Benchmark

Since: 01/01/2011

100% STOXX Europe Small 200 Total Return Net

The Fund is actively managed with deviation expected in term of constitution and performance compared to benchmark that is likely to be significant.

The performance of the fund can differ from the benchmark's performance.

The benchmark is not adapted to the social or environmental characteristics promoted by the fund.

Fund Manager

Françoise CESPEDES / Caroline MOLEUX - Co-Manager

Objective and investment strategy

To seek both long-term growth of your investment, in EUR, from an actively managed listed equity, equity-related securities and derivatives portfolio, and to apply an ESG approach.

"The Sub-Fund is actively managed and references STOXX Europe Small 200 Total Return Net (the "Benchmark") for comparative purposes only. The Investment Manager has full discretion over the composition of the portfolio of the Sub-Fund and can take exposure to companies not included in the Benchmark. There are no restrictions on the extent to which the Sub-Fund's portfolio and performance may deviate from the ones of the Benchmark. The Sub-Fund invests essentially in equities of small and medium capitalisation companies domiciled in Europe, while ensuring sector diversification. The Sub-Fund invests at least two thirds of its total assets in small cap companies listed on the European markets. The Sub-Fund may invest less than 25% of its total assets in Money Market Instruments and up to 10% of its assets in convertible and straight bonds. Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may be used only for efficient portfolio management purposes. The Sub-Fund promotes environmental and/or social characteristics by investing in securities that have implemented good practices in terms of managing their environmental impacts, governance and social (ESG) practices. Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies (<https://www.axa-im.com/our-policies>) and a "Best-in-universe" (type of ESG selection consisting of giving priority to the issuers in the investable universe best rated from a non-financial viewpoint, irrespective of their sector of activity, and accepting sector biases, because the sectors which are considered more virtuous on the whole will be more heavily represented) selectivity approach consisting in reducing the investable universe, by excluding issuers, based on a combination of AXA IM's Sectorial Exclusion and ESG Standards policies and their Environmental score, as described in the SFDR annex of the Sub-Fund. Secondly, the investment manager uses a strategy that combines macro-economic, sector and company specific analysis that relies on a rigorous analysis of the companies' business model, management quality, growth prospects and risk/return profile. As an example, the ESG criteria may be carbon footprint for the environmental aspect, management of human resources and gender equality for the social aspect, or remuneration policy for the governance aspect. The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different. AXA IM's ESG different methodologies described herein may evolve in the future to take into account any improvements in data availability and reliability, or any developments of regulations or other external frameworks or initiatives -among others. The Sub-Fund is actively managed in order to capture opportunities in the Euro zone equities market, by mainly investing in equities of companies that are part of the EURO STOXX Total Return Net benchmark index ("the Benchmark") universe. As part of the investment process, the Investment Manager has broad discretion over the composition of the Sub-Fund's portfolio and can take, based on its investment convictions, large overweight or underweight positions on the countries, sectors or companies compared to the Benchmark's composition and/or take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. Thus, the deviation from the Benchmark is likely to be significant. The Sub-Fund invests mainly in equities of large, medium and small

1st NAV date : 09/03/2001

Since 14/10/2013, the fund invests at least 75% in equities.

For more information about AXA IM, visit www.axa-im.be

sized companies based in the Eurozone. The Sub-Fund invests:- at least two thirds of its total assets in equities denominated in Euro- not more than one third in money market instruments and up to 10% in convertible and straight bonds- not more than 10% of its assets, in equities issued by companies not domiciled in the EurozoneThe Sub-Fund may invest in equity securities of any market capitalisation (including small and micro-sized companies).The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Risk Indicator

The information shown below is from the KID PRIIPS.

The risk indicator assumes you keep the product for 5 years.
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7 which is the a medium risk class. This rates the potential losses from future performance at a medium level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance & Risk

Past performance is not a reliable indicator of future results.

NAV data - in base 100 (in EUR) - Accumulation share

Past performances, and the past NAV data are not a reliable indicator as to future performance or future NAV data. Performance calculations and the NAV data are based on the NAV, net of management fees, dividends reinvested, out of fees and taxes for the investors.

Annual Calendar Performance (%)

Dividend Record

	Record-Date	Ex-Date	Dividend per Share	12 month Yield (%)
Dec 2019	27/12/2019	30/12/2019	0.48	0.27

12 Month Yield = (Sum of Dividends) / (Ending NAV). The 12 Month yield is calculated based on the sum of the distributions over the previous 12 months and the latest NAV. The 12 month yield may be higher or lower than the actual annual dividend yield. A positive distribution yield does not imply positive return. Dividends are not guaranteed. Past dividends are not indicative of future dividends.

Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including

1st NAV date : 09/03/2001

Since 14/10/2013, the fund invests at least 75% in equities.

the key facts statement) of the fund for further details including the risk factors.

ESG-metrics definition

The fund integrates ESG criteria (environment, social, governance) into its management. Managers have ESG scores ranging from 0 to 10 for each of the ESG criteria for a large part of the investment universe. These ESG scores are based on raw data provided by external providers such as MSCI, Ethifinance, Gaia, but also AXA IM's fundamental and qualitative analysis teams.

E pillar: an analysis is made of environmental risks such as vulnerability to climate change, natural capital (risk of water shortage, solid programs to preserve biodiversity if important impact on fragile ecosystems, raw materials used to reduce environmental impact), toxic emissions, hazardous waste, environmental regulations, ...

S pillar: quality in the social pillar is assessed by considering personnel management, human capital development, financial protection of consumers, product safety and quality, community relations, access to health services, finance,

G pillar: the general organization of companies is analyzed through the structure of the board of directors, the directors' remuneration, business ethics, fiscal transparency...

The absolute ESG rating is based on a weighted average of the absolute ESG scores of the assets in the portfolio. If the fund has obtained 1 tree (5 trees), it means that it belongs to the lowest (highest) absolute ESG rating category.

The relative ESG rating is the difference between the absolute ESG score of the portfolio and that of the benchmark index. If the relative ESG rating is mentioned in green, this means that the absolute ESG score of the portfolio is at least 3% higher than that of the benchmark index. If the relative ESG rating is mentioned in yellow, this means that the absolute ESG score of the portfolio is between -3% and + 3% to that of the benchmark index. If the relative ESG rating is indicated in orange, this means that the absolute ESG score of the portfolio is at least -3% lower than that of the benchmark index.

The CO2 relative intensity corresponds to the difference between the Carbon footprint of the portfolio (expressed in tCO2 / million \$ of revenue) and that of the benchmark index. If the CO2 relative intensity is indicated in green, this means that the carbon footprint of the portfolio is at least 10% lower than that of the benchmark index. If the CO2 relative intensity is indicated in yellow, this means that the carbon footprint of the portfolio is between -10% and + 10% to that of the benchmark index. If the CO2 relative intensity is indicated in orange, this means that the carbon footprint of the portfolio is more than 10% higher than that of the benchmark index.

To find out more about the integration of ESG criteria, the evaluation method, the ESG ratings and their scale, go to <https://private-investors.axa-im.be/fr/esg>. The ESG ratings are used for informational purposes only. The portfolio does not have regulatory nor contractual ESG objectives.

The fact that the fund obtains the ratings does not mean that it meets your sustainability objectives. For more information on this subject, please refer to www.fsma.be/fr/finance-durable or www.fsma.be/nl/duurzame-financiering.

The decision to invest in the promoted fund should take into account all the characteristics of the fund in question.

Fund Profile

ESG Rating

ESG Relative Rating

CO2 Relative rating

% of AUM covered by ESG absolute rating: Portfolio = 98.7% Benchmark = 100.0% (not meaningful for coverage below 50%)

% of AUM covered by CO2 intensity indicator: Portfolio = 98.7% Benchmark = 98.9% (not meaningful for coverage below 50%)

Towards Sustainability label

The subfund is a sustainable investment product in accordance with the standards defined by Febelfin.

For more information on sustainable products, please consult <https://www.towardsustainability.be/en/quality-standard>.

The label is awarded for one year and reviewed annually.

The label does not mean that the sub-fund meets your individual sustainability targets or future national and European regulations. Further information on this subject can be found at www.fsma.be/fr/finance-durable or www.fsma.be/nl/duurzame-financiering.

'Nominee'-structure**	Applicable according to the choice of the distributor. Fee applicable according to the distributor
Swing pricing***	2% max of the NAV

*See fee schedule from each distributor.

**The shares of the shareholders are registered in a securities account under their own name at the 'Nominee'. Then all shareholders of shares are globally registered on an investors 'nominee'-account in the shareholders register of the sub-fund.

***The swing pricing mechanism consists in adjusting a fund share price to subscriptions / redemptions up (in case of positive net flows) or down (in case of negative net flows) for a given dealing day, to counter the trading costs incurred by large in- or outflows, thus preserving the fund performance.

As disclosed in the most recent Annual Report, the ongoing charges calculation excludes performance fees, but includes management and applied services fees. The effective Applied Service Fee is accrued at each calculation of the Net Asset Value and included in the ongoing charges of each Share Class. The investment will be reduced by the payment of the above mentioned fees.

Subscription Redemption

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors. The Net Asset Value of this Sub-Fund is calculated on a daily basis.

How to Invest

Before making an investment, investors should read the relevant Prospectus and the Key Investor Information Document (particularly for UK investors) / Key Information Document / scheme documents, which provide full product details including investment charges and risks. The information contained herein is not a substitute for those documents or for professional external advice.

Retail Investors

Retail investors should contact their Financial intermediary.

Disclaimers

This marketing communication does not constitute on the part of AXA Investment Managers a solicitation or investment, legal or tax advice. This material does not contain sufficient information to support an investment decision. The information contained herein is intended solely for the entity and/or person(s) to which it has been delivered, unless otherwise allowed under applicable agreements.

The tax treatment associated with holding, buying or disposing of shares or units in a fund depends on the status or tax treatment of each investor and may be subject to change. Potential investors are strongly encouraged to seek the advice of their own tax adviser.

Due to its simplification, this document is partial and opinions, estimates and forecasts herein are subjective and subject to change without notice. There is no guarantee forecasts made will come to pass. Data, figures, declarations, analysis, predictions and other information in this document is provided based on our state of knowledge at the time of creation of this document. This material does not contain sufficient information to support an investment decision.

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding. Commissions and costs have an adverse effect on the performance of

1st NAV date : 09/03/2001

Specific characteristics (Continued)

the fund.

The Fund's characteristics do not protect the investors from the potential effect of inflation over time. The investments and/or any potential income generated during the period will not be adjusted by the rate of inflation over the same period. Thus, the return on the fund adjusted from the rate of inflation could be negative. Consequently, the inflation might undermine the performance and/or the value of your investment.

The Fund referenced herein has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly in the United States or to any US Person unless the securities are registered under the Act, or an exemption from the registration requirements of the Act is available. A US Person is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).

The fund or sub fund is a part of AXA World Funds. AXA WORLD FUNDS 's registered office is 49, avenue J.F Kennedy L-1885 Luxembourg. The Company is registered under the number B. 63.116 at the "Registre de Commerce et des Sociétés" The Company is a Luxembourg SICAV UCITS IV approved by the CSSF and managed by AXA Investment Managers Paris, a company incorporated under the laws of France, having its registered office located at Tour Majunga – La Défense 9 – 6, place de la Pyramide – 92800 Puteaux, registered with the Nanterre Trade and Companies Register under number 353 534 506, and a Portfolio Management Company, holder of AMF approval no. GP 92-008, issued on 7 April 1992.

For the purposes of presenting the breakdown by country, sector, principal exposures and active strategies, equities and similar instruments relating to a single company (ADRs, GDRs, RSPs, rights, etc.) are grouped in order to form a single exposure for the said company.

The geographical breakdown is based on the country classification as published by the index provider (or the main index provider in case of a composite benchmark). The second available source is the Country ISO from Bloomberg (or Ultimate Country of risk for Emerging fund).

Annual turnover rate : Sum the last 12 monthly results to obtain the turnover rate over 1 rolling year, calculated according to the following formula: $(\text{abs}(\text{purchase}) + \text{abs}(\text{sale}) - \text{abs}(\text{subscription} - \text{redemption})) / (2 * \text{average AUM})$.

Purchase and sale exclude derivatives, short term instruments and some corporate actions.

Subscription and redemption are netted on a monthly basis, impact of inflows and outflows can result in negative turnover which does not reflect portfolio turnover, therefore annual turnover has a floor of 0.

Companies shown are for illustrative purposes only at the date of this report and may no longer be in the portfolio later. It does not constitute investment research or financial analysis relating to transactions in financial instruments, nor does it constitute an offer to buy or sell any investments, products or services, and should not be considered as solicitation or investment, legal or tax advice, a recommendation for an investment strategy or a personalized recommendation to buy or sell securities.

Belgian Tax on Savings : The physical person investing in the Fund will be subject to the withholding tax rate of 30% on dividends distribution (distribution class) and/or on the gain when redeeming accumulating shares (accumulating and/or distribution class) in the Fund

- holding more than 25% in debt securities if the physical person acquired the share before January 1st, 2018 or
- holding more than 10% in debt securities if the physical person acquired the shares from January 1st, 2018.

ICB

Industry Classification Benchmark (« ICB ») is a product of FTSE International Limited (« FTSE ») and all intellectual property rights in and to ICB vest in FTSE. AXA IM has been licensed by FTSE to use ICB. « FTSE » is a trade mark of London Stock Exchange and The Financial Times Limited and is used by FTSE under licence. FTSE and its licensors do not accept any liability to any person for any loss or damage arising out of any error or omission in ICB.

Glossary

Utilities : utility companies are organizations providing public services such as the production or distribution of electricity, the distribution and transmission of natural gas and water supplies.

Cons.disc. : includes automotive, durable consumer goods, media and distribution. These are sectors that are changing cyclically, in line with economic conditions.

Cons.stap. : includes companies selling basic goods and services (food, personal hygiene, household products, tobacco).

Small Caps : <5 bln €

Mid Caps : 5 bln € - 10 bln €

Large Caps : >10 bln €

Active share: Measures the difference between the portfolio's composition and the one of its benchmark index. It is based on the portfolio's weighting in relation to the index.

Active sector/regional exposure: Difference between the fund's weighting and its index, expressed as a percentage.

Volatility (%): is an indicative measure of degree of variation of an asset's price changes over time.

Relative Risk/Tracking Error (%): measures, in standard deviation, the fluctuation of returns of a portfolio relative to the fluctuation of returns of a reference index. The tracking error can be viewed as an indicator of how actively a fund is managed. The lower the number the closer the fund's historic performance has followed its benchmark.

Sharpe ratio: is the measure of the risk-adjusted excess return over risk

free rate of a financial portfolio and is used to compare the excess return of an investment to its risk. The higher the Sharpe ratio the better the return compared to the risk taken.

Information Ratio (IR): is a measurement of portfolio returns above the returns of a benchmark to the volatility of those excess returns. The IR is used to compare excess return over a benchmark to excess risk over a benchmark. E.g : A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance who has taken more risk.
