Sustainable Europe Value, a subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "I Capitalisation" - ISIN code LU0177332904
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund seeks to increase the value of its assets over the medium term by investing in shares undervalued as compared to the market on the purchase date, issued by socially responsible European companies.
It is actively managed and as such may invest in securities that are not included in the index which is MSCI Europe Value (NR).
The investment team applies also BNP PARIBAS ASSET MANAGEMENT's sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria such as but not limited to reduction of emissions of greenhouse gas, respect of human rights, respect of minority shareholders rights, at each step of the investment process of the Fund.
The Fund follows the Enhanced ESG approach which means that the Fund implements more explicit ESG tilts (Invest in the most sustainable companies according to specific criteria and/or incorporating a wider range of exclusions) leading to more stringent ESG and/or Carbon performance targets.
The approach is implemented in order to consistently achieve a portfolio's ESG score higher than the ESG score of the index after eliminating at least 20% of the least well-rated securities.
An extra-financial strategy may comprise methodological limitations such as the ESG Investment Risk as defined by the asset manager.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- Operational and Custody Risk: Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
