Risk Warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.

Fund Strategy

The fund applies a defensive multi factor stock selection approach while integrating Environmental, Social and Governance (ESG) considerations with a focus on environmental criteria. The fund incorporates key aspects of ESG, e.g. ESG integration, exclusions and a best-in-class approach. Furthermore, the investment team applies UN Global Compact screening and excludes controversial activities, i.e. weapons, nuclear power and tobacco. The portfolio invests in US companies with the intended factor characteristics: momentum, quality and value. At the same time, a low volatility focus targets a more stable portfolio profile.
