This fund is managed by MFS Investment Management Company (Lux) S.à r.l.

ISIN: LU0219497285

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is total return that exceeds the rate of inflation as measured in the U.S. over the long term, measured in U.S. dollars.

Investment Policy

The fund invests primarily in U.S. Treasury inflation-adjusted debt instruments, but may also invest in (i) inflation-linked swaps, (ii) inflation-adjusted debt instruments issued by other U.S. and foreign government and corporate entities and (iii) non-inflation-adjusted debt instruments, including corporate bonds and securitized instruments. The Investment Manager may consider environmental, social and governance (ESG) factors in its fundamental investment analysis alongside other factors. The fund falls within Article 6 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") and does not promote an environmental or social characteristic, or have sustainable investment as its objective. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

The fund's benchmark, Bloomberg U.S. Treasury Inflation Protected Securities Index (USD), is indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant, however, factors such as a low volatility environment, high correlation among issuers or lack of attractive investment opportunities outside the benchmark may limit the fund's ability to achieve performance differentiation versus the benchmark for a given period.

Distributions

Income (net of fund expenses) will be distributed to shareholders.

Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Debt instruments represent obligations of corporations, governments, and other entities to repay money borrowed.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

1	2	3	**4**	5	6	7

Lower risk — Typically lower rewards

Higher risk — Typically higher rewards

The fund is in category 4 because there has been medium fluctuations in the fund's return historically.

Debt Instruments Risk: Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of its investments, and to issuer, market, economic, industry, political, geopolitical, public health, and regulatory conditions. These risks may be higher where the fund invests in a smaller number of issuers. The fund invests in U.S. Treasury inflation-adjusted debt instruments, which may pay unpredictable interest rates based on the level of inflation. The fund's performance will be closely tied to factors affecting the U.S. government. In addition, instruments subject to prepayment and/or extension can reduce the potential for gain if the instrument is prepaid or loss if the maturity of the instrument is extended.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.

CHARGES

You pay the following costs for the marketing, distribution, and operation of the fund. These charges reduce the value of your investment.

One-off charges taken before or after you invest

Entry charge.....0.00%

Exit charge.....1.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges.....2.08%

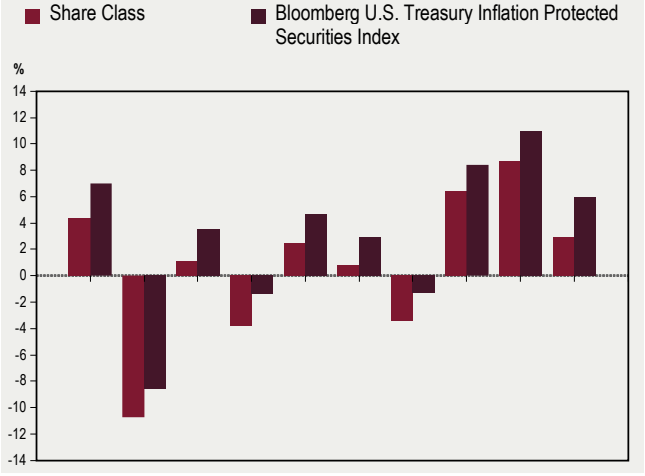

Charges taken from the fund under certain specific conditions

Performance fee.....0.00%

The entry and exit charges shown are the highest possible charges you would pay. Please consult your financial intermediary to find out your actual charges which might be less.

The ongoing charges figure shown here is based on annualised expenses for the six month period ended 31 July 2021. Ongoing charges may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the prospectus, which is available at meridian.mfs.com.
