

# Raiffeisen-Euro-Rent (R)

## Current fund strategy

Raiffeisen-Euro-Rent (R) is a bond fund. It invests predominantly in EUR-denominated bonds, with broad diversification. Issuers of the bonds can include sovereigns, companies and multinational institutions. Investment occurs mainly in bonds from the high and highest rating classes. The fund management works to optimise the risk-return profile using additional active strategies. The Fund is particularly suitable for investors who wish to benefit from the earnings potential of a well-diversified EUR bond investment and are aware of the related higher risks, ranging from elevated price volatility to possible loss of capital in the event of strong increases in yields on the bond markets. The fund is actively managed with reference to a benchmark. Such reference to a benchmark does not restrict the fund management's scope of action.

## Recommended holding period in years

## Comments from fund management

The easing of the quarantine measures was the focus of attention for investors in May. Volatility on the bond markets continued to decline over the past month. Bund yields were virtually unchanged while corporate bonds initially suffered price losses, but then recovered them again as the month progressed.

The credit risk was reduced. Corporate bonds and financial sector issues were reduced.

The course of the pandemic will continue to drive developments on the markets. However, the damage to the real economy and how to deal with it are increasingly becoming the centre of attention. (22.05.2020)

## Weighting in %

Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. For more details on the calculation, please see the next page.<sup>1</sup>

The benchmark is presented without costs and is not directly investable.

Presentation in accordance with the benchmark used in the past, which may deviate from the benchmark reported. We can also provide you with more detailed information free of charge on request.

The management company may change the benchmark in the interests of the unitholders. The respective current benchmark will be shown in the Key Investor Information Document, the prospectus or in the information pursuant to § 21 of the Austrian Alternative Investment Fund Managers Act (AIFMG).

Low or even negative yields on money market instruments and bonds induced by the market can have a negative effect on the net asset value or be insufficient to cover the recurrent costs.

The investment strategy permits the fund to predominantly (relative to the associated risk) invest in derivatives.

This is a marketing notice. All of the data and information have been collected and assessed with great care; the sources used are considered to be reliable. The information is current as of the time of update. No liability or guaranty can be assumed for the accuracy or completeness of the information.

The published prospectuses, information for investors pursuant to § 21 AIFMG, and customer information documents (Key Investor Information Documents) for the investment funds of Raiffeisen Kapitalanlage-Gesellschaft m.b.H. which are registered for sale in Spain are available in English and in Spanish at [www.rcm-international.com/es](http://www.rcm-international.com/es).

<sup>1</sup> Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. Individual costs – such as the issue premium, the return fee, the investor's securities account fees, and taxes – are not taken into account in calculating performance. These would reduce the performance if they were included. Past value is not a reliable indicator of the fund's future performance. Regarding our clients whose home currency differs from the fund currency, we would like to point out that the yield may rise or fall also due to currency fluctuations.

<sup>2</sup> The „ongoing charges“ have been calculated on the basis of the figures as of 31.12.2019 including the previous 12-month period. The „ongoing charges“ include the management fee and all fees charged in the past year. Third-party transaction costs and performance-related fees are not included in the „ongoing charges“. The „ongoing charges“ may differ from year to year. Please refer to the „Expenses“ sub-item of the current annual fund report for precise details of the cost components included in the „ongoing charges“.

<sup>3</sup> For securities with an early call right, this is taken into account when calculating bond indicators. If issuers do not exercise the early call option, this results in a corresponding extension of the maturity structure and thus changes the above-mentioned indicators. Bonds without a specific maturity (perpetuals) are presented with a fictitious maturity of 40 years.
