Investment overview

OBJECTIVE
To increase the value of your investment.
REFERENCE INDEX
MSCI Europe (EUR), an index that does not take into account environmental, social and governance (ESG) factors. Used for portfolio composition, risk monitoring, performance objective and performance measurement.
PORTFOLIO ASSETS
The Compartment mainly invests in equities of companies that are domiciled, or do most of their business, in Europe and apply sustainable development principles to their business.
INVESTMENT PROCESS
In actively managing the Compartment, the investment manager uses a quantitative approach to select securities that it believes offer superior financial and sustainable characteristics. The investment manager considers ESG factors a core element of its strategy by adopting a best in class approach which seeks to invest in securities of issuers with low sustainability risks while avoiding those with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 8. The performance of the Compartment is likely to be significantly different from that of the benchmark, because the Investment Manager has significant discretion to deviate from its securities and weightings.

Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.
