Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration, Average Weighted Maturity and Blended Yield reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund invests mainly in equity, equity-related and debt securities around the world. Such securities have historically been subject to significant price movements that may occur suddenly due to equity and bond market or company-specific factors. As a result, the performance of the Fund can fluctuate over time. The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital. Other significant risks include: credit risk, foreign currency risk, derivatives instruments risk, emerging markets risk, liquidity risk, Chinese market risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Important Information

Effective 31 July 2017, Templeton Global Balanced Fund changed its benchmark to the Custom 65% MSCI ACWI-NR + 35% JP Morgan Global Government Bond Index.

Performance: Custom 65% MSCI ACWI-NR + 35% JP Morgan Global Government Bond Index reflects performance of the Custom 65% MSCI ACWI + 35% JP Morgan Global Government Bond Index (gross returns) from fund inception through 31 December 2000 and the Custom 65% MSCI ACWI-NR + 35% JP Morgan Global Government Bond Index thereafter.

Performance: References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Top Ten Equity Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). For unrated bonds ratings may be assigned based on the ratings of the issuer or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Blended Yield: A blended measure used for balanced funds. The blended yield is the market-weighted average of the current yield of the fund's fixed income component and the dividend yield of the fund's equity component. This measure is gross of fees. Holdings of the same issuer have been combined.

Composition of Fund: Ratings shown are assigned by one or more Nationally Recognised Statistical Rating Organisations ('NRSRO'), such as Standard & Poor's, Moody's and Fitch. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When ratings from all three agencies are available, the middle rating is used; when two are available, the lowest rating is used; and when only one is available, that rating is used. Foreign government bonds without a specific rating are assigned the country rating provided by an NRSRO, if available. The Not Applicable category consists of nonrateable securities (e.g., equities). Cash and equivalents are excluded from this breakdown.
