit Default Swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Financial Position as Market Value Gain/(Loss) on Swap Contracts.

## **Term Loans**

The Fund begins earning interest from settlement date of the trade. The loans pay interest at an assigned rate. A Fund investing in such a loan assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower. Term loans are priced at quoted market prices or independently vendor priced, or at cost when vendor prices are unavailable. The change in unrealised gains and losses or any realised gains or losses arising on the loans are shown in Net Gain/(Loss) on investment activities in the Statement of Comprehensive Income.

## **Interest Rate Swaps**

An Interest Rate Swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged. The Interest Rate Swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Financial Position as Market Value Gain/(Loss) on Swap Contracts. When the swap terminates any gains or losses arising are reflected in the Statement of Comprehensive Income as part of the Net Gain/(Loss) on investment activities.

## **Foreign Currency Transactions**

In accordance with Section 30 "Foreign Currency Translation" of FRS 102, items included in the individual Fund's financial statements are measured using the currency of the primary economic environment in which it operates (functional currency). The Fund's selection of the functional currency is attributable to the functional currency being: a) the major component of the Fund's benchmark and b) the common proxy for most clients in the Fund's varied client base. The functional currency assessment was completed at a Fund level. The Funds' presentation currencies equated to their respective functional currencies when assessed under FRS 102. The functional currency of each Fund of the Trust is USD except for the Finisterre Emerging Markets Debt Euro Income Fund. The functional currency of Finstree Emerging Markets Debt Euro Income Fund is Euro.

## For each Fund:

- (i) Currency gains or losses can arise where there is a difference between the amounts of foreign dividends and interest recorded on the Fund's books and the Fund's functional currency equivalent of the amounts actually received or paid. These gains or losses are included where appropriate in the dividend and net gain/(loss) on investment activities figure in the individual Fund's Statement of Comprehensive Income;
- (ii) Currency gains or losses realised on securities purchases and sales transactions are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income;
- (iii) Unrealised currency gains or losses on securities held at year end are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income; and

## PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS

for the year ended 30 September 2023 (continued)

## 2. PRINCIPAL ACCOUNTING POLICIES (continued)

## **Foreign Currency Transactions (continued)**

(iv) Monetary assets and liabilities denominated in currencies other than the Fund's functional currency are translated at the rate of exchange ruling at the close of business on the Statement of Financial Position date and exchange differences are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income.

## Income from Investments

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Interest income is accounted for daily on an effective yield basis. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits. Realised gains or losses on investment transactions in debt instruments are calculated using the amortised cost method based on the effective interest rate. Dividend income due to the Fund is reported as Dividends Receivable in the Statement of Financial Position.

## Net Gain/(Loss) on Investment Activities

In respect of each instrument type classified as Financial Instruments at Fair Value through Profit or Loss, the movement in unrealised gains/(losses) since the prior period end and realised gains/(losses) are included in Net Gain/(Loss) on investment activities in the Statement of Comprehensive Income. Interest earned on fixed income securities such as bonds is included here also.

## **Due to Unitholders**

Due to unitholders represent monies received from investors for the purchase of shares, but for which shares have not been issued at the statement of financial position date. Due to Unitholders are recognised at a price per unit equal to the Net Asset Value per Redeemable Participating Unit on the relevant Dealing Day.

## **Due from Unitholders**

Due from Unitholders represent monies received in respect of redemptions which is due to be paid to investors for the redemption of shares, but for which have not been redeemed at the statement of financial position date. Due from Unitholders are recognised at a price per unit equal to the Net Asset Value per Redeemable Participating Unit on the relevant Dealing Day.

## **Expenses**

Operating expenses are recognised on an accruals basis in the Statement of Comprehensive Income.

## **Anti-Dilution Levy**

The Board of Directors of the Manager may exercise its discretion to apply an anti-dilution levy in relation to subscriptions and redemptions of units. The levy is a charge for transaction costs that may be added or deducted from the NAV per Unit of the relevant class to reflect the costs of acquiring or disposing of underlying assets to Fund subscriptions or redemptions from the Fund, respectively. The levy is intended to be used to ensure that all investors in the Trust are treated equitably by allocating transaction costs to the investors whose transactions give rise to those costs. For the year ended 30 September 2023, there was anti-dilution levies charged on the following funds: European Responsible Equity Fund \$114,858, Origin Global Smaller Companies Fund \$10,073 and U.S Blue Chip Equity Fund \$39,051. For the year ended 30 September 2022, there was anti-dilution levies charged on the following funds: Global Responsible Equity Fund (\$6,029), European Responsible Equity Fund \$356,802, Global High Yield Fund (\$6,315), Global Property Securities Fund \$40,977, Origin Global Smaller Companies Fund \$9,178, U.S Blue Chip Equity Fund \$116,848, and Asian High Yield Fund \$50,505.

## Cash at Bank

Cash is valued at amortised cost, which approximates fair value. Cash is held with The Bank of New York Mellon SA/NV, Dublin Branch.

## Cash Collateral & Pledged Collateral

Cash collateral provided by each Fund is identified in the Statement of Financial Position as cash collateral held and is not included as a component of Cash at Bank. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or repledge the collateral, the Fund classifies that asset in its Statement of Financial Position separately from other assets and identifies the asset as Securities pledged as collateral. Where the party to whom the collateral is provided does not have the right to sell or repledge, a disclosure of the collateral provided is made in the notes to the financial statements. Any obligation arising from collateral received is measured at the fair value of the amount required to settle the obligation and separately identified in the Statement of Financial Position.

for the year ended 30 September 2023 (continued)

#### 2. PRINCIPAL ACCOUNTING POLICIES (continued)

#### Margin Cash Receivable/Payable

Margin Cash Receivable/Payable to the Trust in relation to the open Futures Contracts and open Swap Contracts is identified in the Statement of Financial Position as Margin Cash Receivable/Payable and is not included as a component of Cash at Bank. Margin Cash Receivable and Margin Cash Payable at 30 September 2023 and 30 September 2022 is detailed as part of Note 4.

#### **Distributions**

The Global Responsible Equity Fund declare and pay annual distributions to Unitholders holding the A Income Unit Class.

The European Responsible Equity Fund declare and pay annual distributions to Unitholders holding the A Income Unit Class.

The Global Property Securities Fund declares and pay annual distributions to Unitholders holding the A, A2, D, I, I2 and N Income Unit Classes.

The U.S. Blue Chip Equity Fund declares and pay annual distributions to Unitholders holding the D and N Income Unit Classes.

The China Opportunites Equity Fund declares and pay annual distributions to Unitholders holding the I Income Unit Class.

The Preferred Securities Fund declare and pay quarterly distributions to Unitholders holding the A, I, D, F, N, P and X Income Unit Classes.

The Global High Yield Fund declares and pays quarterly distributions to Unitholders holding the A, I, D and N Income Unit Classes.

The Global Property Securities Fund declares and pay quarterly distributions to Unitholders holding the A2 (Quarterly), D2 Income Plus unit Classes and I (Quarterly) Income Unit Classes.

The Post Short Duration High Yield Fund declares and pay quarterly distributions to Unitholders holding the A, A2 and I Income Unit Classes.

The Finisterre Unconstrained Emerging Markets Fixed Income Fund declare and pay quarterly distributions to Unitholders holding the A, A2, I, I2, I3, D, F, N Income Unit and A2 and P2 Income Plus Unit Classes.

The Finisterre VAG Unconstrained EM Fixed Income Fund will declare and pay quarterly distribution to Unitholders holding the I2 Income Unit Class.

The Finisterre Emerging Markets Debt Euro Income Fund declare and pay quarterly distribution to Unitholders holding the N Income Unit Class.

The Asian High Yield Fund declare and pay quarterly distributions to Unitholders holding the I2 and A2 Income Unit Classes.

There were distributions out of capital of \$414,027 (2022: \$614,046).

for the year ended 30 September 2023 (continued)

#### 2. PRINCIPAL ACCOUNTING POLICIES (continued)

#### **Distributions (continued)**

Upon the expiry of the period of six years after the relevant Distribution Date, the Holder and any person claiming through, under or in trust for him shall forfeit any right to any distribution not paid, and such amount shall become part of the relevant Fund.

Distributions are recorded by each Fund on ex-dividend date in the Statement of Comprehensive Income.

#### Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis, or minimise the assets and settle the liability simultaneously. No offsetting has taken place during the financial year ended 30 September 2023 and 30 September 2022.

#### **Participating Units**

All participating units issued by the Funds provide the investors the right to acquire redemptions for cash at the value proportionate to the investor's share in the Fund's net assets at the redemption date. Such instruments give rise to a financial liability for the present value of the redemption amount. In accordance with the issued prospectus the Funds are contractually obliged to redeem units at the traded NAV per unit which is calculated at each valuation point.

#### **Redeeming Units**

When a redemption request has been submitted by a Unitholder who is or is deemed to be an Irish resident, or is acting on behalf of an Irish resident, the Manager shall deduct from the redemption proceeds an amount which is equal to the tax payable by the Unit Trust to the Revenue Commissioners in Ireland in respect of the relevant transaction.

#### 3. TAXATION

Under current law and practice the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act. 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Unitholders, any encashment, redemption, cancellation, repurchase or transfer of units and any deemed disposals of units as described below for Irish tax purposes arising as a result of holding units in the Trust for a period of eight years or more. Where a chargeable event occurs, the Trust is required to account for the Irish tax thereon.

No Irish tax will arise on the Trust in respect of chargeable events in respect of:

- (i) a Unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Trust or the Trust has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) certain exempted Irish tax resident Unitholders who have provided the Trust with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its Unitholders.

for the year ended 30 September 2023 (continued)

#### 6. DISTRIBUTIONS

#### For the year ended 30 September 2023

Annual distributions were declared on 1 October 2023 and 1 October 2022 respectively. Distributions declared on 1 October 2023 or nearest subsequent business day have not been included in the Statement of Comprehensive Income for 30 September 2023. These will be included in the financial statements for 30 September 2024. The A Income Unit Classes from the Global Responsible Equity Fund did not declare and pay any annual distributions for the year ended 30 September 2023 or 30 September 2022. Distributions declared on 1 October 2023 relate to 30 September 2023 distributions in the table below.

#### **Accumulation Classes**

The Accumulation Unit Classes did not declare Distributions on 30 September 2023 or 30 September 2022.

#### **Quarterly and Annual Distributions**

#### 7. SIGNIFICANT CONTRACTS AND TRANSACTIONS WITH RELATED PARTIES

#### **Management Fee**

Pursuant to the Trust Deed dated 13 October 1992, Principal Global Investors (Ireland) Limited ("the Manager") acts as Manager to the Trust and is responsible for its management and administration. For services rendered, the Trust will pay to the Manager an annual fee, accrued daily in the unit price and payable monthly in arrears. The Management Fee is currently calculated as a percentage of the NAV of each Fund and is accrued every Business Day. These related party transactions have been entered into in the ordinary course of business. The Management Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position. Management Fee rates for each unit class are listed in the supplement for each Fund. These are available from the www.principalglobal.com website.

#### **Expense Cap**

The Manager, at its discretion, may absorb (directly by waiving a portion of its fees or by reimbursement to the account of each Fund), certain additional fees, costs or expenses for each Fund that may arise in respect of the management and operation of the Trust attributable to each Fund. This Expense Cap fee is shown as Rebate/Recharge to the Fund due to capping in the Statement of Comprehensive Income and the accrual/prepaid amount is shown as part of Other Assets or Other Payables in the Statement of Financial Position.

#### **Administration Fee**

In addition to the Management Fee, the Trust Deed permits the Manager to charge an Administration Fee of up to 0.15% per annum of the value of the units in the Funds for administering the Trust. Currently the Manager only charges this fee on the NAV of the Funds attributable to A, D, F, and N Class units. This fee is calculated as a percentage of the NAV of each Fund attributable to A, D, F and N Class units and is accrued every Business Day. The total accrued amount is paid monthly in arrears. All fees and expenses payable to the Administrator in respect of the administration services it provides to the Manager will be met by the Manager. Administration Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

#### **Trustee and Depositary fee**

The Manager appointed The Bank of New York Mellon SA/NV, Dublin Branch to act as the Trustee to the Trust. The principal activity of the Trustee is to act as the Depositary and Trustee of the assets of collective investment schemes ("CISs"). The Trustee may retain for its own use out of each Fund a fee of up to 0.022% per annum of the NAV of the units calculated on each Business Day during the month, accrued and deducted from the Fund the following month - subject to a minimum fee of US\$15,000 per annum which may be waived. The fee currently charged by the Trustee per Fund is disclosed in the relevant supplement for each Fund. The Trustee Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

#### **Directors' Remuneration**

Mr. John O'Connell, Ms. Bronwyn Wright and Mr. Jim Firn are independent non-executive Directors of the Manager and have no executive function with the Investment Adviser or its related party companies. Each independent non-executive Director receives an annual fee of €33,540 for their services rendered to the Trust. Mr. Joel Pitz, Mr.Kamal Bhatia, Ms. Barbara Weing, Mr. James Bowers and Mr. Donnacha Loughrey are related parties to the Investment Adviser and are not entitled to receive any compensation from the Trust.

#### **Sub-Custody Fee**

The Depositary will be paid a fee at normal commercial rates and such fee shall be paid out of each Fund. The level of Sub-Custodian Fees and expenses will vary depending on the investment profile of the Fund including, in particular, the nature of the securities markets in which the Fund invests, the size of the Fund and the amount of trading in the assets of the Fund. Such fees will be charged at normal commercial rates and will only be reimbursed from a Fund where they are less than 0.50% per annum of the NAV of the Fund. The Manager will pay any fees that exceed this level. Depositary Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

#### Performance Fees

There are no performance fees on any of the Funds for the year ended 30 September 2023 or 30 September 2022.

for the year ended 30 September 2023 (continued)

#### 7. SIGNIFICANT CONTRACTS AND TRANSACTIONS WITH RELATED PARTIES (continued)

#### **Audit Fees**

The audit fee charged for the year ended 30 September 2023 was \$206,292 excluding VAT (2022: \$207,004) excluding VAT). Other than statutory audit fees disclosed in the Statement of Comprehensive Income the only other fees paid to PricewaterhouseCoopers in Dublin, Ireland as the Statutory Auditor of the Trust were in relation to tax services provided amounting to \$79,628 (2022: \$61,247).

#### 9. EFFICIENT PORTFOLIO MANAGEMENT

The Funds are denominated in USD, except for Finisterre Emerging Markets Debt Euro Income Fund which is denominated in Euro, but purchase assets denominated in a range of currencies. During the year, transactions were entered into which are economically appropriate to the reduction of relevant risks or costs to improve investment performance.

Subject to the conditions and within the limits from time to time laid down by the Central Bank, and except as otherwise stated in the investment objective and policies of a Fund, the Investment Adviser and/or Sub-Investment Adviser(s) may employ, for certain Funds, investment techniques and instruments such as futures, forward foreign currency exchange contracts, currency swaps, credit default swaps, total return swaps, options, equity options, warrants and other derivatives for Efficient Portfolio Management ("EPM") purposes if deemed advisable by the Investment Adviser/Sub-Investment Adviser(s). Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank.

For UCITS which have engaged in EPM techniques, certain disclosures are required under Chapter 4 of the Central Bank UCITS Regulations. The Investment Advisers of the Funds have identified all Financial Derivative Instruments ("FDIs") which are used for EPM. A UCITS is required to disclose the revenues arising from EPM techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The Funds may also where indicated in the relevant supplement, enter into repurchase, reverse repurchase, sale and buyback agreements and stock lending agreements. The Investment Adviser/Sub-Investment Adviser(s) considers only repurchase agreements, reverse repurchase agreements and securities lending to be EPM techniques. None of the Funds held repurchase agreements, reverse repurchase agreements or took part in securities lending as at 30 September 2023 or at 30 September 2022.

Details of all open transactions at the year end are disclosed in the Portfolios of Investments.

<sup>&</sup>lt;sup>2</sup>Global Equity Fund name changed to Global Responsible Equity Fund on 16 December 2021.

<sup>&</sup>lt;sup>3</sup>Post Global Limited Term High Yield Fund name changed to Post Short Duration High Yield Fund on 1 March 2022.

<sup>&</sup>lt;sup>4</sup>European Equity Fund name changed to European Responsible Equity Fund on 23 June 2022.

<sup>&</sup>lt;sup>5</sup>Global Diversified Income Fund terminated on 29 September 2022.

<sup>&</sup>lt;sup>6</sup>China Opportunities Equity Fund terminated on 11 April 2023.

<sup>&</sup>lt;sup>7</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

for the year ended 30 September 2023 (continued)

#### 10. DEALING COMMISSION ARRANGEMENTS

The Investment Adviser appointed in relation to each Fund is responsible for the selection of brokers with whom they deal. In relation to certain equity Funds, the Investment Adviser/Sub-Investment Adviser(s) have entered into dealing commission arrangements with brokers whereby they obtain services or benefits from them, or from third parties — which are paid for out of commissions charged to the Funds. Such services or benefits relate primarily to research and portfolio management, and ensuring their purchase is compliant with relevant local regulation; including being a permitted service. The relevant Investment Adviser/Sub Investment Adviser(s) are satisfied that trades generating soft commissions comply with the relevant local regulations requiring best execution — which requires consideration of relevant factors, including price and execution quality.

#### 11. FINANCIAL RISK MANAGEMENT

#### **Strategy in Using Financial Instruments**

The activities of each Fund expose it to a variety of financial risks such as market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Funds' overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Funds' financial performance. The Funds make use of FDIs to moderate certain risk exposures. The general risk factors set out in the "Special Investment Considerations and Risks" section of the prospectus apply to the Funds and risks specific to these Funds are set out below. These risk factors do not purport to be an exhaustive or complete explanation of all the risks associated with an investment in the Funds and persons considering purchasing units should inform themselves as to (i) the legal requirements within their own countries for the purchase of units, (ii) any foreign exchange restrictions which may be applicable and (iii) the income and other tax consequences of purchase and repurchase of units.

The risk management process operates at a number of levels. In addition to the Investment Adviser/Sub-Investment Adviser(s) monitoring investment activity and exposure at the point of execution ensuring a Fund is managed according to its guidelines and objectives, the Depositary and the Trustee of the Funds also provide an independent analysis of financial instrument exposure by monitoring investment limits in accordance with the UCITS Regulations and the Funds' prospectus.

The Funds' overall market positions are monitored on a daily basis by the Investment Adviser/Sub-Investment Adviser(s) and compliance with the Funds' investment guidelines are monitored on an ongoing basis by the Investment Adviser/Sub Investment Adviser(s) and Trustee. The Board of Directors of the Manager have oversight of the risk management process and receive monthly and quarterly reports from the Investment Adviser/Sub-Investment Adviser(s) and the Trustee. The Funds' investments in securities are subject to normal market fluctuations and other risks inherent in investing in securities. The value of investments and the income from them, and therefore the value of the units can go down as well as up and an investor may not get back the amount they invest.

The strategies as enumerated for the Funds below and overleaf are summarised, please refer to the prospectus and supplements of the individual Funds for greater detail. These are available on the www.principalglobal.com website.

#### **Global Responsible Equity Fund**

The Fund seeks to achieve capital growth over the medium to long term by investing principally in equity securities selected from investment markets around the world. Investments can also include unlisted securities (limited to 10% of the net assets), bank deposits, debt securities, fixed interest and money market securities. The Fund may also invest in real estate investment trusts ("REITS") and in other Funds of the Trust.

#### **European Responsible Equity Fund**

The Fund seeks to achieve capital growth over the medium to long term by investing principally in the equity securities of companies domiciled or with their core business in Europe (including Eastern Europe). Investments can also include unlisted securities (limited to 10% of the net assets), bank deposits, debt securities, fixed interest and money market securities. The Fund may also invest in REITS and in other Funds of the Trust.

#### **Preferred Securities Fund**

The Fund will seek to provide a return consisting of income consistent with capital preservation by investing primarily in a portfolio of USD denominated preferred securities and debt securities. Within this, the Fund may invest, in particular, in convertible bonds and contingent convertible securities ("CoCos"). Investments can also include ancillary liquid assets such as bank deposits.

for the year ended 30 September 2023 (continued)

#### 11. FINANCIAL RISK MANAGEMENT (continued)

Strategy in Using Financial Instruments (continued)

#### **Global High Yield Fund**

The Fund will seek to provide a return consisting of income and, over the long term, capital growth by investing the majority of its assets in a portfolio of USD denominated public and private issued high-yield fixed income securities. The Fund may also invest globally in public and private issued high-yield fixed income securities. The Fund will invest in companies or issuers that are consistent with the Investment Adviser's policy on responsible investing. The Fund may also hold ancillary liquid assets such as bank deposits as well as invest in REITS and in other Funds of the Trust which takes account of environmental, social and corporate goverance ("ESG") criteria.

#### **Global Property Securities Fund**

The Fund will seek to provide a total return primarily through investment in a portfolio of global property securities by investing primarily in a global portfolio of publicly traded securities of companies engaged in the property industry or whose value is largely derived from property assets. The Fund's investments will include no less than 80% of the net assets in REITS, non-REIT real estate companies and similar structures. The Fund may invest in equity and debt securities of companies that at the time of investment have at least 50% of their assets, income or profits derived from products or services related to the global property industry. The Fund may also invest in common and preferred equity securities, debt securities, options, warrants (up to 5% of the Fund), convertible bonds, exchange traded funds ("ETFs") and Depositary receipts. The Fund may also hold ancillary liquid assets such as bank deposits.

#### **Post Short Duration High Yield Fund**

The Fund aims to provide a high rate of return with low volatility relative to typical high yield investments by investing primarily in limited duration high yield securities by investing primarily in a portfolio of global short-term, lower volatility high yield debt securities with an average duration of approximately 12-24 months. These securities will generally be rated below investment grade. The portfolio will be diversified, consisting from time to time of securities including fixed and floating rate global corporate bonds, debt issued in the leveraged loan market such as bank loan assignments and participations, convertible bonds, commercial paper, private placements, such as Rule 144A securities, preferred securities, hybrids and taxable municipal bonds. The Fund may also invest in other Funds of the Trust. The Fund may also hold ancillary liquid assets such as bank deposits. The Fund will not invest more than 20% in emerging markets.

#### **Origin Global Emerging Markets Fund**

The Fund seeks to achieve capital growth through investment in global emerging market equities. The Fund will invest in transferable equity and equity-related securities of a diversified range of companies in what the Sub-Investment Adviser considers to be emerging economies of the world, normally with a minimum market capitalisation on purchase of USD1 billion. These securities will primarily be common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants (only held where an existing holding is subject to an issuance of warrants and, in aggregate, normally not more than 5% of the Fund's NAV) and rights as well as Depositary receipts for such securities, all of which are traded on securities exchanges or regulated markets. A proportion of the net assets of the Fund (subject to a maximum of 10% of its NAV) may be invested in UCITS eligible CISs. Subject to complying with the investment restrictions of the Fund, the Fund may hold ancillary liquid assets such as bank deposits.

#### **Origin Global Smaller Companies Fund**

The Fund seeks to achieve capital growth through investment in global smaller companies. The Fund will invest in transferable equity and equity-related securities of a diversified range of companies throughout the globe, normally with a maximum market capitalisation on purchase of up to USD5 billion. These securities will primarily be common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants (only held where an existing holding is subject to an issuance of warrants and, in aggregate, normally not more than 5% of the Fund's NAV) and rights as well as Depositary receipts for such securities, all of which are traded on securities exchanges or regulated markets. A proportion of the net assets of the Fund (subject to a maximum of 10% of the NAV) may be invested in UCITS eligible CISs. Subject to complying with the investment restrictions of the Fund, the Fund may hold ancillary liquid assets such as bank deposits.

for the year ended 30 September 2023 (continued)

#### 11. FINANCIAL RISK MANAGEMENT (continued)

Strategy in Using Financial Instruments (continued)

#### **Global Diversified Income Fund**

The investment objective of the Fund is to provide current income. The Fund seeks to achieve the investment objective by investing the majority of its assets in income-producing debt, equity and hybrid securities. Hybrid securities are securities with features of both debt and equity securities. The Fund will consistently employ a global asset allocation investment process, which is based upon fundamental research driven, long-term focused security selection. The types of debt securities the Fund may invest in include, but are not limited to, corporate, sovereign and quasi-sovereign bonds, commercial and residential mortgage backed securities and other asset backed securities. Investment in commercial and residential mortgage backed securities and other asset backed securities will not exceed 15% of the Fund's NAV in aggregate. The types of hybrid securities the Fund may invest in are preferred stock and convertible securities, including CoCos. The Fund may also invest in UCITS or CISs, the constituents of which would typically include the instruments described above and hold ancillary liquid assets such as bank deposits.

#### Finisterre Unconstrained Emerging Markets Fixed Income Fund

The investment objective of the Fund is to seek to generate total returns through income and capital appreciation, while limiting volatility and potential capital losses. The Fund seeks to achieve its objective by actively investing in a diversified range of fixed-income and financial derivative instruments, a majority (not less than 51%) issued by or referencing emerging markets. These include corporate, sovereign and quasi-sovereign entities. The Fund seeks to extract value from investments in both investment grade and high yield fixed income instruments, and can include both stressed and distressed securities. A proportion of the net assets of the Fund may be invested in UCITS eligible CISs, including exchange traded funds and the Fund may hold equities as a result of the conversion of a convertible bond or as the result of a debt restructuring.

#### U.S. Blue Chip Equity Fund

The Fund seeks to achieve capital growth over the medium to long term by investing at least 80% of its NAV in "Equity and Equity Related Securities" of companies which are incorporated and/or listed on stock exchanges in the United States. A proportion of the net assets of the Fund (subject to a maximum of 10% of its NAV) may be invested in UCITS eligible CISs, including exchange traded funds, the constituents of which may comprise the instruments and markets described above and therefore is an alternative means through which the Fund may gain exposure to these types of instruments and markets. The Fund will only invest in AIFs per the Central Bank's Guidance in relation to UCITS Acceptable Investments in other Investment Funds and the Fund may hold ancillary liquid assets.

#### **Asian High Yield Fund**

The investment objective of the Fund is to provide a return consisting of income and, over the long term, capital growth. The Fund seeks to achieve its overall objective by generally investing at least 70% of its NAV in a portfolio of high-yield fixed income securities, which have been issued by governments and agencies of, or companies domiciled in, or exercising the principal part of their business activity in Asia. Such securities may include fixed interest rate corporate bonds, sovereign bonds, senior callable bonds and CoCos. A proportion of the net assets of the Fund (subject to a maximum of 10% of its NAV) may be invested in UCITS eligible CISs, including exchange traded funds, the constituents of which may comprise the instruments and markets described above and therefore is an alternative means through which the Fund may gain exposure to these types of instruments and markets. The Fund will only invest in AIFs per the Central Bank's Guidance in relation to UCITS Acceptable Investments in Other Investment Funds.

#### Finisterre VAG Unconstrained EM Fixed Income Fund

The investment objective of the Fund is to seek to generate total returns through income and capital appreciation, while limiting volatility and capital losses. The Fund seeks to achieve its objective by actively investing in a diversified range of fixed-income and FDIs, a majority (not less than 51%) issued by or relating to underlying issuers in, emerging markets. The Fund may also invest in fixed income instruments and FDI issued by or relating to underlying issuers in, developed markets. These include corporate, sovereign and quasi-sovereign entities. The Fund seeks to extract value from investments in both investment grade and high yield fixed income instruments, and can include both stressed and distressed securities. A proportion of the net assets of the Fund may be invested in UCITS eligible CISs, including exchange traded funds, the constituents of which may comprise the instruments and markets described above and therefore is an alternative means through which the Fund may gain exposure to these types of instruments and markets. The Fund may hold equities as a result of the conversion of a convertible bond or as the result of a debt restructuring.

for the year ended 30 September 2023 (continued)

#### 11. FINANCIAL RISK MANAGEMENT (continued)

Strategy in Using Financial Instruments (continued)

#### Finisterre Emerging Markets Debt Euro Income Fund

The investment objective of the Fund is to seek to maximise income, while minimising potential losses due to macro and credit risks. The Fund seeks to achieve the investment objective by actively investing in a diversified range of fixed-income securities and FDIs, a majority (not less than 51% of its NAV) issued by or relating to underlying issuers in, emerging markets. The Fund may also invest in fixed income instruments and FDI issued by or relating to underlying issuers in, developed markets. These include corporate, sovereign and quasi-sovereign entities. The Fund seeks to extract value from investments in both investment grade and high yield fixed income securities and can include both stressed and distressed securities. A proportion of the net assets of the Fund may be invested in UCITS eligible CISs, including exchange traded funds, the constituents of which may comprise the instruments and markets described above and therefore is an alternative means through which the Fund may gain exposure to these types of instruments and markets. The Fund will only invest in AIFs per the Central Bank's Guidance in relation to UCITS Acceptable Investments in Other Investment Funds. The Fund may hold equities as a result of the conversion of a convertible bond or as the result of a debt restructuring.

#### China Opportunities Equity Fund<sup>1</sup>

The investment objective of the Fund is to provide an absolute return based on capital growth and income over the long term. The Fund seeks to achieve its objective by investing at least 80% of its NAV in equity and equity related securities selected from investment markets in the Greater China region (Mainland China, Hong Kong, Macau and Taiwan). The Fund may also invest in securities listed on other markets that derive a significant proportion of their revenue from the Greater China region. Investments can also include unlisted securities (limited to 10% of the net assets) as well as invest in REITS. A portion of the net assets of the Fund (subject to a maximum of 10% of its NAV) may be invested in UCITS eligible CISs, including exchange traded funds, the constituents of which may comprise the instruments and markets described above and therefore is an alternative means through which the Fund may gain exposure to these types of instruments and markets. The Fund will only invest in AIFs per the Central Bank's Guidance in relation to UCITS Acceptable Investments in Other Investment Funds.

#### **Global Sustainable Listed Infrastructure Fund**

The investment objective of the Fund is to provide a total return that exceeds its benchmark while achieving positive, measurable social and environmental impact by investing in infrastructure companies that contribute to the United Nations Sustainable Development Goals ("SDGs"). The Fund seeks to achieve its objective by investing at least 80% of its assets in a diversified portfolio of equity or equity-related securities issued by Sustainable Infrastructure Companies. A "Sustainable Infrastructure Company" is a company engaged in the development, operation and management of infrastructure assets in a financially sustainable manner while also contributing, and expected to further contribute in the future, to the relevant environmental and social objectives identified in the SDGs. The nature and degree of a company's expected contribution may vary by the infrastructure subsector and country in which it operates. Infrastructure includes but is not limited to utilities (electric, gas, water), transportation infrastructure (airports, highways, railways, marine ports), energy infrastructure and communications infrastructure.

#### **CCB Principal China New Energy Innovation Fund<sup>2</sup>**

The investment objective of the Fund is to seek to generate return through investment income and capital appreciation. The Fund seeks to achieve its objective by investing primarily in listed companies related to new energy industry and strives to achieve long-term stable appreciation of fund assets under the premise of strict risk control and good liquidity. The Fund will invest 80-95% of its assets in listed equities, of which the proportion of investment in "New Energy Industry Stocks" shall not be less than 80%.

#### **Market Price Risk**

All securities and investments present a risk of loss of capital. The Investment Adviser/Sub-Investment Adviser(s) moderates this risk through diversification and careful selection of securities and other financial instruments within the limits defined in the prospectus.

Except for derivatives, the maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. Possible losses on forwards and futures can result from the movement in currency exchange rates in the time between the forward trade date and the settlement date depending on the volatility of the currencies.

<sup>1</sup>China Opportunities Equity Fund terminated on 11 April 2023. <sup>2</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

for the year ended 30 September 2023 (continued)

#### 11. FINANCIAL RISK MANAGEMENT (continued)

#### Market Price Risk (continued)

The maximum risk of the Credit Default Swaps and Total Return Swaps is determined by the fair value of the swaps. The Funds' overall market positions are monitored on a daily basis by the Funds' Investment Adviser/Sub-Investment Adviser(s).

The Investment Adviser/Sub-Investment Adviser(s) reviews the portfolio characteristics of each Fund in its entirety. This review may include as appropriate a review of country allocations, country weights, capitalization, distribution, industry sector weights, price/book levels, currency exposure, portfolio maturity, portfolio duration, sector exposure, quality exposure and other key risk measures.

The Funds may employ investment techniques and FDIs for EPM and/or investment purposes within the limits set out in the prospectus as described in the sections 'General Information' and 'Special Investment Considerations and Risks'. Each Fund may hold a combination of FDIs such as options, futures, options on futures, forward foreign currency exchange contracts, repurchase contracts, reverse repurchase agreements, sale and buyback agreements, stock lending agreements, credit default swaps, interest rate swaps and other over the counter derivative instruments which may be used subject to the conditions and limits laid down by the Central Bank and the Trust Deed and subject to any other restrictions or regulations which may affect the portfolio management of the Funds.

#### **Sensitivity Analysis**

Sensitivity analysis is an indication based on historical data showing the impact of a 5% movement in the Benchmark on the NAV of the Funds at the Statement of Financial Position date.

#### **Limitations of Sensitivity Analysis:**

Some limitations of sensitivity analysis are;

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive and future market conditions could vary significantly from those experienced in the past.

China Opportunities Equity Fund <sup>7</sup>	N/A	USE	296,614	(296,614)
Global Sustainable Listed		USE	) N/A	N/A
Infrastructure Fund <sup>1</sup>	N/A			

<sup>\*</sup>The changes in NAV have been calculated by applying a beta calculation based on performance for the period multiplied by a 5% increase/ (decrease) in the index. The Manager considers this movement to be reasonable.

The Funds' market price risk is managed through investment selection and diversification in accordance with the UCITS Regulations and the limits set out in the prospectus. The Investment Adviser uses their portfolio management selection tool and makes use of tracking errors to monitor deviation with the benchmark. Monthly performance reports are reviewed by the Investment Adviser/Sub-Investment Adviser(s) and quarterly by the Board of Directors of the Manager. Each Fund's overall market exposures and notional exposures for derivatives are disclosed in the Portfolio of Investments.

Market risk exposures for Finisterre Unconstrained Emerging Markets Fixed Income Fund, Finisterre VAG Unconstrained EM Fixed Income Fund, and Finisterre Emerging Markets Debt Euro Income Fund are measured using value-at-risk (VaR), which estimates the maximum expected loss over a defined period for a specified confidence level. The VaR methodology is a statistically defined, probability based approach that takes into account estimates for market volatilities as well as risk diversification by recognising offsetting positions and some estimates of correlations between products. Risks are measured consistently across markets and products, and risk measures are aggregated to arrive at a single risk number.

The Funds' proprietary model uses a non-parametric approach based on a one-tailed confidence level of 99% for a daily horizon and considering no less than two years of historical data.

It is noted that the use of VaR models to assess risk has limitations; these models use historical market data as a basis for their estimates, and assume that future conditions will be like those in the past. The estimates may be unreliable, especially under new or extreme market conditions. As there are frequent changes in a Fund's holdings, the sensitivity analysis should not be relied upon as a measure of future performance.

The VaR as of 30 September 2023 and 30 September 2022 based on a confidence level of 99% is included in the table below:

	30 September 2023	30 September 2022
	%	%
Finisterre Unconstrained Emerging Markets Fixed Income Fund	0.81	1.80
Finisterre VAG Unconstrained EM Fixed Income Fund <sup>1</sup>	0.86	1.61
Finisterre Emerging Markets Debt Euro Income Fund <sup>2</sup>	0.89	1.69

The lowest, highest and average utilisation of the VaR limit, using an Absolute VaR approach based on the above inputs are included in the tables below:

	Lowest	Highest	Average
Fund	%	%	%

<sup>&</sup>lt;sup>1</sup>Global Sustainable Listed Infrastructure Fund launched on 15 November 2021 and as a result there was no sensitivity analysis prepared for this Fund.

<sup>&</sup>lt;sup>2</sup>Global Equity Fund name changed to Global Responsible Equity Fund on 16 December 2021.

<sup>&</sup>lt;sup>3</sup>Post Global Limited Term High Yield Fund name changed to Post Short Duration High Yield Fund on 1 March 2022.

<sup>&</sup>lt;sup>4</sup>European Equity Fund name changed to European Responsible Equity Fund on 23 June 2022.

<sup>&</sup>lt;sup>5</sup>Finisterre Unconstrained Emerging Markets Fixed Income Fund, Finisterre VAG Unconstrained EM Fixed Income Fund, and Finisterre Emerging Markets Debt Income Fund do not have applicable benchmark indices, and as a result there was no sensitivity analysis prepared for these Funds.

<sup>&</sup>lt;sup>6</sup>Global Diversified Income Fund terminated on 29 September 2022.

<sup>&</sup>lt;sup>7</sup>The performance of the China Opportunities Equity Fund is not compared directly with any specific publicily available benchmark, therefore the change in NAV shown in the table above is based off a 5% movement of the NAV of the Fund.

# PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS for the year ended 30 September 2023 (continued)

### FINANCIAL RISK MANAGEMENT (continued)

### Financial Assets at Fair Value through Profit or Loss

11.

Under FRS 102, the Trust is required to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

"FRS 102 - Fair value hierarchy disclosures" require disclosure of financial instruments held at fair value on the basis of a fair value hierarchy consistent with EU-adopted IFRS based on Level 1, 2 and 3 classifications. The financial statements and comparatives have been prepared in accordance with these amendments and fair value measurement is categorised based on Levels 1, 2 and 3.

The fair value of securities held in Level 3 for the year ended 30 September 2023 was USD 296 (30 September 2022: USD 12,987). Securities fair valued at nil have been indicated by a footnote on any relevant Funds in the following tables.

The tables overleaf analyse the financial assets of each Fund against the fair value hierarchy and measures them at fair value for 30 September 2023 and 30 September 2022 in accordance with FRS 102.

As at 30 September 2023, Principal Global Investors Funds reclassified the following position Best World International Limited from Level 3 to Level 1 in Origin Global Smaller Companies Fund. There were no other transfers between levels 1, 2 or 3 during the financial year ended 30 September 2023 and no transfers between levels for the financial year ended 30 September 2022. The fair value of the positions are outlined in the table below.

<sup>&</sup>lt;sup>~</sup>Contains Level 3 security at nil market value.

#### **Interest Rate Risk**

Funds which hold interest bearing financial assets and liabilities are exposed to interest rate risk, where the value of the securities may fluctuate as a result of a change in interest rate.

This risk is managed by the setting of limits on the level of cash holdings in the Funds. Such limits are set out in the Funds' prospectus. With the fixed income Funds, the Investment Adviser/Sub-Investment Adviser(s) have set limits of exposure and use an internal process to monitor macroeconomic factors affecting interest rate risk.

The Global Responsible Equity Fund, European Responsible Equity Fund, Global Property Securities Fund, Origin Global Emerging Markets Fund, Origin Global Smaller Companies Fund, U.S. Blue Chip Equity Fund, China Opportunity Equity fund, Global Sustainable Listed Infrastructure Fund and CCB Principal China New Energy Innovation Fund are not included in the overleaf table as the majority of the financial assets and liabilities of those Funds are non-interest bearing or have a very short time to maturity. As a result, those Funds are not subject to significant amounts of risk due to fluctuations in the market interest rates.

The overleaf tables summarise the exposure to interest rate risk for the Preferred Securities Fund, Global High Yield Fund, Post Short Duration High Yield Fund, Finisterre Unconstrained Emerging Markets Fixed Income Fund, Asian High Yield Fund, Finisterre VAG Unconstrained EM Fixed Income Fund and Finisterre Emerging Markets Debt Euro Income Fund. They include each Fund's assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity dates.

<sup>&</sup>lt;sup>1</sup>Global Sustainable Listed Infrastructure Fund launched on 15 November 2021.

<sup>&</sup>lt;sup>2</sup>Global Equity Fund name changed to Global Responsible Equity Fund on 16 December 2021.

<sup>&</sup>lt;sup>3</sup>Post Global Limited Term High Yield Fund name changed to Post Short Duration High Yield Fund on 1 March 2022.

<sup>&</sup>lt;sup>4</sup>European Equity Fund name changed to European Responsible Equity Fund on 23 June 2022.

<sup>&</sup>lt;sup>5</sup>Global Diversified Income Fund terminated on 29 September 2022.

<sup>&</sup>lt;sup>6</sup>As a result of the suspension and given the continued sanctions against the Russian government. These have been fair valued at zero until suspension is lifted.

for the year ended 30 September 2023 (continued)

Post Global Limited Term High Yield Fund name changed to Post Short Duration High Yield Fund on 1 March 2022.

The following interest rate sensitivity information is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future price movements and correlations between securities could vary significantly from those experienced in the past.

### Approximate increase or decrease in NAV due to a 4% (30 September 2022: 4%) change in market interest rates

		Change in NAV			
Fund Name	Currency	As at 30 September 2023	As at 30 September 2022		
Preferred Securities Fund	USD	145,625,482	156,772,380		
Global High Yield Fund	USD	8,466,135	7,980,776		
Post Short Duration High Yield Fund	USD	14,488,372	21,081,485		
Finisterre Unconstrained Emerging Markets Fixed Income Fund	USD	55,140,771	35,809,494		
Asian High Yield Fund	USD	1,206,563	1,029,798		
Finisterre VAG Unconstrained EM Fixed Income Fund	USD	6,794,154	5,449,624		
Finisterre Emerging Markets Debt Euro Income Fund	EUR	1,002,303	932,673		

The Investment Adviser considers a 4% movement to be reasonable.

### **Currency Risk**

The Funds may hold assets denominated in currencies other than the functional currency of a Fund. They are therefore exposed to currency risk, as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. A Fund may utilise financial instruments to hedge against fluctuations in the relative values of their portfolio positions.

The Investment Adviser/Sub-Investment Adviser(s) monitors the currency positions on a daily basis utilising quantitative and fundamental models.

The U.S. Blue Chip Equity Fund is not subject to foreign currency exposure.

### **Currency Sensitivity Analysis**

The following table details the approximate increase or decrease in Net Assets Attributable to Redeemable Participating Unitholders had the exchange rate between the base currency of the relevant Fund and the relevant foreign currency increased by 5% (or 10% for emerging market currencies) for the monetary assets and non-monetary assets. For forward foreign currency exchange contracts the 5% (or 10% for emerging market currencies) has been applied to the contract price. The Investment Adviser/Sub-Investment Adviser(s) considers this movement to be reasonable.

Emerging market countries are those that have low or middle per capita income as determined by the World Bank for at least two consecutive years based on data lagging one year, or those countries that either had restructured external/local debt during the past 10 years or currently have restructured external/local debt outstanding. Investments denominated in emerging market currencies may experience more volatility, can be subject to significant depreciation and may not be freely convertible.

for the year ended 30 September 2023 (continued)

### **Depositary Risk**

The Trust's Depositary is The Bank of New York Mellon SA/NV, Dublin Branch ("the Depositary"). Substantially all of the Cash at Bank and investments in debt securities of the Trust are held by the Depositary. The Trust is exposed to credit risk through the use of the Depositary for their cash and investments. Bankruptcy or insolvency of the Depositary may cause the Trust's rights with respect to its cash and investments in debt securities held by the Depositary to be delayed or limited. The maximum exposure to this risk at 30 September 2023 and 30 September 2022 is the amount of Cash at Bank disclosed in Note 4 and the investments in securities (debt instruments, equities, bonds, CIS registered in the name of the Depositary on behalf of the Trust) and liquidity instruments disclosed in the relevant Funds' Portfolio of Investments.

To mitigate the risks the Trust is exposed to from the use of the Counterparty, the Manager employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Trust. The Trust only transacts with Counterparty's that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit-rating agencies. In addition, the Trust's non-cash assets are maintained by the Depositary in segregated accounts. Thus in the event of insolvency or bankruptcy of the Depositary the Trust's non-cash assets are segregated and protected and this further reduces counterparty risk. The Trust will, however, be exposed to the credit risk of the Depositary or counterparty/Sub-Custodian used by the Depositary, in relation to the Trust's Cash at Bank held by the Depositary. In the event of the insolvency or bankruptcy of the Depositary, the Trust will be treated as a general creditor of the Depositary in relation to cash holdings of the Trust. The Depositary credit rating as at 30 September 2023 is AA-(2022: AA-) as per the Standard & Poor's bond rating services.

<sup>&</sup>lt;sup>2</sup>Global Equity Fund name changed to Global Responsible Equity Fund on 16 December 2021.

<sup>&</sup>lt;sup>7</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

# PRINCIPAL GLOBAL INVESTORS FUNDS NOTES TO THE ANNUAL REPORT AND FINANCIAL STATEMENTS for the year ended 30 September 2023 (continued)

### 11. FINANCIAL RISK MANAGEMENT (continued)

### **Credit Risk**

The Funds will be exposed to credit risk, which is the risk that a counterparty or issuer will be unable to pay amounts in full when due. Impairment provisions are provided for losses that have been incurred by the Statement of Financial Position date, if any. The carrying amount of financial assets best represents its maximum exposure to credit risk at the reporting date. The Funds' main credit risk concentrations arise from trading equity and debt securities and FDIs in addition to the Cash at Bank balances held at the Depositary, Trustee and other counterparties. The Funds' prospectus lists various investment restrictions with regard to issuer and counterparty concentration limits.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligation.

The Funds that engage in swaps trading bilaterally restrict their exposure to credit losses on the trading of derivative instruments held by entering into master netting arrangements with counterparties. Netting arrangements do not result in an offset of Statement of Financial Position assets and liabilities, as transactions are usually disclosed on a gross basis and settled on a net basis. However, the credit risk associated with favourable contracts is reduced by a netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Funds that engage in swaps trading through a CCP restrict their exposure to credit losses on the trading of derivative instruments held by entering into master netting arrangements with the CCP.

The Investment Adviser/Sub-Investment Adviser(s) may utilise over-the-counter and exchange traded derivatives. Derivatives traded on exchanges will usually be supported by daily margin calls and therefore not carry the same degree of counterparty risk.

The Investment Adviser/Sub-Investment Adviser(s) may also use Futures and Options as part of its investment strategy. The Funds' ability to use these strategies may be limited by market conditions, regulatory requirements and tax considerations.

As part of its investing in derivatives the Funds may pledge or receive collateral. This collateral can be pledged or received either in the form of cash and cash equivalents or securities. There is a risk that the value of such collateral may fall below the value of the underlying derivatives. In addition, as the Funds may use Cash Collateral received to make investments, subject to conditions, the Funds may be exposed to the risk associated with such investments, such as failure or default of the issuer of the relevant security.

The prices of all derivative instruments, including Forward Foreign Currency Exchange Contracts, Spot Currency Contracts, Futures, Options, Interest Rate Swaps, Credit Default Swaps and Total Return Swaps are highly volatile. The Fund are also subject to the risk of the failure of any of the exchanges on which the open exchange traded Futures Contracts are traded and backed by the exchange. Margin Cash Receivable/Payable consists primarily of cash receivable/payable from the Trust's clearing broker.

### **Liquidity Risk**

Liquidity risk is the risk that the Funds will experience difficulty in either realising assets or otherwise raising sufficient Funds to satisfy commitments associated with financial instruments. This arises when trading volume, lack of a market maker or legal restrictions impair the Funds' ability to sell particular securities at an advantageous time or price.

The Funds, are exposed to daily cash redemptions by Unitholders. Therefore, the Funds invest the majority of their assets in investments that are traded in an active market and can be readily disposed of; only a limited proportion of the assets are invested in assets not actively traded on a stock exchange. In addition, during extreme or unusual market conditions, as outlined in the prospectus, the Funds may place restrictions on redemptions such as by extending settlement, gating daily redemptions to 10% or suspending redemptions, and also have the ability to borrow in the short term to ensure settlement. The Investment Adviser/Sub-Investment Adviser(s) monitors the Funds' liquidity positions on a daily basis.

As at 30 September 2023 and 30 September 2022, all of the Funds' financial liabilities and all of the Funds' FDIs were due or settled within 1 month of the Statement of Financial Position date with the exception of the overleaf;

for the year ended 30 September 2023 (continued)

### 11. FINANCIAL RISK MANAGEMENT (continued)

### **Liquidity Risk (continued)**

- Audit Fees Payable which will be due or settled within 3 months to 1 year of the Statement of Financial Position date. These fees payable are detailed on each individual Fund's Statement of Financial Position as at 30 September 2023 and as at 30 September 2022.
- Derivatives contracts held by some of the Funds where the maturity dates are detailed in the Portfolios of Investments.

The following table shows the individual percentage holding, of each registered Unitholder, owning greater than 20% of the units of each class of each Fund.

#### **Cybersecurity Risk**

Cybersecurity breaches may occur allowing an unauthorised party to gain access to assets of the Funds, Unitholder data, or proprietary information, or may cause the Trust, the Investment Adviser, the Sub-Investment Adviser(s), the Distributor, the Administrator or the Depositary to suffer data corruption or lose operational functionality.

The Funds may be affected by intentional cybersecurity breaches which include unauthorised access to systems, networks, or devices (such as through "hacking" activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow or otherwise disrupt operations, business processes or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws). A cybersecurity breach could result in the loss or theft of Unitholder data or Funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs. Such incidents could cause the Trust, Manager, the Investment Adviser, the Sub-Investment Adviser(s), the Distributor, the Administrator, the Depositary or other service providers to incur regulatory penalties, reputational damage, additional compliance costs or financial loss. Consequently, Unitholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which a Fund invests and thereby cause a Fund's investments to lose value, as a result of which investors, including the relevant Fund and its Unitholders, could potentially lose all or a portion of their investment with that issuer.

<sup>&</sup>lt;sup>2</sup>Global Equity Fund name changed to Global Responsible Equity Fund on 16 December 2021.

<sup>&</sup>lt;sup>3</sup>Post Global Limited Term High Yield Fund name changed to Post Short Duration High Yield Fund on 1 March 2022.

<sup>&</sup>lt;sup>4</sup>European Equity Fund name changed to European Responsible Equity Fund on 23 June 2022.

<sup>&</sup>lt;sup>5</sup>Global Diversified Income Fund terminated on 29 September 2022.

<sup>&</sup>lt;sup>6</sup>China Opportunities Equity Fund terminated on 11 April 2023.

<sup>&</sup>lt;sup>7</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

<sup>&</sup>lt;sup>1</sup>Global Sustainable Listed Infrastructure Fund launched on 15 November 2021.

#### 13. GLOBAL EXPOSURE

The Investment Adviser/Sub-Investment Adviser(s) employ a documented Risk Management Process in relation to the use of FDIs, which ensures the risk associated with the positions is measured, monitored and managed. In respect of the Finisterre Unconstrained Emerging Markets Fixed Income Fund; Finisterre Unconstrained VAG Unconstrained EM Fixed Income Fund and Finisterre Emerrging Markets Debt Euro Income Fund; an Absolute VaR Approach, based on a confidence level of 99% for a daily horizon and considering at least two years of historical data is used to manage risk (Refer to Note 11 for more details on VaR). In relation to the remaining Funds, the Commitment approach is used; which entails monitoring global exposure and counterparty exposure associated with the positions.

<sup>&</sup>lt;sup>2</sup>China Opportunities Equity Fund terminated on 11 April 2023.

<sup>&</sup>lt;sup>3</sup>CCB Principal China New Energy Innovation Fund launched on 17 May 2023.

# PRINCIPAL GLOBAL INVESTORS FUNDS UCITS V Remuneration Policy (Unaudited) for the year ended 30 September 2023

#### **UCITS V Remuneration Policy (Unaudited)**

#### Regulation 89(3A) of the UCITS Regulations: UCITS V Remuneration Requirements;

Regulation 89(3A) of the UCITS Regulations (as introduced pursuant to the UCITS V Regulations on 21 March 2016) requires that the annual report of Principal Global Investors Funds (the "Trust") contains certain disclosures on remuneration paid by the manager to its staff during the year and details of any material changes to the managers remuneration policy made during the year. In this regard, the following points are to be noted:

- The Manager has prepared a remuneration policy outlining how it adheres to the remuneration requirements set out the UCITS Regulations. This policy was adopted with effect from 18 March 2016.
- An annual review was undertaken of the remuneration policy during the financial year and no material changes were made to the remuneration policy.
- The Manager has no employees or staff that it employs and pays directly. The Manager has a Board of Directors, four of whom are employees of the Principal Group and receive no remuneration from the Manager. The remaining four directors, each of whom is independent, receive a fixed fee only (for the year ended 30 September 2023; €133,483 (in aggregate) and do not receive variable remuneration. These fees are set at a level that reflects the scope and complexity of its activities.

The Manager delegates certain portfolio management activities for the Trust to Principal Global Investors LLC, (the "Delegate") and to Principal Global Investors (Europe) Limited, Principal Global Investors (Australia) Limited, Spectrum Asset Management, Principal Real Estate Investors LLC, Principal Global Investors (Singapore) Limited, Post Advisory Group LLC, Origin Asset Management LLP, CCB Principal Asset Management (Hong Kong) Co., Limited, (the – "sub-Delegates")

The Delegate has calculated that, in aggregate, it pays its relevant staff\*\* the following in relation to the functions it performs in respect of the Trust:

An aggregate amount of \$5,339,741 including no received performance fees. This amount is applied across 37 members of staff at the Delegate and sub-delegates and is apportioned as approximately \$875,945 in aggregate fixed remuneration and \$4,463,796 in aggregate variable remuneration.

In accordance with applicable European regulation and guidance, these figures are calculated on the basis of fee income received by the Delegate in relation to the Trust and how this correlates with the relevant staff's remuneration. Further, these figures relate only to the proportion of the relevant staff's remuneration that is estimated to be attributed, on a pro rata basis, to the functions such staff perform for the Delegate in relation to the Trust.

#### **Taxonomy Regulation Disclosures (Unaudited)**

As outlined in the Addendum to the Prospectus dated 1 December 2022, the Taxonomy Regulation seeks to establish a framework to classify environmentally sustainable economic activities (otherwise known as Taxonomy-aligned activities), whilst also amending certain disclosure requirements of SFDR. It sets out harmonised criteria for determining whether an economic activity qualifies as environmentally sustainable and outlines a range of disclosure obligations to enhance transparency and to provide for an objective comparison of financial products regarding the proportion of their investments that contribute to environmentally sustainable economic activities.

The Taxonomy Regulation also builds on the SFDR requirements for Sustainable Investment Funds and ESG-Oriented Funds by placing additional disclosure obligations on such Funds that invest in economic activities that contribute to one or more of the environmental objectives as set out in the Taxonomy Regulation. The Taxonomy Regulation requires the Manager to disclose (i) how and to what extent it has used the Taxonomy Regulation to determine the sustainability of these Funds' underlying investments; and (ii) to what environmental objective(s) the underlying investments contribute.

For the purpose of the Taxonomy Regulation, the investments underlying all Mainstream Funds do not take into account the EU criteria for environmentally sustainable economic activities. ESG Orientated Funds and Sustainable Investment Funds do not commit to any minimum level of Taxonomy alignment in its underlying investments; as such, 0% of the Net Asset Value of the Fund shall be invested in such investments.

#### Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

The Manager has categorised the following Funds as Article 9 Funds under the Sustainable Finance Disclosure Regulation:

Global Sustainable Listed Infrastructure Fund

The Manager has categorised the following Funds as Article 8 Funds under the Sustainable Finance Disclosure Regulation:

- Global Responsible Equity Fund
- European Responsible Equity Fund
- · Preferred Securities Fund
- · Global High Yield Fund
- Global Property Securities Fund
- Post Short Duration High Yield Fund
- · Origin Global Emerging Markets Fund
- Finisterre Unconstrained Emerging Markets Fixed Income Fund
- Asian High Yield Fund
- Finisterre VAG Unconstrained EM Fixed Income Fund
- Finisterre Emerging Markets Debt Euro Income Fund
- CCB Principal China New Energy Innovation Fund

The Manager has categorised the following Funds as Article 6 Funds under the Sustainable Finance Disclosure Regulation:

- Origin Global Smaller Companies Fund
- U.S. Blue Chip Equity Fund

The periodic disclosure for financial products referred to in Article 8 and Article 9 for the Funds of Principal Global Investors Funds is disclosed overleaf.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF Global Listed Infrastruture Fund Legal entity identifier: 54930054KRZC975QXB12

### Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: \_\_\_% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: 96.44 %

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is

Sustainable

a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund was met. The Fund achieved positive, measurable social impact by investing in infrastructure companies that contribute to the United Nations Sustainable Development Goals ("SDGs").

The sustainable investments contributed to the sustainable investment objective by achieving alignment with at least one of 6 Focus Sustainable Development Goals (the "Focus SDGs"), not causing significant harm to any sustainable investment objective, meeting minimum safeguards and employing good governance practices. SDG alignment was evidenced through the Sub-Investment Manager's proprietary

# Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### Sustainable Finance Regulation Disclosure (Unaudited)

framework, which relied upon fundamental research and engagement with investee companies to demonstrate business activity alignment and/or evidence of excellence in a company's sustainability-related policies and practices.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

#### How did the sustainability indicators perform?

Our proprietary mapping framework evaluates the contributions of a company's business activities, policies and operational practices, and ensures a company's contributions to social progress are in line with our expectations for the sustainable contributions of an infrastructure company operating in the relevant subsector and country. Before recommending a security for investment, we evaluated and documented a company's alignment with the SDGs. Given our explicit infrastructure sector focus, we previously identified 6 of the SDGs to which sustainable infrastructure companies are most likely to contribute, as well as the individual targets and indicators that are most applicable to each company and which vary depending on subsector and/or country of operation. Contributions must have been measurable and disclosed at the time of investment, or we must have been able to identify a clear path for future measurability and disclosure through our engagement activities.

The table that follows summarizes the aggregate SDG alignment of our portfolio over the reference period.

Sustainability Indicators (Focus SDGs)	As of 09/30/22 % of Portfolio Aligned to Focus SDGs	As of 12/31/22 % of Portfolio Aligned to Focus SDGs	As of 03/31/23 % of Portfolio Aligned to Focus SDGs	As of 06/30/23 % of Portfolio Aligned to Focus SDGs	As of 09/30/23 % of Portfolio Aligned to Focus SDGs
SDG 6 - Clean Water & Sanitation	40%	34%	35%	35%	36%
SDG 7 – Affordable & Clean Energy	83%	82%	83%	82%	84%
SDG 8 – Decent Work & Economic Growth	98%	99%	99%	99%	98%
SDG 9 – Industry, Innovation & Infrastructure	100%	100%	98%	98%	100%
SDG 11 – Sustainable Cities & Communities	86%	85%	88%	88%	86%
SDG 13 – Climate Action	65%	64%	73%	73%	74%

During the reference period, we note increasing alignment to SDG 13. This reflects several factors including a continued industry trend towards increasingly rigorous carbon emissions reduction targets. It also reflects reductions in our portfolio's weighting towards Energy Infrastructure over the period. We also note decreasing alignment to SDG 6 over the period, which reflects a lower weighting to water

utilities globally as select portfolio holdings reached our estimates of instrinsic value and we reduced exposure accordingly. It does not reflect any material changes in the sustainable contributions or practices of our holdings.

#### ...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

# How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Sub-Investment Manager assessed all sustainable investments to ensure they did not cause harm to any sustainable investment objective, including via the following:

#### Assessment of miaslignment to the SDGs

The Sub-Investment Manager's proprietary SDG alignment framework includes an assessment of misalignment to the SDGs, which considers the presence of business acitvities, policies and operational practices which offset any positive contirbution an investee company is deemed to be making. During the period covered by this report, no investee company was deemed misaligned to the SDGs overall. Three portfolio holdings were deemed misaligned to specific SDGs, and in all such cases the Sub-Investment Manager deemed identified misalignment to be more than offset by positive contributions to the remaining SDGs.

#### Assessment of principal adverse indicators (PAI) on sustainability factors

The Sub-Investment Manager examined how sustainable investments performed, and/or contributed to the Fund's performance, against mandatory indicators PAI 1-14 in Table 1 of Annex I and the optional indicators PAI 4 in Table 2 and PAI 1 and 15 in Table 3.

Please refer to the PAI section below for details.

#### Assessment of involvement in fossil fuel activities

The Sub-Investment Manager assessed the potential harm related to involvement in fossil fuel activities as described in the Fund supplement.

During the reporting period, the Fund invested selectively in companies or issuers involved in the distribution, transportation, or storage of fossil fuels, provided that the company:

(a) Had made clear commitments to reduce the carbon emissions associated with its own operations, and has demonstrated a track record of improvement with respect to emissions-related SDG indicators including reducing carbon intensity of operations, reducing methane intensity of operations, and increasing renewable energy consumption, among others;

# social and employee matters, respect for human rights, anticorruption and antibribery matters.

sustainability factors

Principal adverse impacts are the

most significant negative impacts of

investment decisions on

relating to

environmental,

- (b) Was investing in future technologies to support the transport and storage of low and zero carbon gasses including biofuels and hydrogen;
- (c) Was in good standing with the regulatory bodies and other key stakeholders that authorize its operations; and,
- (d) Was involved in initiatives to support the decarbonization efforts of its customers.

The Fund also invested selectively in companies or issuers involved in thermal coal generation, when the following conditions were met:

- (a) The company was in good standing with the regulatory bodies and other key stakeholders that authorize its operations; and,
- (b) The company has a transition strategy that seeks to align with global warming of maximum 2°C; and,
- (c) The company was not investing in new coal generation.

#### Fund exclusions

The Fund's application of its exclusion policies also served to ensure investments did not cause significant harm to any sustainable investment objective. Specifically, the Fund excluded or restricted investment in companies or issuers from the following categories:

- Conduct based: Involved in extreme ESG breaches with no adequate remediation efforts.
- Thermal coal: Involved in the mining of thermal coal as a principal business or that derive more than 10% of their revenues from the mining of thermal coal.
- Oil: Involved in the production or extraction of oil as a principal business or that derive more than 10% of their revenues from the production of oil.
- Fossil-based Natural Gas: Involved in the production or extraction of fossil-based natural gas as a principal business or that derive more than 10% of their revenues from the production of fossil-based natural gas.

Further information on the Fund exclusions can be found in the Fund Supplement.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Prior to making an investment, the Sub-Investment Manager examined how all prospective portfolio holdings performed, and/or were expected to contribute to the Fund's performance against indicators 1-14 in Table 1 of Annex I and select indicators in Tables 2 and 3 of Annex 1 based on most recently available data. Many of these indicators were also considered as part of the Sub-Investment Manager's proprietary ESG rating and SDG alignment research. For example, the expected trajectory of a company's carbon emissions reduction efforts and exposure to renewable energy consumption and production

informs the Environmental component of its ESG rating as well as a key determinant in evaluating a company's alignment to SDGs 7, 9 and 13.

With respect to the mandatory indicators in Table 1 of Annex I and where data is available, the Sub-Investment Manager aims to demonstrate improvement of its Fund against indicators 1a-6, 11, 12 and 13 over time, and as such these indicators were reviewed at regular intervals or when newly reported information becomes available. They also correspond with two of the Sub-Investment Manager's engagement priorities, and as such were topics addressed in engagements with 26 portfolio companies during the reference period. The Fund's proxy voting record during the period also included a vote against the board of one portfolio company for lack of gender diversity. See our response on actions that have been taken to attain the sustainable investment objective for more details on engagement and proxy voting.

Indicators 10 and 14 comprise components of the Sub-Investment Manager's assessment of significant harm and accordingly the Fund will refrain from investing in any company or issuer that breaches the standards contemplated by these indicators in the absence of adequate remediation.

Where an investment had deficiencies in its disclosures, this also informed the Sub-Investment Manager's engagement with that company's management team.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Sub-Investment Manager relied on engagement with potential investee companies and its own fundamental research supplemented with the research of third-party providers to determine that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

See indicators 10 and 11 in the PAI section below for portfolio exposure to companies with Violations of the UN Global Compact principles and/or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises according to third-party data.

# How did this financial product consider principal adverse impacts on sustainability factors?

Prior to making an investment, the Sub-Investment Manager examined how all prospective portfolio holdings performed, and/or were expected to contribute to the Fund's performance against indicators 1-14 in Table 1 of Annex I and select indicators in Tables 2 and 3 of Annex 1 based on most recently available data. For sustainable investments this examination included ensuring that the investments do no significant harm to any environmental or social objective.

The publication of the below statement on principal adverse impacts on sustainability factors corresponds to the reference period of 1 October 2022 to 30 September 2023. The reporting year ending 30 September 2024 will be the first year reflecting a comparison to a previous year.

Mandatory adverse indicators	sustainability	Metric	Unit	Fiscal year end 30 Sept 2023	Portfolio coverage (Source)

# Actions taken during the period, and actions planned, and targets set for the next reference period

Our investment approach prioritizes investment in companies with strong forward-looking commitments to—and tangible action plans supporting—carbon emissions reduction, which allows us to maintain a high degree of confidence in the long-term emissions reduction potential of our portfolio. We assess the credibility of a company's emissions targets through our fundamental research and engagement efforts, and aim only to invest in companies involves in high intensity sectors or active in the fossil fuel sector that also have quantitative emissions reduction targets.

The listed infrastructure investable universe remains highly carbon intensive compared to most major stock market indices. An infrastructure company's carbon emissions and involvement in fossil fuel activities reflects as much on the current state of our society as on the company itself as most listed infrastructure companies operate as regulated monopolies or oligopolies. Progress towards environmental and social goals typically stems from ongoing collaboration with regulators and users of the infrastructure. Ultimately, an infrastructure company must pursue environmental progress while continuing to deliver on its social obligation to serve.

As part of our portfolio construction process, we also assess the carbon emissions reduction pathway of the portfolio relative to IPCC scenarios likely to achieve 1.5 degree Celsius warming. For each portfolio holding, we project an absolute carbon emissions reduction pathway through 2050. This analysis is based on a company's formal emissions reduction targets, including our own assessment of the robustness of management planning that is supporting the targets and analysis of the company's track record in meeting prior targets. We then aggregate the expected pathways of each portfolio holding into a portfolio level pathway. Broadly, we expect our portfolios to demonstrate emissions reduction potential between now and 2030 that is aligned with IPCC scenarios likely to achieve 1.5 degree Celsius warming. When it comes to carbon emissions reductions beyond 2030, we aim to support companies in their efforts to align with a credible pathway to net zero through our

engagement activities. We capture the potential of our engagement efforts by also projecting a high case emissions reduction pathway for our portfolio.

Our carbon emissions projections and related processes currently focus on Scope 1 & 2 emissions as we believe these are currently the most actionable and able to be influenced by our portfolio companies, though we are monitoring the available data, disclosures and management target setting progress.

We address biodiversity issues through engagement for companies and sectors where such impacts are material. Controversies related to biodiversity are considered as part of the Environmental score we assign to each portfolio company. Through our proxy voting, we also support reasonable shareholder resolutions asking for increased disclosures on biodiversity risk management.

Data availability for hazardous waste and emissions to water remains limited across the third party data providers we rely on. Environmental controversies, including with respect to emissions to water, are actively monitored by our investment team and such controversies are considered as part of the ESG scores we assign to each portfolio company.

We exclude from investment companies or issuers involved in extreme ESG breaches with no adequate remediation efforts, including those breaches involving violations of the UNGC principles or OECD guidelines for Multinational Enterprises. Companies identified by our third party data sources for having been involved in such breaches become the target of enhanced engagement efforts, whereby we seek to identify if appropriate mitigation is in place. Such mitigation may include management changes, board changes, and the adoption of new and robust policies and procedures that we deem sufficient to prevent an extreme breach in the future.

We assess board diversity, including gender diversity, as part of our fundamental research process and our assessment of a company's board diversity is reflected in the Governance score we assign to a particular company. Workforce diversity remains one of our four engagement priorities which includes elements related to gender diversity. During our engagement efforts in 2023, we have specifically communicated to our portfolio companies our expectations that females comprise at least 30 percent of the board, or that the board complies with best practices or legal requirements where such practices or requirements are more stringent. In any market, proxy voting policies generally entail voting against a board if there is no gender diversity. During the period, the Fund's proxy voting record included a vote against the board of one portfolio company for lack of gender diversity.

We evaluate the presence of workplace accident prevention and anti-corruption and antibribery policies as part of our research to assign a Social and Governance rating to each portfolio company. Companies must meet minimum Social and Governance standards in order to be included in the portfolio.

Companies with exposure to controversial weapons do not feature as part of the Fund's investible universe.

#### What were the top investments of this financial product?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

rules.

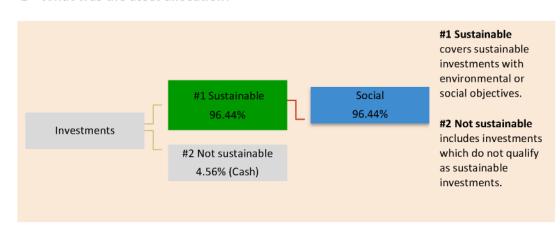

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

# 3

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

Per the binding criteria in the SFDR supplement, all equity holdings contributed positively to at least of the 6 focus SDGs, no portfolio holdings were deemed to be misaligned with the 17 SDGs overall and exclusions mentioned within the supplement have been abided by.

The 4.56% investments identified as not sustainable comprised cash and cash equivalents.

At all points during the period the Fund comprised at least 90% Sustainable investments with a social objective per the precontractual disclosures.

#### In which economic sectors were the investments made?

Sector	Average Weight
[Cash]	4.56
Utilities	48.68
Transportation Infrastructure	24.42
Energy Infrastructure	11.44
Communications Infrastructure	10.90
Total	100.00

Sub sector – Energy Infrastructure	Average Weight
Oil & Gas Storage & Transportation	10.56
Renewable Energy	0.88
Total	11.44

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst there was no commitment to Taxonomy aligned investments with an environmental objective, the Fund has calculated the Taxonomy alignment using third party data. As a result, Taxonomy aligned investments have been deemed to constitute 6.60% of the Fund's portfolio when measured by turnover and 8.13% of the Fund's portfolio when measured by capital expenditure.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

X	Yes:			
	X	In fossil gas	X	In nuclear energy
	No			

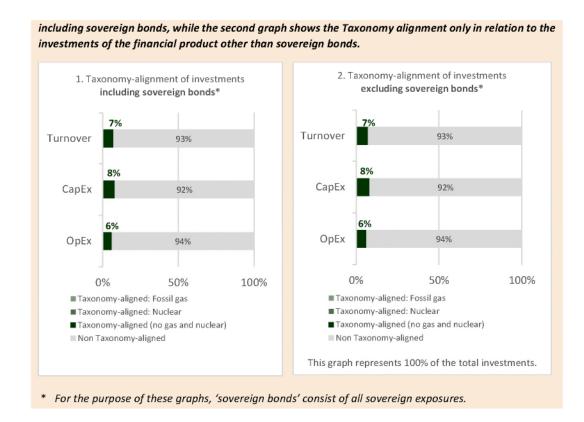

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital
  expenditure
  (CapEx) showing
  the green
  investments
  made by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Whilst there was no commitment to Taxonomy aligned investments with an environmental objective, the Fund has calculated the Taxonomy alignment using third party data.

#### What was the share of investments made in transitional and enabling activities?

Whilst there was no committment to invest in transitional and enabling activities as defined by the EU taxonomy, the Fund has calculated the share of investments made in transitional and enabling activities using third party data. As a result, investments made in transitional and enabling activities has been deemed to constitute 3.42% of the Fund's portfolio when measured by turnover and 3.24% of the Fund's portfolio when measured by capital expenditure.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first periodic report of the Fund, and there was no commitment to Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0%; Not applicable as there was no commitment to Taxonomy aligned investments.

What was the share of socially sustainable investments?

100%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "not sustainable" were cash and cash equivalents.

Cash and cash equivalents do not affect the sustainble investment objective of the Fund and are not subject to environmental and/or social screening or any minimum environmental or social safeguards.

The assessment of issuers and counterparties for cash and cash equivalents focussed on the creditworthiness of these parties, which can be impacted by sustainability risks.

# What actions have been taken to attain the sustainable investment objective during the reference period?

Actions taken by the Sub-Investment Manager during the period to attain the sustainable investment objective included:

#### SDG alignment research

During the fundamental research stage of its investment process, the Sub-Investment Manager sought to identify alignment between the social and environmental contributions of each potential investment and one or more of the SDGs.

Given its explicit infrastructure sector focus, the Sub-Investment has identified 6 of the SDGs (the "Focus SDGs") to which Sustainable Infrastructure Companies are most likely to contribute, as well as the individual targets and indicators that are most applicable to each type of company and which vary depending on subsector and/or country of operation. Expected contributions were measurable and disclosed at the time of investment.

The Sub-Investment Manager's SDG alignment research also specifically considered a company's track record of improvement with respect to reducing the carbon intensity of operations, increasing renewable energy consumption, decreasing energy consumption intensity, among other indicators, all of which serves to reinforce that any individual holding is not causing significant harm to the sustainable investment objective of the Fund. Companies included in the Fund's portfolio were expected to show a positive trend in reported figures across these metrics based on like-for-like scope of operations over a 3-5 year period.

<u>Assessing good governance practices of investee companies and ensuring minimum safegaurds are met</u>

To ensure good governance, the Sub-Investment Manager relied on its in-depth fundamental research, including review of company's governance-related disclosures and filings and engagement with senior executives from investee companies. Its views on an investee company's governance practices were also supplemented with third party specialist research and data, including with respect to the PAIs. Following the Sub-Investment Manager's fundamental research, it assigned a proprietary governance rating to each portfolio company.

Similarly, the Sub-Investment Manager reviewed its Environmental and Social ratings for portfolio companies held prior to the start of the reference period, and established new ratings for new additions to the portfolio. This ratings process seeks to ensure minimum environmental and social safeguards are met by each portfolio company.

#### **Engagement**

The Sub-Investment Manager conducted 26 engagements focused on sustainability considerations over the reference period, covering 75% of the average number of portfolio companies held over the period. In many cases, these engagements comprised targeted outreach to the individuals at each portfolio company responsible for executive oversight of sustainability initiatives, e.g. individuals with a Chief Sustainability Officer title or similar.

The Sub-Investment Manager's engagement efforts over the period 2022-2024 are emphasizing the following topics:

- Management compensation alignment to sustainability initiatives, including asking issuers to add and/or increase relevance of ESG and sustainability metrics to incentive programs, in particular long-term incentive programs.
- 2. Credibility of emissions reductions targets, including advocating for issuers to provide concrete plans in support of emissions reduction targets, encouraging third party validation of targets where appropriate, and encouraging acceleration of targets where possible. Particularly for those issuers for whom Scope 3 emissions are material, we encourage Scope 3 emissions disclosures and/or Scope 3 emissions target setting.
- Workforce diversity, including asking issuers to disclose workforce breakdowns
  as relevant in their local markets. We also encouraged the publication of related
  targets. For companies that are clear laggards in terms of board diversity, we
  will advocated for improvement.
- 4. Improving market perception of underappreciate issuers, which includes asking portfolio companioes to engage proactively with third-party ratings providers with the aim of clearing misconceptions around an issuer's sustainability credentials, in particular for emerging market and small-cap companies.

Select engagement related outcomes during the period include:

 Several portfolio companies announced material material new commitments or targets related to carbon emissions reduction, including the acceleration of existing targets.

- Several of our portfolio companies received third party recognition for the credibility of their emissions reduction efforts, including one portfolio company that was recognized as the first and only company to fully align its corporate disclosures with the Climate Action 100+ Net Zero Company Benchmark.
- Several companies expressed intention to discuss the topic of management alignment with their boards, and one company increased the weighting of ESG metrics in management and employee bonuses from 20% to 30%.
- Multiple engagements with a third-party ratings provider led to the quantitative increase in ESG scores assigned to two portfolio companies.
- We confirmed with two Chinese portfolio companies that they expect to meet the Hong Kong listing requirement of adding a woman their boards by year end 2024. One of these companies added a woman to their board during the period.

#### Proxy voting

The Fund has adopted proxy voting policies that are consistent with the Fund's sustainable investment objective. These guidelines support standardized reporting on ESG issues, request information regarding an issuer's adoption of, or adherence to, relevant norms, standards, codes of conduct or universally recognized international initiatives including affirmative support for related shareholder resolutions advocating enhanced disclosure and transparency. The guidelines also generally recommend votes against directors due to failure to manage ESG and sustainability risks, including climate change.

#### Voting record for the reference period ending 30 September 2023

Category	Number
Votable meetings	39
Meetings voted	38
Meetings with against management votes	15

Select against management votes during the period included a vote against the nominating committee chair for lack of board gender diversity, votes against director nominees for concerns regarding oversight of climate-related risks, various votes against management on issues related to executive compensation and equity issuances, and votes in favor of climate action plans at two portfolio companies.

#### Data enhancements

During the reference period, the Sub-Investment Manager incorporated additional third-party ESG and sustainability data from ISS into its investment process. In particular, this allows for enhanced data coverage of the mandatory principle adverse indicators on sustainability factors.

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable. There was no specific index designated as a reference benchmark to meet the sustainable investment objective.

How did the reference benchmark differ from a broad market index?

Not applicable. There was no specific index designated as a reference benchmark to meet the sustainable investment objective.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable. There was no specific index designated as a reference benchmark to meet the sustainable investment objective.

How did this financial product perform compared with the reference benchmark?

Not applicable. There was no specific index designated as a reference benchmark to meet the sustainable investment objective.

How did this financial product perform compared with the broad market index?

Not applicable. There was no specific index designated as a reference benchmark to meet the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF Global Responsible Equity Fund Legal entity identifier: 549300VJEKNWV9BBR441

#### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: \_\_\_%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are company contribution towards the United Nations Sustainable Development Goals and environmental stewardship. The social characteristics considered by the Fund are public health, health and safety and workforce and community management.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

| Characteristic  | Indicator  | As of  
|---|--|--------|--------|--------|--------|-------|
|   |  | 09/30/ | 12/31/ | 03/31/ | 06/30/ | 09/30 |
|   |  | 22     | 22     | 23     | 23     | /23   |
| Environmental   | % of holdings committed  | 61%    | 77%    | 81%    | 79%    | 72%   |
| Stewardship   | to setting a net zero<br>emission target   |        |        |        |        |       |

Where "% Assets" above is the average of quarterly weights.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 89.5% and above the planned level of 85%. The percentage of alignment figure was above 85% throughout the reporting period.
- The aggregate carbon risk score of the fund as of 09/30/2023 was 81.64 vs the benchmark MSCI AC World NTR of 135.06. The carbon risk score was, as per the binding criteria of the fund, over 20% below (and therefore over 20% better than) the index for the entirety of the reporting period.
- The percentage of portfolio holdings that contributes to at least one of the seven focus SDGs was above the binding criteria level of 40% was throughout the period.
- The exclusion criteria of the Fund specified below, was adhered to during the period.
  - excludes thermal coal producers from the Fund's holdings as defined by GICS Industry Sector classification.

#### Asset allocation

describes the share of investments in specific assets.

- excludes companies with involvement in controversial weapons as defined by the ISS Controversial Weapons Research methodology
- excludes companies where their revenue is significantly derived from involvement in producing tobacco, as defined by the GICS Industry Sector classification.
- excludes companies where their revenue is significantly derived from involvement in the gambling sector, as defined by the GICS Industry Sector classification.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#### In which economic sectors were the investments made?

Information Technology	25.18%
Health Care	18.89%
Consumer Discretionary	4.23%
Financials	16.35%
Consumer Staples	7.19%
Industrials	13.96%
Communication Services	4.24%

#### Sustainable Finance Regulation Disclosure (Unaudited)

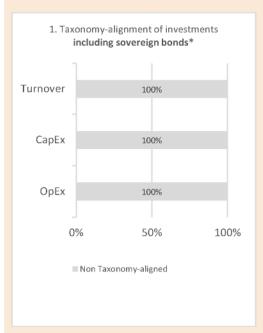

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

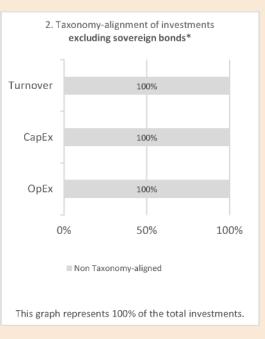

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not Applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 10.4% shown under "other" included cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental and/or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

Holdings not aligned with the environmental and/or social characteristics promoted by the Fund were Equinor ASA, 3i Group, Morgan Stanley, Beazley Plc, and Schlumberger N.V, which accounted for 8.50% in aggregate for this category.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For each holding, the sub-investment manager assesses the sustainability culture and risks and engage with management to encourage and facilitate further progress.

- Sustainability Risk Level Analysts assign each holding with a sustainability risk level of either low, medium, or high. In arriving at this designation, the company's relationships with each of its stakeholders is evaluated shareholders, customers, employees, suppliers and their supply chains, their communities, and the environment and identify those key risks that could undermine the company's existence and the positive change the sub investment manager is seeking. Analysts collaborate across teams with their industry colleagues to identify best practices and identify emerging issues of concern. The sub-investment manager partner's with third-party data providers to help provide consistent data across the investment universe.
- Sustainability Risk Trend Analysts also assign each holding with a
  sustainability risk trend of either improving, stable or deteriorating. This risk
  trend designation provides important context to the risk level and informs the
  tolerance for that risk. Consistent with the investment philosophy the subinvestment manager has a strong preference for positive change. The subinvestment manager finds that improving trends in sustainability risk can also
  be an important source of alpha for clients.
- Engagement Analysts meet with senior executives of holdings to discuss a
  range of topics relevant to the investment theses. From the assessment of
  sustainability risk level and trend the sub-investment manager incorporates
  discussion on the ESG issues of greatest importance. From management, the
  sub-investment manager both looks for and asks for actions and plans that fit a
  SMART framework: Specific, Measurable, Attainable, Relevant and Timebounded. Following engagement with management, the sub-investment
  manager then re-assess sustainability risks a circular process that continues.

To supplement the sub-investment managers independent assessments, they have integrated third party analytics in the process and monitoring tools at the company specific level and portfolio level. This equips analysts and portfolio managers with company specific Sustainability scores, but more importantly with trends in the scores and underlying measures over time, as well as notification of potential controversies and other notable Sustainable risk considerations including Environmental, Social and Governance.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF European Responsible Equity Fund Legal entity identifier: 549300HJK2U4RWTQJ644

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: \_\_\_%

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are company contribution towards the United Nations Sustainable Development Goals and environmental stewardship. The social characteristics considered by the Fund are public health, health and safety and workforce and community management.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of 09/30/ 22	As of 12/31/ 22	As of 03/31/	As of 06/30/	As of 09/30 /23
Environmental Stewardship	% of holdings committed to setting a net zero emission target	86%	87%	89%	88%	89%
	Science based target initiative	68%	75%	76%	76%	75%
Company contribution towards the United Nations Sustainable Development Goals, and company's practice on public health, health and safety and workforce and community management	Sustainable Development (SDG) Contribution to at least one of the seven focus SDGs (2,3,6,7,8,9, and 12) of the strategy.	87%	87%	88%	88%	87%

#### ...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

Where "% Assets" above is the average of quarterly weights.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

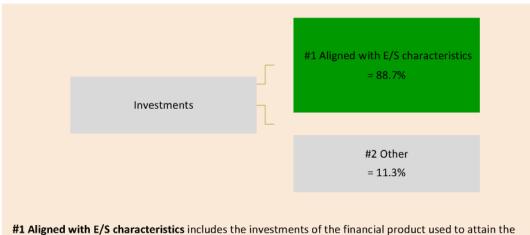

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 88.7% and above the planned level of 85%. The percentage of alignment figure was above 85% throughout the reporting period.
- The aggregate carbon risk score of the fund as of 09/30/2023 was 70.70 vs the benchmark MSCI Europe of 93.33. The carbon risk score was, as per the binding criteria of the fund, over 20% below (and therefore over 20% better than) the index for the entirety of the reporting period.
- The percentage of portfolio holdings that contributes to at least one of the seven focus SDGs was above the binding criteria level of 40% was throughout the period.
- The exclusion criteria of the Fund specified below, was adhered to during the period.

# Asset allocation describes the share of investments in

specific assets.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

- excludes thermal coal producers from the Fund's holdings as defined by GICS Industry Sector classification.
- excludes companies with involvement in controversial weapons as defined by the ISS Controversial Weapons Research methodology
- excludes companies where their revenue is significantly derived from involvement in producing tobacco, as defined by the GICS Industry Sector classification.
- excludes companies where their revenue is significantly derived from involvement in the gambling sector, as defined by the GICS Industry Sector classification.

environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
Χ	No		

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

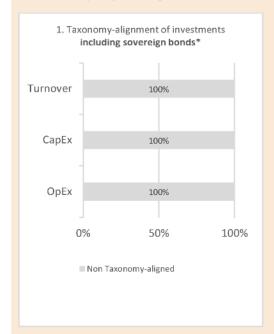

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

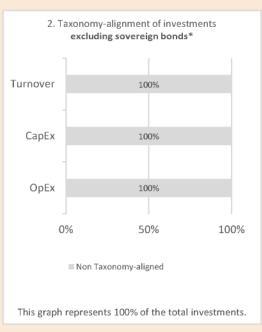

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### Sustainable Finance Regulation Disclosure (Unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Not Applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 11.3% shown under "other" included cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental and/or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

Holdings not aligned with the environmental and/or social characteristics promoted by the Fund were Shell Plc, BP Plc, Rio Tinto, Equinor, and Hannover Rueck which accounted for 7.82% in aggregate for this category.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For each holding, the sub-investment manager assesses the sustainability culture and risks and engage with management to encourage and facilitate further progress.

- Sustainability Risk Level Analysts assign each holding with a sustainability risk level of either low, medium, or high. In arriving at this designation, the company's relationships with each of its stakeholders is evaluated shareholders, customers, employees, suppliers and their supply chains, their communities, and the environment and identify those key risks that could undermine the company's existence and the positive change the sub investment manager is seeking. Analysts collaborate across teams with their industry colleagues to identify best practices and identify emerging issues of concern. The sub-investment manager partner's with third-party data providers to help provide consistent data across the investment universe.
- Sustainability Risk Trend Analysts also assign each holding with a
  sustainability risk trend of either improving, stable or deteriorating. This risk
  trend designation provides important context to the risk level and informs the
  tolerance for that risk. Consistent with the investment philosophy the subinvestment manager has a strong preference for positive change. The subinvestment manager finds that improving trends in sustainability risk can also
  be an important source of alpha for clients.
- Engagement Analysts meet with senior executives of holdings to discuss a range of topics relevant to the investment theses. From the assessment of sustainability risk level and trend the sub-investment manager incorporates discussion on the ESG issues of greatest importance. From management, the sub-investment manager both looks for and asks for actions and plans that fit a SMART framework: Specific, Measurable, Attainable, Relevant and Timebounded. Following engagement with management, the sub-investment manager then re-assess sustainability risks – a circular process that continues.

To supplement the sub-investment managers independent assessments, they have integrated third party analytics in the process and monitoring tools at the company specific level and portfolio level. This equips analysts and portfolio managers with company specific Sustainability scores, but more importantly with trends in the scores and underlying measures over time, as well as notification of potential controversies and other notable Sustainable risk considerations including Environmental, Social and Governance.

Product name: PGIF Preferred Securities Fund Legal entity identifier: 549300QIHU45DUO1RL56

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: \_\_\_% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are greenhouse gas (GHG) emissions reduction and transitioning to renewable sources of power. The social characteristics considered by the Fund are health and safety and product liability.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Utility	7.08%	

• Above table is calculated using the average weight over the period using quarterly values.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

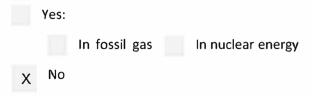

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

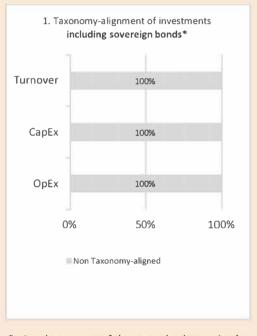

Taxonomy-aligned activities are expressed as a share of:

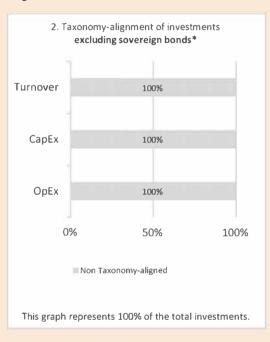

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (Ca pEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?
  Not Applicable

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Reference

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 7.3% included under "other" included cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards. and/or investments that may not be aligned with the environmental and/or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The environmental and social characteristics promoted by the Fund were considered during the period via ongoing credit analysis (i.e. investment process integartion). Specific actions included for example on going review of sustainability disclosures to determine if a company's ESG policies are both comprehensive and effective, on-going scoring of companies as either low, medium or high ESG risk, and engagement.

How did this financial product perform compared with the broad market index?

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF Global High Yield Fund Legal entity identifier: 549300BUDV40JA07H774

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy **Taxonomy** with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** with a social objective: \_\_\_\_% make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are toxic and carbon emissions, environmental opportunities, material sourcing and land use, product waste, water stress, financing environmental impact, and climate change vulnerability. The social characteristics considered by the Fund are health, safety and nutrition, product safety and quality, human capital and community management, privacy and data security, access to healthcare, communications and finance, insuring health and demographic risk and responsible investment.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Taxonomy or not.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of 09/30/22	As of 12/31/22	As of 03/31/12	As of 06/30/23	As of 09/30/23

- Data points above are the average of quarterly values within the period.
- Benchmark: ICE BofA Merrill Lynch Global High Yield USD Hedged Index
- Data source: MSCI
- Metrics and formulas for PAI Indicators above are as per Table 1 of Annex 1 provided by the European Commission.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- o The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and
- Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

#### What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country	
FORD MACTOR COMMEMNY	Automotive	1.82%	United States	
FORD MOTOR COMPANY	- 10.00000	_,,_,	01,110,000	
TENET HEALTHCARE CORP	Healthcare	1.16%	United States	
UPC HOLDING BV	Cable and Satellite	1.00%	Netherlands

AMERICAN AIRLINES GROUP	Airlines	0.91%	<b>United States</b>	
OPEN TEXT CORP	Technology	0.89%	Canada	
CENTENE CORP	Healthcare	0.81%	United States	
CONSOLIDATED ENERGY	Chemicals	0.81%	Luxembourg	
UNITED AIRLINES INC	Airlines	0.79%	United States	
INTERNATIONAL GAME	Gaming	0.78%	United Kingdom	

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Where "% Assets" above is the average of quarterly weights.

#### What was the proportion of sustainability-related investments?

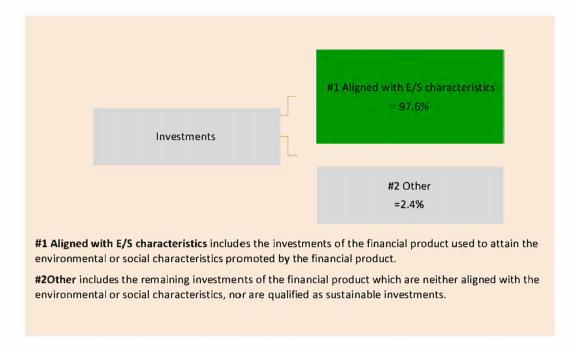

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 97.6% and above the planned level of 80%. The percentage of alignment figure was above 80% throughout the reporting period.
- No portfolio holding owned within the period scored lower than 3 out of 10 on the Fund's proprietary methodology.
- The Fund had similar or better scores than the benchmark (ICE BofA Merrill Lynch Global High Yield USD Hedged Index) for the following metrics
  - o MSCI ESG Quality Score (portfolio value of 5.5 vs benchmark of 5.33).

- o MSCI ESG Rating (portfolio rating of BBB vs benchmark of BBB).
- MSCI Carbon Risk Category (portfolio category of "Moderate" vs benchmark of "High").
- o MSCI Controversies score (portfolio value of 0% vs benchmark of 2.7&).
- The fixed environmental and social exclusion criteria of the Fund was adhered to during the period.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

# Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

	Avg. Wt.	
Energy	11.50%	
Energy - Exploration & Production	5.36%	
Gas-Distribution	4.45%	
Oil Field Equipment & Services	0.92%

Telecommunications	6.40%
Transportation	3.53%
Utility	1.27%

Above table is calculated using the average weight over the period using quarterly values.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:			
		In fossil gas	In nuclear energ	3\
Х	No			

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

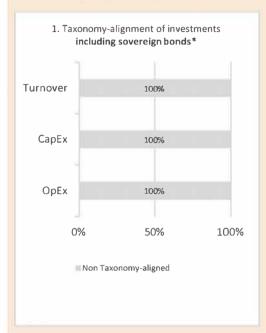

Taxonomy-aligned activities are expressed as a share of:

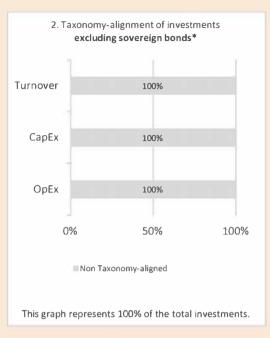

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### Sustainable Finance Regulation Disclosure (Unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Not Applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other of 2.4% of the portfolio included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The ESG quality score of 5.5 continues to be above the benchmark at 5.33 despite going down y/y due to a change in MSCI ESG quality score methodology. This improvement was driven by our proprietary ESG scores that led to a favorable allocation to names with a higher ESG Score. Our Carbon risk also came down substantially from 243 to 195 y/y driven by an increased focus on the high carbon emitters in our portfolio and a reduced allocation to some of those names. We continue to actively engage with issuers on different social, environmental, and governance factors. Some examples include:

- We reduced our position size in high carbon emission names such as Energy Transfer LP, Enlink Midstream LLC, and Western Midstream.
- We increased our position size in lower carbon emission names such as Playtech PLC, AdaptHealth, and Gamehole.
- We increased our position in names that had a higher propietary ESG score such as OpenText Corp.

Some specific examples of our shareholder engagement efforts related to ESG characteristics include the below examples and their respective analyst commentary:

- Acrisure LLC We met with Kent Snyder and Lowell Singer at the BAML Conference. We followed up on their promised ESG initiatives and were encouraged by the response. Kent stated they had an ESG hire starting next week and that ESG remained a priority. They have spent a lot of time on the social component of ESG through a new head of HR. This includes both internal initiatives like their own labor force as well as external drivers such as how they behave in their communities. He noted Acrisure is very involved in the Pittsburg community. Kent noted Acrisure has a lot of work to do in terms of establishing basic corporate governance including a company board, executive compensation, etc. We look forward to more announcements on their sustainability efforts.
- Credit Acceptance Corp Conducted a call with CACC Treasurer to discuss implications of reccent NYAG/CFPB lawsuit against the company. While the news

was not a surprise, the call reinforced our view that the company has excellent defense against the allegations and that liability will be immaterial to the company's credit profile. We remain comfortable that the company maintains best in class underwriting and collection procedures in the subprime lending space.

- International Game Technology Asked about governance in our meeting at JPM with Todd Mcentee and Jim Hurley. Is there a goal to maintain an independent board given the two families control? Yes, 2/3 remains independent after adding a few directors late last year. 1/3 women. There is a lot of focus on making sure skill sets are well aligned. Voting power of families? Economic interest reduced but still have control of the company. The family intends to remain the controlling shareholder and are incredibly supportive. Management runs the business day to day and has a voice at the board. Our overall ESG score is still strong but likely capped until their is a change in governance.
- Griffon Corp We connected with Griffon's CFO to try to get better disclosure around current trends. The company has chosen not to hold earnings calls due to a strategic review that has been ongoing for 3+ quarters. Although the company has provided annual guidance, we believe backlogs are being consumed rapidly and are more cautious around the outlook and the lack of disclosure. After our interaction, the company continues to opt for maintaining disclosure limited to the publication of its 10-Q/10-K and we were unable to get a real-time update. Given the negative impact to governance coupled with our cautioness around fundamentals for the business we decided to reduce our exposure to the company.
- Taseko Mines We followed up with the company on their recent sale of an additional silver stream to Osisko Gold Royalties Ltd. The arrangement includes \$50,000 per year for the next 3 years to support ongoing ESG initiatives at the Gibraltar mine. The company provided little additional information about the agreement, or use of funds, suggesting that Osisko desired the arrangement to support its own ESG objectives.
- Wash Multifamily At the beginning of May, Wash Multifamily Inc. announced the delay of 4Q22 and 1Q23 audited financial statements due to a change in auditor to no later than July 31, 2023. Typically, companies are required to publish financial statements within 90 -120 days after the reporting period ends. Wash Multifamily was exploiting a loophole in their documents that gave them extra time to file financial statements. While covenants gave them protection from an event of default, a lack of financial statements for almost 7 months due to an auditor change was unacceptable. We engaged with the company, outside advisors, and discussed the issue with other investors to spur action. Through our interactions with the company we expressed our disappointment with the delay in financials and encouraged them to post flash, unaudited numbers to ensure the company was still financially sound. Management told us they would bring our concern to their sponsor. A few days later, the company reported flash numbers for both 4Q and 1Q.

How did this financial product perform compared to the reference benchmark?

Product name: PGIF Global Property Securities Fund Legal entity identifier: 5493005ON3FC5B6DDH22

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: \_\_\_% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_\_%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are,

- Reduction of greenhouse gas emissions
- Water conservation
- Increasing usage of renewable energy sources.

The social characteristics considered by the Fund are:

- Increased diversity and inclusion in the workplace and on company boards
- Greater adoption of policies to eliminate the practice of forced labour.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

## How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator		As of				
			09/30/22	12/31/22	03/31/23	06/30/23	09/30/23
Reduction of GHG	Energy Consumption		7.8	7.7	7.7	7.6	7.7
emissions	and renewable energy usage						
	GHG emission reduction targets & policies		6.3	6.3	6.2	6.1	6.2

Where "% Assets" above is the average of quarterly weights.

## What was the proportion of sustainability-related investments?

What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 98.5% and above the planned level of 80%. The percentage of alignment figure was above 80% throughout the reporting period.
- The exclusion criteria (owners and operators of private prisons) of the Fund was adhered to during the period.
- 82.4% of the fund (and above binding criteria threshold of 60%) was allocated to companies with an ESG score of 6.0 or greater per proprietary ESG scores on 09/30/2023. This percentage was >60% throughout the review period.
   68.5% of the fund was allocated to companies with a reported carbon reduction target per MSCI on 09/30/2023. This percentage was >60% (i.e. the binding criteria threshold) throughout the review period.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

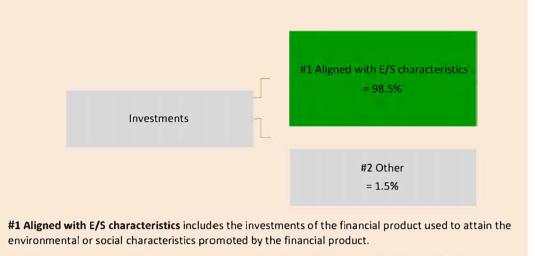

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# **Enabling activities** directly enable other activities to

make a substantial contribution to an environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

## In which economic sectors were the investments made?

GICS Sector	Average Weight %
Real Estate	95.93
Information Technology	0.61
Health Care	0.23
Consumer Discretionary	0.65
Communication Services	0.47
Unassigned	0.68
Cash	1.44

- "Unassigned" comprises of rights securities and companies no longer active due to acquisition
- Above table is calculated using the average weight over the period using quarterly values.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

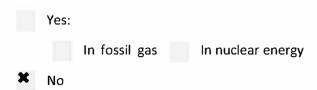

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Taxonomy-aligned activities are expressed as a share of:

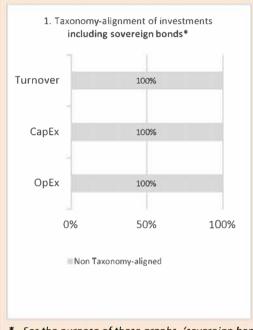

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

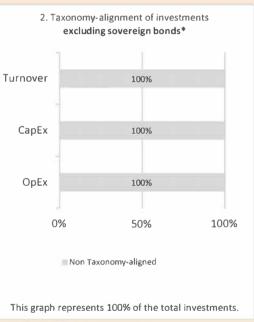

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Environmental, social, and governance (ESG) considerations are factors embedded in our investment process. These ESG issues are one of many important investment factors that our team of investment professionals consider when assessing a company.

To facilitate our understanding of ESG for a company, a proprietary ESG score is produced. Our analysts assign a rating for each ESG component (environmental, social, and governance) based on their own views, utilizing a combination of external data as well as their own independent research, and engagement with companies to influence their ESG scoring. This process promotes a greater understanding of a company's ESG attributes, ensuring our ESG score reflects our proprietary views of all three aspects of ESG, as well as the momentum our analysts feel a company has towards improving ESG disclosures and standards. The environmental and social characteristics promoted by the Fund are direct inputs in this process. This ESG score is embedded into our company Quality Score, a key metric utilized in the stock selection process.

We also practice active ownership and engagement with our companies. The engagement priorities incorporate environmental and social characteristics promoted by the Fund. Our engagement efforts include promotion of positive outcomes on key issues, tracking of progress, and potential escalation if needed. In the review period, the team has engaged with companies 16 times on various ESG topics that support the characteristics the Fund aims to promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF Post Short Duration High Yield Fund Legal entity identifier: 549300KCO3ML8KZWYI59

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes × No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that \_\_\_% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

The environmental characteristics promoted by the Fund are carbon footprint, air and water pollution, biodiversity and waste management. The social characteristics promoted by the Fund are human rights and labour standards.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Taxonomy or not.

## How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

	Indicator - Proprietary Scorecard % of total assets with risk score of 12 (out of 20) or lower				
Characteristic	As of 12/31/22	As of 03/31/12	As of 06/30/23	As of 09/30/23	
Environmental dimension of proprietary scorecard	97%	97%	96%	95%	
Social dimension of proprietary scorecard	100%	100%	100%	100%	
Governance dimension of proprietary scorecard	99%	99%	100%	98%	

The sustainability indicators employed by the Fund are the ESG scores of each investment held by the Fund as determined using the Sub-Investment Manager's proprietary ESG Scorecard.

The Sub-Investment Manager has developed its own in-house ESG rating process based on the 'best-in-class' approach (identify potentially greater areas of ESG risks with lower aggregate issuer scores equating to lower ESG risks.

Sustainability performance is assessed at the relevant criteria level through the combination of the three dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their water pollution and waste and energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity;
- Social dimension: these measure how an issuer operates its strategy to develop its human capital and the respect of the human rights in general and whether they operate in high-risk geographies;
- Governance dimension: This assesses the capability of each issuer to ensure the basis for an effective corporate governance framework and generate value for stakeholders over the long term.

The methodology applied uses 16 criteria that are common to all companies regardless of their activity in respect of an issuer and are expressed on the three E,S and G dimensions with a maximum score of 20 for each dimension. Each issuer considered must have an issuer score of 12 or lower for each of the three dimensions.

The Sub-Investment Manager has also implemented a fixed set of environmental and social exclusion criteria through a screening process to exclude companies or issuers from consideration for investment where more than 10% of their revenue was derived from involvement in producing conventional firearms, alcohol, adult entertainment, and thermal coal, and also excluded companies involved in the production of controversial weapons and tobacco/vaping products. These exclusions were were implemented prior to the inception period and consistently observed throughout the reference period.

...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

# How did this financial product consider principal adverse impacts on sustainability factors?

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 6.3% of investments included under "other" included under "Other" included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The manager has implemented multiple processes to ensure that the portfolio investments held by the fund meet the environmental and/or social characteristics promoted by the fund. All investments considered for investment or held by the fund are screened against the exclusion criteria that have been outlined in the fund prospectus. In addition, the manager requires that its investment team complete a proprietary ESG scorecard for each investment included in the Fund, and the fund has committed to a minimum compliance of 80% of the investments held by the Fund being compliant with the minimum ESG criteria outlined above. Lastly, the portfolio's carbon intensity is measured periodically to ensure that as a whole, the emissions targets outline above are met or exceeded durng the reporting period. The manager has implemented procedures and protocols to ensure that these processes are applied to the portfolio's investments on a consistent basis.

## Environmental and/or social characteristics

Did this financial product have a sustain	nable investment objective?
• • Yes	● No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic considered by the Fund is greenhouse gas emissions.

For assessing a company's practice on GHG emissions, the Sub-Investment Manager uses a bespoke metric to measure the company's sensitivity to a change in the price of carbon, as defined as the potential government levy against tonnes of CO2 emitted.

The Fund has met the environmental characteristic with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

## How did the sustainability indicators perform?

The performance of the sustainability indicator is shown in the table below and also by the Fund meeting the target percentage of alignment with the Environmental characteristic promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of 09/30/22	As of 12/31/22	As of 03/31/12	As of 06/30/23	As of 09/30/23

Where "% Assets" above is the average of quarterly weights.

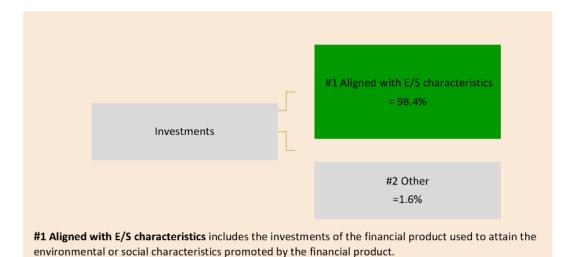

## What was the proportion of sustainability-related investments?

## What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain the environmental characteristic promoted by this financial product was met throughout the period. Specifically,

- The percentage of alignment with the environmental characteristic as per 09/30/2023 was 98.4% and above the planned level of 80%. The percentage of alignment figure was above 80% throughout the reporting period.
- The Fund maintained a carbon risk metric exposure of at least 20% below the index (MSCI Emerging Markets NTR). The average amount that the Fund was below index during the period was 48.7%.
- The Fund maintained an aggregate emission levels lower than the Index as measured by tonnes of carbon emitted per dollar of revenue generated. The average amount that the Fund was below index during the period was 38.2%.
- The controversial weapons exclusion of the Fund (as defined by the ISS controversial weapons research methodology) was adhered to throughout the period.

#2Other includes the remaining investments of the financial product which are neither aligned with the

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## In which economic sectors were the investments made?

environmental or social characteristics, nor are qualified as sustainable investments.

Above table is calculated using the average weight over the period using quarterly values.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

,	Yes:	
	In fossil gas	In nuclear energy
Х	No	

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

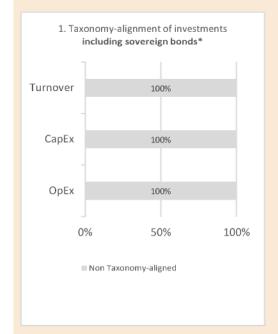

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

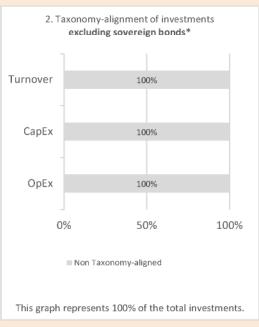

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

## Sustainable Finance Regulation Disclosure (Unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Not Applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments categorised as "other" included cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental characteristic of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

Stock not aligned: Vale (SEDOL 2196286) average weight 0.9% (Divested from position on 12<sup>th</sup> September 2023). mis-aligned with governance principles of the Fund due to United Nations Global Compact (UNGC) watchlist inclusion.

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

## Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Whilst direct company contact is intentionally not part of the Firm's systematic investment approach, Origin is aware of the increasing importance of corporate governance and active engagement to clients, and the Firm wishes to provide an active governance and voting solution on the stocks held in clients' portfolios.

In order to do this, Origin has established the following approach:

- Use of the international governance research and voting specialist Glass Lewis,
   via the Broadridge ProxyEdge voting platform.
- Whilst Origin's engagement policy does not typically involve communication with management of companies, the Firm will adhere to specific client IMA guideline mandates and regulatory obligations surrounding engagement.

For those clients that have specified a desire to actively engage with companies the objective of the Firm will be to encourage the lowest-ranked companies on the carbon sensitivity metric to reduce their carbon emissions over a span of 24 to 60 months, with the aim to rank up and out of the bottom decile or significantly improve their carbon leverage profile.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance practices.

The EU Taxonomy is

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: PGIF Finisterre Unconstrained Emerging Markets Fixed Income Fund Legal entity identifier: 549300EGJ87RK9TQK072

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	• No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	■ It promoted E/S characteristics, but did not make any sustainable investments    This is a substainable investment   This is a substai			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are greenhouse gas ("GHG") emissions. The social characteristics considered by the Fund are employee welfare and citizen welfare.

The Fund has met the environmental characteristic with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria. There are many ways to measure and assess the risks for each issuer across these parameters; for sovereigns, the sub-investment manager focuses on emissions intensity and any sharp drops in overall score downgrade as measured by MSCI. For corporate issuers the sub-investment manager has in place negative screening for issuers with significant weapons

or coal, liquid fuels (ex-LNG), and stranded fuels exposure. For corporate issuers the sub-investment manager also has a particular focus on serious violations of the UN Global Compact and on their own assessments of serious ESG issues, governance in particular.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

## How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of				
		09/30/22	12/31/22	03/31/23	06/30/23	09/30/23
Corporate Issuers						
GHG emissions	Exposure to coal or stranded fuel electricity making up >30% of the generation mix; coal or other stranded fuel production >30% of revenues*	0%	0%	0%	0%	0%
Employee welfare	Exposure to United Nations Global Compact ("UNGC") violations*	2.4%	2.4%	1.1%	1.2%	1.2%
Citizen Welfare	Exposure to conventional weapons >5% of revenues*	0%	0%	0%	0%	0%
Sovereign Issuers						
GHG emissions	Exposure to top 10 GHG emitters in kg/\$GDP*	3%	2.7%	2.7%	2.6%	1.8%
Citizen Welfare	The negative change in the issuer's overall MSCI ESG scoring on a rolling 12-month basis of more than 10%*	0%	0%	0%	0%	0%

\*Source: MSCI

...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicator	Portfolio	Portfolio
		Coverage
PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.66%	90.44%
PAI 14 – Exposure to controversial weapons	0%	90.44%

- Data points above are the average of quarterly values within the period.
- Data sources: MSCI
- Metrics and formulas for PAI Indicators above are as per Table 1 of Annex 1 provided by the European Commission.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and
- Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

## What were the top investments of this financial product?

Top 15 Holdings	Sector	% of Assets	Country
MBONO	Sovereign	5.45%	Mexico
BNTNF	Sovereign	5.32%	Brazil
INDOGB	Sovereign	5.23%	Indonesia
SAGB	Sovereign	3.76%	South Africa
TBILL	Sovereign	3.20%	US
CZGB	Sovereign	2.87%	Czech Republic
IVYCST	Sovereign	2.56%	Ivory Coast
MEX	Sovereign	2.34%	Mexico
POLGB	Sovereign	2.23%	Poland
IRAQ	Sovereign	2.12%	Iraq
ROMANI	Sovereign	2.08%	Romania
LVIATH	Independent	2.07%	Israel
COLOM	Sovereign	1.90%	Colombia
KSA	Sovereign	1.78%	Saudi Arabia
PEMEX	Integrated	1.76%	Mexico

- The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
- Where "% Assets" above is the average of quarterly weights.
- Two holdings in the list above are in energy sector: 1) LVIATH is an Independent gas company in Israel and 2)
   Pemex is the state-owned Mexican integrated oil company.

## What was the proportion of sustainability-related investments?

## What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

## Asset allocation describes the share of investments in

specific assets.

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 76.2% and above the planned level of 70%. The percentage of alignment figure was above 70% throughout the reporting period.
- The fixed exclusion criteria of the Fund (>5% revenue from tobacco/adult entertainment, any involvement in controversial weapons)) was adhered to during the period.
- The screening criteria as outlined within the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were adhered to throughout the period. Specifically, 16 issuers highlighted by the screening criteria of the investment strategy have been reviewed by the Finisterre ESG Committee with 4 being excluded for investment.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

## In which economic sectors were the investments made?

Sector	Weight %
Communication Services	1.0%
Consumer Discretionary	1.3%
Consumer Non-Discretionary	0.2%
Energy	11.6%
Financials	5.7%
FX	-0.1%
Industrials	0.7%
IT	1.6%
Materials	4.0%
Real Estate	0.9%
Sovereign	63.0%
Supranationals	0.1%
Utilities	2.1%

- Above table is calculated using the average weight over the period using quarterly values.
- Within energy: Midstream (3.4%), Independent (4.9%), Integrated (3.2%), Refining (0.2%).
- Within Materials: Steel (0.6%), Metals & Mining (1.1%), Cement (0.8%), Chemicals (1.2%).

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

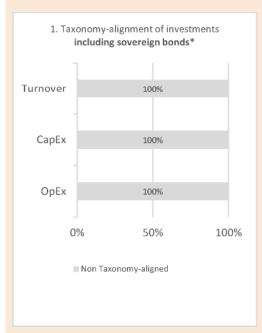

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

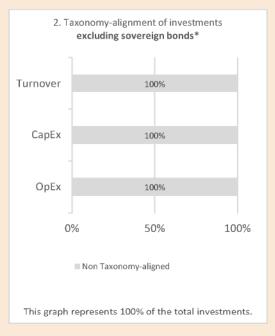

## Sustainable Finance Regulation Disclosure (Unaudited)

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Positions included under "Other" included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

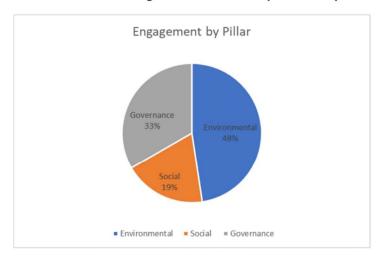

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The environmental factors focused on are emissions intensity for sovereign issuers whilst both the UGNC violations and sovereign MSCI score changes incorporate some levels of both environmental and social factors. The screening process for new investments includes many factors from fundamentals, technicals, and valuations—this includes ESG considerations. A negative flag on ESG simply makes it a less attractive issuer to even do full analysis on.

For those issuers which do have negative flags, the sub-investment manager uses MSCI reports, sometimes interaction with the analysts, and also their own proprietary analysis to make a view whether there is agreement with the flags or if the sub-investmnt manager sees actions that could change the assessment in time. Those views are brought to ESG Committees for discussion. 16 issuers with negative flags have gone to Committee with: 8 in part from social risks and 11 in part for environmental risks. Four of those were not approved for investment.

Engagement is also a core part of the ESG integration process and during the year the sub-investment manager engaged with 20 issuers. Engagement is defined as having a specific issuer which the sub-investment manager deems a material risk for creditworthiness and discussing that issue with the issuer. Some of the sub-investment managers 20 engagements were on multiple topics but see below for the breakdown by pillar.

### Environmental and/or social characteristics

Did this financial product have a sustain	nable investment objective?
Yes	• × No
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are energy intensity and carbon emissions. The social characteristics considered by the Fund are labour standards and employee welfare.

The Fund has met its promoted Environmental and Social characteristics by maintaining a favourable profile of sustainability-related indicators relative to its investment universe as well as maintaining a minimum standard in ESG profile on a per-issuer basis, such as by internal score or agency rating. This was achieved through the continued use of a holistic investment process that includes the use of systematic data-based models that use

sustainability data and idiosyncratic analysis that include ESG-integrated fundamental research and engagement.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of

## How did this financial product consider principal adverse impacts on sustainability factors?

Metrics relating to the Principal Adverse Impact (PAI) indicators are tracked on a regular basis. The portfolio's aggregate footprint for each tracked indicator, a weighted average based on market value, is compared to the investment index's aggregate footprint each month to check relative performance. Generally, PAIs on an issuer basis are taken into account as each portfolio decision is made, and its contribution is calculated to the best of the investment team's ability especially considering fluctuations in market value with respect to portfolio holdings.

PAI Indicator	Portfolio	Portfolio Coverage	Benchmark	Benchmark Coverage
PAI 1 - GHG emissions (Scope 1 and 2 emissions in metric tons)	4,057,859.49	71%	5,435,880.28	80%
PAI 2 - Carbon footprint (Scope 1 & 2 emissions metric tons / EVIC in mio USD)	206.94	68%	273.28	76%
PAI 13 – Board gender diversity (Female Directors %)	17.4	70%	16.2	77%
PAI 14 – Exposure to controversial weapons	0%	83%	0%	77%

- Data points above are the average of quarterly values within the period.
- Benchmark: ICE BofA Asian Dollar High Yield.
- Data source: MSCI.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

 Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Where "% Assets" above is the average of quarterly weights.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 73.8% and above the planned level of 70%. The percentage of alignment figure was *above* 70% throughout the reporting period.
- The weighted ave. carbon intensity of the Fund, using Carbon Emissions Scope 1+2 Intensity (t/USD million sales) data, was 10% below the index (ICE BofA Asian Dollar

Asset allocation describes the share of investments in specific assets.

High Yield). Using quarterly observations, the weighted carbon intensity of the portfolio was on average 20.8% less than the index.

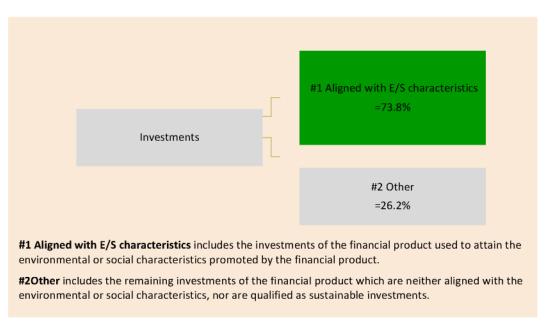

- The Fund maintained a lower aggregate weight of investee companies involved in violations of the UN Global Compact as compared to the ICE BofAML Asian Dollar High Yield Index, utilising Global Compact Compliance data. The Fund held no investee companies in the period that violated the UC Global Compact.
- The Fund held lower than 10% of assets in companies with revenues of 30% or more from the production and consumption of thermal coal, oil and gas. Using quarterly observations the average exposure was 7.6%.
- The Fund maintained an of minimum 10% of companies involved in sustainable financing and/or that utilise bond proceeds to fund sustainability-focused projects, or that have been issued by companies in the green sector, as defined by the Sub-Investment Manager. Using quarterly observations the average exposure was 12.6%.
- The fixed environmental and social exclusion criteria of the Fund was adhered to during the period.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Sector	% Assets
Automotive	2%
Banking	13%
Basic Industry	8%
Conglomerate	1%
Energy*	2%
Financial Services	4%
Foreign Sovereign	5%
Leisure	14%
Real Estate	14%
Technology &	
Electronics	2%

Telecommunications	3%
Transportation	1%
Utility	13%
Others/ Cash/	
Treasuries	18%

- Above table is calculated using the average weight over the period using quarterly values.
- On a sub sector basis, energy weight shown above is traditional/diversified energy.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
	In fossil	gas li	n nuclear energy
Χ	No		

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee

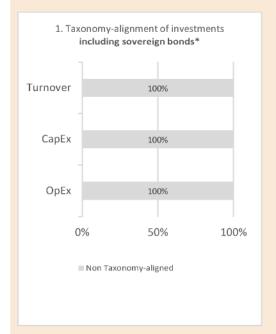

companies.

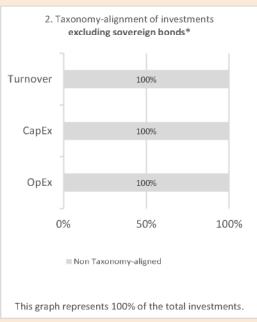

- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

#### Sustainable Finance Regulation Disclosure (Unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Not Applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" investments of 26.2% are cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental and/or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The consideration of environmental and social characteristics during the reference period is integrated in the investment process. The fund manager leverages a diverse toolkit that includes but is not limited to: a proprietary systematic ESG model that provides a baseline for ESG beliefs about a company, data sources that describe and substantiate sustainability-related metrics for companies within the investment universe, fundamental research that covers credit and sustainability-related matters, and engagement opportunities that allow the fund manager direct interface with a company about relevant issues. This toolkit is applied in a mosaic approach that orients decisions towards the characteristics promoted by the fund.

#### Generally, actions included:

- internal ESG baselines are refreshed every quarter
- Investee and index ESG metric footprints are refreshed every month
- Investee footprints and ESG profiles are assessed as needed based on any emerging need or topical relevance
- Company engagement is carried out to clarify critical issues when needed

An example of a specific action that was taken was to manage exposure to a Indian utilities company with a large carbon footprint in order to maintain overall favorability of the portfolio's footprint compared to that of the index. % weight exposure to the portfolio was specifically reduced to manage scope 1 and 2 emissions.

#### How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

energy identifiers 54550050A55Ki EKW41E0

## Environmental and/or social characteristics

Did this financial product have a sustain	nable investment objective?
Yes	● No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Sustainable

practices.

investment means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are greenhouse gas ("GHG") emissions. The social characteristics considered by the Fund are employee welfare and citizen welfare.

The Fund has met the environmental characteristic with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria. There are many ways to measure and assess the risks for each issuer across these parameters; for sovereigns, the sub-investment manager focuses on emissions intensity and any sharp drops in overall score downgrade as measured by MSCI. For corporate issuers the sub-investment manager has in place negative screening for issuers with significant weapons

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Taxonomy or not.

or coal, liquid fuels (ex-LNG), and stranded fuels exposure. For corporate issuers the sub-investment manager also has a particular focus on serious violations of the UN Global Compact and on their own assessments of serious ESG issues, governance in particular.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators is shown in the table below and also by the Fund meeting the target percentage of alignment with E/S characteristics promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of				
		09/30/22	12/31/22	03/31/23	06/30/23	09/30/23
Corporate Issuers						
GHG emissions	Exposure to coal or stranded fuel electricity making up >30% of the generation mix; coal or other stranded fuel production >30% of revenues*	0%	0%	0%	0%	0%
Employee welfare	Exposure to United Nations Global Compact ("UNGC") violations*	2.49%	2.64%	1.09%	1.23%	1.24%
Citizen Welfare	Exposure to conventional weapons >5% of revenues*	0%	0%	0%	0%	0%
Sovereign Issuers						
GHG emissions	Exposure to top 10 GHG emitters in kg/\$GDP*	3.19%	2.94%	2.97%	2.83%	2.15%
Citizen Welfare	The negative change in the issuer's overall MSCI ESG scoring on a rolling 12-month basis of more than 10%*	0%	0%	0%	0%	0%

\*Source: MSCI

...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicator	Portfolio	Portfolio
		Coverage
PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.74%	90.19%
PAI 14 – Exposure to controversial weapons	0%	90.19%

- Data points above are the average of quarterly values within the period.
- Data sources: MSCI
- Metrics and formulas for PAI Indicators above are as per Table 1 of Annex 1 provided by the European Commission.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and
- Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments

investments
constituting the
greatest proportion
of investments of
the financial product
during the reference
period which is:

#### What were the top investments of this financial product?

Top 15 Holdings	Sector	% of Assets	Country
MBONO	Sovereign	5.45%	Mexico
BNTNF	Sovereign	5.32%	Brazil
INDOGB	Sovereign	5.23%	Indonesia
SAGB	Sovereign	3.76%	South Africa
TBILL	Sovereign	3.20%	US
CZGB	Sovereign	2.87%	Czech Republic

MEX	Sovereign	2.34%	Mexico
POLGB	Sovereign	2.23%	Poland
IRAQ	Sovereign	2.12%	Iraq
ROMANI	Sovereign	2.08%	Romania
LVIATH	Independent	2.07%	Israel
COLOM	Sovereign	1.90%	Colombia
KSA	Sovereign	1.78%	Saudi Arabia
PEMEX	Integrated	1.76%	Mexico

- Where "% Assets" above is the average of quarterly weights.
- Two holdings in the list above are in energy sector: 1) LVIATH is an Independent gas company in Israel and 2) Pemex is the state-owned Mexican integrated oil company.

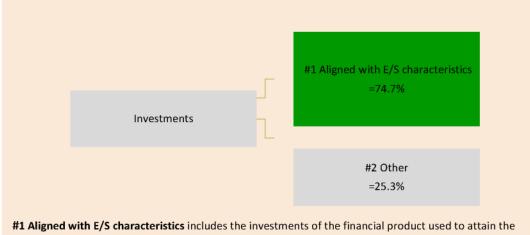

#### What was the proportion of sustainability-related investments?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 74.7% and above the planned level of 70%. The percentage of alignment figure was above 70% throughout the reporting period.
- The fixed exclusion criteria of the Fund (>5% revenue from tobacco/adult entertainment, any involvement in controversial weapons)) was adhered to during the period.
- The screening criteria as outlined within the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were adhered to throughout the period. Specifically, 16 issuers highlighted by the screening criteria of the investment strategy have been reviewed by the Finisterre ESG Committee with 4 being excluded for investment.

environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#### In which economic sectors were the investments made?

Sector	Weight %
Communication Services	0.9%
Consumer Discretionary	1.3%
Consumer Non-Discretionary	0.2%
Energy	12.8%
Financials	7.4%
FX	-0.1%
Industrials	0.8%
IT	2.1%
Materials	4.1%
Real Estate	1.9%
Sovereign	64.5%
Supranationals	0.1%
Utilities	2.1%

- Above table is calculated using the average weight over the period using quarterly values.
- Within energy: Midstream (4.1%), Independent (6.1%), Integrated (2.4%), and Refining (0.2%).
- Within Materials: Steel (0.7%), Metals & Mining (1.1%), Cement (0.8%) and Chemicals (1.2%).

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.

Not Applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

comprehensive

safety and waste

management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

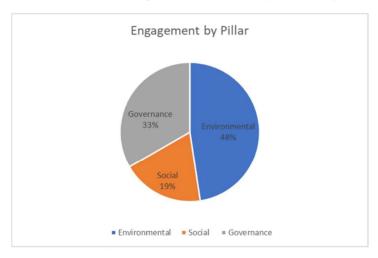

Positions included under "Other" included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The environmental factors focused on are emissions intensity for sovereign issuers whilst both the UGNC violations and sovereign MSCI score changes incorporate some levels of both environmental and social factors. The screening process for new investments includes many factors from fundamentals, technicals, and valuations—this includes ESG considerations. A negative flag on ESG simply makes it a less attractive issuer to even do full analysis on.

For those issuers which do have negative flags, the sub-investment manager uses MSCI reports, sometimes interaction with the analysts, and also their own proprietary analysis to make a view whether there is agreement with the flags or if the sub-investmnt manager sees actions that could change the assessment in time. Those views are brought to ESG Committees for discussion. 16 issuers with negative flags have gone to Committee with: 8 in part from social risks and 11 in part for environmental risks. Four of those were not approved for investment.

Engagement is also a core part of the ESG integration process and during the year the sub-investment manager engaged with 20 issuers. Engagement is defined as having a specific issuer which the sub-investment manager deems a material risk for creditworthiness and discussing that issue with the issuer. Some of the sub-investment managers 20 engagements were on multiple topics but see below for the breakdown by pillar.

How did this financial product perform compared to the reference benchmark?

\*Source: MSCI

...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Fund did not make sustainable investments, as defined by SFDR definition Article 2(17).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicator	Portfolio	Portfolio Coverage
PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.16%	88.52%
PAI 14 – Exposure to controversial weapons	0%	88.52%

- Data points above are the average of quarterly values within the period.
- Data sources: MSCI
- Metrics and formulas for PAI Indicators above are as per Table 1 of Annex 1 provided by the European Commission.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and
- Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

Asset allocation describes the share of investments in specific assets.

#### What were the top investments of this financial product?

Top 15 Holdings	Sector	% of Assets	Country
ROMGB	Sovereign	3.74%	Romania
MEX	Sovereign	3.34%	Mexico
SENEGL	Sovereign	2.92%	Senegal
TBILL	Sovereign	2.86%	US
SAGB	Sovereign	2.82%	S. Africa
SERBIA	Sovereign	2.72%	Serbia
MBONO	Sovereign	2.70%	Mexico
CZGB	Sovereign	2.18%	Czech Republic
IVYCST	Sovereign	2.18%	Ivory Coast
BNTNF	Sovereign	2.10%	Brazil
IRAQ	Sovereign	2.08%	Iraq
LVIATH	Independent	2.04%	Leviathan
TENGIZ	Independent	1.98%	Kazakhstan
INDOGB	Sovereign	1.86%	Indonesia
MONTEN	Sovereign	1.82%	Montenegro

- Where "% Assets" above is the average of quarterly weights.
- Two holdings in the list above are in energy sector: 1) LVIATH is the largest producer of natural gas in Israel and is
  an Independent 2) TENGIZ is an Independent oil and gas producer in Kazakhstan, owned by a constortium of oil
  companies including Western and local entities.

#### What was the proportion of sustainability-related investments?

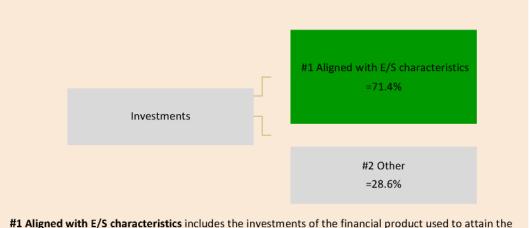

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 71.4% and above the planned level of 70%. The percentage of alignment figure was above 70% throughout the reporting period.
- The fixed exclusion criteria of the Fund (>5% revenue from tobacco/adult entertainment, any involvement in controversial weapons)) was adhered to during the period.
- The screening criteria as outlined within the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were adhered to throughout the period. Specifically, 16 issuers highlighted by the screening criteria of the investment strategy have been reviewed by the Finisterre ESG Committee with 4 being excluded for investment.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#### In which economic sectors were the investments made?

Sector	% Weight
Communication Services	3.1%
Consumer Discretionary	1.7%
Consumer Staples	0.8%
Energy	7.3%
Financial	8.9%
FX	0.1%
Industrial	3.6%
IT	1.7%
Materials	6.8%
Real Estate	2.1%
Sovereign	65.5%
Utilities	3.5%

- Above table is calculated using the average weight over the period using quarterly values.
- Within energy: Independents (5.1%), Integrated (2%), Refining (0.2%).
- Within materials: Steel (0.8%), Metals & Mining (0.3%), Chemicals (5.1%), and Pulp & Paper (0.7%).

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Positions included under "Other" included cash, cash equivalents, derivatives and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental or social characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental and/or social characteristics of the Fund. The assessment of issuers and of counterparties focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

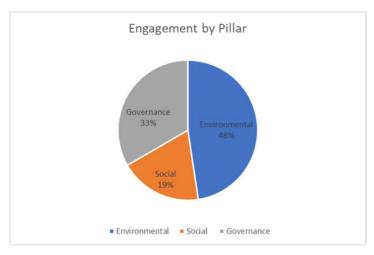

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The environmental factors focused on are emissions intensity for sovereign issuers whilst both the UGNC violations and sovereign MSCI score changes incorporate some levels of both environmental and social factors. The screening process for new investments includes many factors from fundamentals, technicals, and valuations—this includes ESG considerations. A negative flag on ESG simply makes it a less attractive issuer to even do full analysis on.

For those issuers which do have negative flags, the sub-investment manager uses MSCI reports, sometimes interaction with the analysts, and also their own proprietary analysis to make a view whether there is agreement with the flags or if the sub-investmnt manager sees actions that could change the assessment in time. Those views are brought to ESG Committees for discussion. 16 issuers with negative flags have gone to Committee with: 8 in part from social risks and 11 in part for environmental risks. Four of those were not approved for investment.

Engagement is also a core part of the ESG integration process and during the year the sub-investment manager engaged with 20 issuers. Engagement is defined as having a specific issuer which the sub-investment manager deems a material risk for creditworthiness and discussing that issue with the issuer. Some of the sub-investment managers 20 engagements were on multiple topics but see below for the breakdown by pillar.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: PGIF CCB Principal China New Energy Innovation Fund

Legal entity identifier: 549300024IO0PHTQPK57

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	• No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.4% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be aligned with the

Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics considered by the Fund are related to climate change mitigation. This includes the reduction of greenhouse gas emissions, carbon footprint and greenhouse gas intensity of investee companies.

The Fund will invest at least 80% of its assets in New Energy Industry Stocks. New Energy Industry Stocks refers to non-conventional energy stocks. Conventional energy refers to coal, petroleum and natural gas. New Energy mainly includes solar power, nuclear energy, geothermal energy, wind power, new energy vehicles and new energy services.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund has met the environmental and social characteristics with a combination of the integration of ESG analysis, assessment of sustainability risks, application of binding criteria and exclusion criteria.

No reference benchmark has been designated for the purposes of attaining the above characteristics promoted by the Fund.

#### How did the sustainability indicators perform?

The performance of the sustainability indicator is shown in the table below and also by the Fund meeting the target percentage of alignment with the Environmental characteristic promoted by the Fund throughout the reporting period.

Characteristic	Indicator	As of	As of
		06/30/23	09/30/23
Climate change	GHG Emissions ( GHG	142.49	177.04
mitigation	Scope 1, 2 & 3 Waterfall		
	Per EVIC)		
	Carbon Footprint	142.49	177.04
	GHG intensity of	478.92	413.29
	investee companies		

• Source: Bloomberg & Refinitiv

Fund launched 19<sup>th</sup> May 2023

#### ...and compared to previous periods?

Not applicable as this is the first periodic report of the Fund.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments is related to climate change mitigation, through renewable energy transition and adoption.

The investments contribute to the objective by engaging in activities which align with climate change mitigation through non-conventional energy which includes, but is not limited to, solar power, nuclear energy, geothermal energy, wind power, new energy vehicles and new energy services.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to be classified as a sustainable investment, the investments must do no significant harm ("DNSH") to environmental objectives and are assessed using the indicators for adverse impacts on sustainability factors, as noted below.

The investment due diligence process included the consideration of principal adverse impacts on sustainability factors and alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, using available third party data. When third party data is not available, the Sub-Investment Manager utilises alternative data sources (including social media and online data such as news articles and blogs; and publicly available government and non-governmental organisations (NGO) data), as well as proprietary analysis and research to evaluate whether investee companies significantly harm any environmental objectives. This proprietary analysis and research included the consideration of indicators including adverse impacts on sustainability factors from Table 1, PAI 9 from Table 2 and PAI 1 Table 3 (PAI) of Annex 1 provided by the European Commission.

## How were the indicators for adverse impacts on sustainability factors taken into account?

The principal adverse impacts on sustainability factors have been taken into account by combining internal analysis of the Fund's holdings and third-party data against all mandatory indicators for sustainable investments and considered for promoting environmental characteristics.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment due diligence process included checks on violations against the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, using available third party data. When third party data was not available the Sub-Investment Manager utilised alternative data sources, as well as proprietary analysis and research to evaluate whether investee companies significantly harm any environmental or social objectives, including compliance with equivalent local laws and regulations, covering environmental considerations, and violations of human rights and labour relations.

If an investment is assessed as being in violation of these international norms, it will not be considered a sustainable investment.

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicator	Portfolio	Portfolio Coverage
PAI 1 - GHG emissions	159.77	100%
PAI 2 - carbon footprint	159.77	100%
PAI 3 - GHG intensity of investee companies	446.11	100%

- Fund launched 19<sup>th</sup> May 2023. Data points above are the average of quarterly values (30.06/23 & 30/09/23) within the period.
- Data sources: Bloomberg & Refinitiv.
- Metrics, formulas and measures for PAI Indicators above are as per Table 1 (PAI) of Annex 1 provided by the European Commission.

This is the first period in which principal adverse impacts have been reported on and within the period the following monitoring system was in place for tracking progress and effectiveness of mitigation strategies:

- Fund manager ensured regular training and awareness programs were in place for Fund investment and sub-investment managers and other stakeholders to ensure alignment with sustainability goals and understanding their roles in mitigating PAIs.
- o The investment and sub-investment managers engage with investee companies to encourage sustainable practices; and
- Investee companies who were severe violators of sustainability standards were not eligible to be considered as an investment promoting environmental or social characteristics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

#### What were the top investments of this financial product?

The list includes the
investments
constituting the
greatest proportion
of investments of
the financial product
during the reference
period which is:

Largest investments	Sector	% Assets	Country
CONTEMPORARY AMPERE	Energy Storage/New Energy vehicle	8.99%	China
ZHEJIANG JINGSHENG	Photovoltaic	8.23%	China
HENGTONG OPTIC-ELEC	Wind Power	4.97%	China
DAJIN HEAVY INDUSTR	Wind Power	4.39%	China
WUS PRINTED CIRCUIT	New Energy vehicle	4.07%	China
ZHEJIANG SANHUA INT	New Energy vehicle	3.80%	China
SUNGROW POWER SUPPL	Photovoltaic	3.64%	China
TCL ZHONGHUAN RENEW	Photovoltaic	3.51%	China
NINGBO ORIENT WIRES	Wind Power	3.41%	China
JIANGSU HAILI WIND	Wind Power	3.23%	China
SHANGHAI TAISHENG W	Wind Power	3.06%	China
WUHAN JINGCE ELECTR	Energy Storage	3.02%	China
HEBEI SINOPACK ELEC	New Energy vehicle	2.72%	China
LI AUTO INC-CL USD	New Energy vehicle	2.61%	China
HUIZHOU DESAY SV AU	New Energy vehicle	2.54%	China

Fund launched 19<sup>th</sup> May 2023. Data points above are the average of quarterly % assets (30.06/23 & 30/09/23) within the period.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product were met throughout the period. Specifically,

- The percentage of alignment with E/S characteristics as per 09/30/2023 was 89.4% and above the planned level of 80%. The percentage of alignment figure was above 80% throughout the reporting period.
- The percentage of sustainable investments as per 09/30/2023 was 51.4% and above the planned level of 50%. The percentage of sustainable investments was above 50% throughout the reporting period.
- Throughout the period the Fund excluded stocks with internal ESG ratings of F on proprietary ESG scoring system of A-F (with A being the highest rating, and F being the lowest rating).

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

To comply with the EU Taxonomy, the

criteria for fossil gas

include limitations

on emissions and

nuclear energy, the criteria include comprehensive safety and waste

management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

	% Assets
New Energy Vehicle	36.98
Wind Power	20.34
Photovoltaic	20.91
Energy Storage	2.84
New Energy Other	4.17
Cash	14.77

 Where "% Assets" above is the average of quarterly weights. Fund launched 19<sup>th</sup> May 2023 therefore data points are 30.06/23 & 30/09/23.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

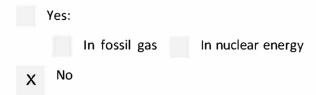

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure
   (OpEx) reflecting green operational activities of investee companies.

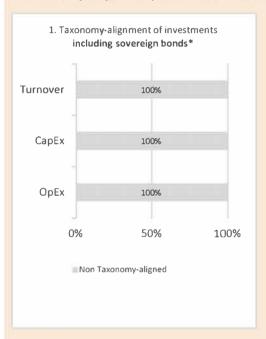

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

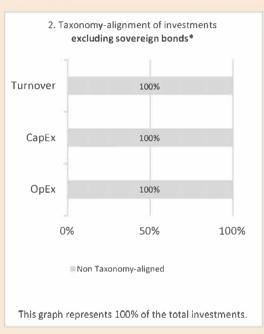

#### Sustainable Finance Regulation Disclosure (Unaudited)

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

#### What was the share of investments made in transitional and enabling activities?

The Fund has 0% minimum for sustainable investments with an environmental objective to be aligned with the EU Taxonomy.

As of 30/09/3023, the accidental share of sustainable investments aligned with the EU taxonomy was 90.5%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first periodic report of the Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund has 0% minimum for sustainable investments with an environmental objective to be aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

they promote.

environmental or

10.6% of total assets classified as "other" included cash, cash equivalents and hedging instruments which are not subject to environmental and/or social screening or any minimum environmental or social safeguards and/or investments that may not be aligned with the environmental characteristics promoted by the Fund. Cash and cash equivalents do not affect the promoted environmental characteristics of the Fund. The assessment of issuers and of counterparties for cash and hedging instruments focusses on the creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Within the reference period the sub-investment manager developed policies in respect to responsible investment and stewardship.
