

The Fund is managed by Goldman Sachs Asset Management Fund Services Limited (the “Manager”), part of Goldman Sachs group of companies.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

- **Market risk** - the value of assets in the Fund is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Fund may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund's ability to meet redemption requests on demand.
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Fund's assets can result in loss to the Fund.
- **Interest rate risk** - when interest rates rise, bond prices fall, reflecting the ability of investors to obtain a more attractive rate of interest on their money elsewhere. Bond prices are therefore subject to movements in interest rates which may move for a number of reasons, political as well as economic.
- **Credit risk** - the failure of a counterparty or an issuer of a financial asset held within the Fund to meet its payment obligations will have a negative impact on the Fund.

- For more detailed information on the risks associated with an investment in the Fund, please refer to the section in the Prospectus entitled "Risk Considerations" and discuss with your professional advisers.
