Performance fees	n/a
Subscription fees	4 % (maximum)
Redemption fees	Nil
Management fees and other administrative or operating costs	1.44 %
Transaction fees received by the Management Company	None

INVESTMENT STRATEGY

The strategy used consists of selecting the best-rated companies on ESG criteria by reducing the investment universe using a "Best-in-class" / "Best effort" rating methodology for companies in the European Union, the United Kingdom, Switzerland and Norway, and then proceeding with the selection of discounted stocks through rigorous financial analysis, knowledge of the management teams and the detection of one or two catalysts capable of reducing the discount within a period of 18 to 24 months.

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

CRw-EUR - Eur | *Fundamental Equity - Value - Europe*

SUSTAINABLE REPORT – METHODOLOGY

Our ESG analysis is based on a multi-sector Best-in-Class/Best effort approach that encourages companies to make improvements in the three key extra-financial ESG areas (Environment, Social, Governance).

The Best-in-Class approach involves selecting European companies above the average of their sector based on ESG criteria. The Best-in-Class rating scale ranges from AAA+ to CCC-.

The Best effort approach involves selecting European companies that have made efforts to develop their ESG performance. The Best effort rating scale ranges from 1 to 5 stars.

We select stocks:

- elimination of companies falling within the scope of our exclusion policy;
- demonstrating strong extra-financial conviction: companies rated above or equal to BBB- (Investment grade) may be selected with no Best effort condition; companies rated below or equal to BB+ may be selected subject to a minimum +++ Best effort rating; companies rated in the CCC bucket are ruled out;
- discounted against their industrial value;
- in sound financial health commensurate with their activity and the economic cycle.

The Value management team applies a policy of normative exclusion (exclusion of companies that do not comply with certain international standards (chemical weapons, anti-personnel mines, violation of the principles of the Global Compact...)) and sectorial (total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, armament, entertainment for adults / pornography, coal ...)).

Our Responsible Value management process aims to maintain a weighted average ESG rating for the portfolio must be higher than the reference universe's overall ESG rating after deduction of 20% of the lowest ratings.

The overall ESG rating of the portfolio is calculated as a weighted average.

Carbon footprint is calculated in tonnes of CO2 equivalent annually and in millions of euros of revenues. The scope of calculation includes scope 1 and scope 2 emissions.

Scope 1 (direct emissions) covers greenhouse gas (GHG) emissions directly linked to the manufacture of a product. If, for example, manufacturing a product requires the use of oil or the burning of fuel, or results in CO2 or methane emissions, all such emissions are included in scope 1.

Scope 2 (indirect emissions) covers GHG emissions arising from the energy consumption required to manufacture a product (such as the electricity used to power the plants where the product is designed).

To comply with the French ISR label, the fund has defined two impact indicators that need to be outperformed. These indicators are :

% of women on board

% of independent board members

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

28 MARCH 2024

CRw-EUR - Eur | Fundamental Equity - Value - Europe

MONTHLY MANAGEMENT COMMENT

European equity markets continued to rise in March, a month marked by low volatility. The rise in the markets was mainly fuelled by renewed optimism surrounding the lack of bad news on the macroeconomic front and from companies in general. The prospect of a new round of interest rate cuts by the central banks, which is drawing nearer, also supported the uptrend. By sector, financials, property, commodities and energy recorded the strongest gains. The value management style measured by the MSCI Europe Value index clearly outperformed.

Against this backdrop, the portfolio outperformed its benchmark index over the month thanks to a very positive stock-picking effect. Banco Santander, ING, BNP Paribas, Anglo American and Signify were the best performers, with gains of between 15% and 20% over the past month.

On the ESG front, we continued our dialogue with the TotalEnergies group on their climate policy. The group, whose strategy has been criticised, is working with the SBTi to set targets that are compatible with the Paris Agreement in the near future.

As regards the main portfolio changes, we introduced the Evonik chemicals group, whose business is showing signs of rebounding at the bottom of the cycle. The share is trading at a significant discount to its market value, with a healthy balance sheet and strong cash flow generation. The group is also rolling out a major restructuring programme that will boost earnings growth tenfold when there is an upturn in the cycle. We also added British Land, a property group with a solid balance sheet, high-quality assets and a significant valuation discount, which should be absorbed when the Bank of England cuts its key interest rate. Finally, we sold Informa, which had reached our valuation target.

RISKS:

The fund is exposed to the following risks : risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with holding small and medium capitalisations, risks linked to the use of overexposure, currency risk for share classes denominated in a currency other than that of the sub-fund, currency risk specific to the USD Hedged share class, counterparty risk specific to the USD Hedged share class, currency risk at the sub-fund level, Sustainability risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice. Any opinions presented in this document result from our market forecasts on the publication date. They are subject to change according to market conditions and ODDO BHF AM SAS shall not in any case be held contractually liable for them. The net asset values presented in this document are provided for indicative purposes only. Only the net asset value marked on the transaction statement and the securities account statement is authoritative. Subscriptions and redemptions of mutual funds are processed at an unknown asset value.

A summary of investor rights is available free of charge in electronic form in English language on the website at : https://am.oddo-bhf.com/FRANCE/en/non_professional_investor/infos_reglementaire. The fund may have been authorized for distribution in different EU member states. Investors are advised to the fact that the management company may decide to withdraw with the arrangements it has made for the distribution of the units of the fund in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.

The Key Information Document (DEU, ESP, FR, GB, ITL, SWD) and the prospectus (FR, GB) are available free of charge from ODDO BHF AM SAS or at am.oddo-bhf.com or at authorized distributors. The annual and interim reports are available free of charge from ODDO BHF AM SAS or on its internet site am.oddo-bhf.com.
