The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Latin America Equity, a Subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "I Capitalisation" - ISIN code LU0102008223

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The Fund seeks to increase the value of its assets over the medium term by investing in shares issued by Latin American companies, and/or companies operating in those countries.

It is actively managed and as such may invest in securities that are not included in the index which is MSCI EM Latin America 10/40 (NR). Due to the active approach of the investment manager, the performance objective of the sub-fund is to outperform the benchmark.

The investment philosophy is based in a long term bottom-up approach taking into consideration the financial structure of companies with superior earnings growth and sound profitability, quality of the management, sustainable growth and others. The selection approach is based on an assessment of critical factors such as valuation multiples, earnings growth and cash flow generation. Alongside, a top down overlay approach is used to identify companies operating in sectors/countries with strong long term macroeconomic fundamentals. Opportunities are sought everywhere in the Latin America investment universe, whether inside or outside of the index, with no particular constraints other than liquidity.

Nevertheless, when certain market's circumstances justify it in order to preserve the overall liquidity of the sub-fund, the asset manager will focus on the most tradable equities, the composition of the portfolio could get closer to that of the benchmark. Such circumstances are related to emerging markets inefficiencies, such as liquidity issues and severe FX devaluations during global instabilities, irrational speculative attacks towards emerging markets, and electoral periods in which prices are chiefly driven by political news-flow rather than fundamentals.

The investment team applies also BNP PARIBAS ASSET MANAGEMENT Sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria in the investments of the Fund.

Income are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) unless the Sao Paulo stock exchange is closed.

Risk and Reward Profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment mainly in Stocks and Shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the "Investment risks" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.
