What Does the Risk and Reward Profile show?
The risk/reward profile of the Share Class shows the variation in value that an investment in this Share Class has undergone. The Share Class's position on this scale is a reflection of the risk inherent in the Share Class under past market conditions. It does not reflect the risk inherent in any future circumstances or events that differ from what the Share Class has experienced in the past. Changes in the alignment of the Share Class within the boundaries set by the Sub-Fund's investment policy may also impact the risk/reward profile of the Share Class. In view of this, the risk rating of the Share Class may change in the future. Please note that higher possible gains generally also imply higher possible losses. The lowest risk rating does not mean that the Share Class is free of risk.

Why is the Share Class in this Category?
The Share Class is categorized as a 6 because the Sub-Fund is primarily invested in equities in a wide variety of markets. The Sub Fund is also exposed to specific movements in regional equity markets.

What are the other risks?
The risk/reward profile is a reflection of the risk inherent in the Sub-Fund under past market and operational conditions. It does not reflect the risk to which the Sub-Fund may be exposed in the case of extraordinary future events that differ from anything the Share Class has experienced in the past; nor does it reflect the risk due to operational failure or other risks that are beyond the control of the Sub-Fund and affect the investments of the Sub-Fund, such as legal and political risks, an unforeseeable drop in liquidity or the failure of counterparties. The Sub-Fund's investment in equity securities of companies in emerging markets may involve a high degree of risk and may be considered speculative. In addition, restrictions on currency convertibility, limitations of property rights or other political risks may affect the Sub-Fund.
