INVESTMENT MANAGER

Newton Investment Management: Newton aims to deliver outcomes for its clients across active equities, income, absolute return, multi-asset solutions, thematic and sustainable strategies. Its capabilities are driven by its global investment research platform which harnesses a breadth of both fundamental and quantitative research.

PERFORMANCE BENCHMARK

The Fund will measure its performance against the MSCI AC World NR Index (the "Benchmark").
The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

† In most cases the initial charge is not applicable in Spain, however in specific situations an inital charge may be included at the discretion of the Investment Manager (BNY MGM)

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Emerging Markets have additional risks due to less-developed market practices.
- Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedged share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
