

Investor Class Accumulation Shares

Fund Description

The High Yield Bond Fund seeks to maximise total return and limit risk with an emphasis on upper tier US high yield bonds. The fund invests at least two-thirds of its assets in a diversified portfolio of US high yield bonds rated lower than Baa by Moody's or BBB by S&P, with a maximum of 20% of its assets in securities rated lower than B.

Investor Benefits

This fund offers compelling diversification benefits and the opportunity to gain exposure to different sectors of the economy.

The Fund Advantage

The fund employs PIMCO's fundamental research process, including top-down economic views, bottom-up security selection and extensive global resources.

Risk Profile

Share value can go up as well as down and any capital invested in the Fund may be at risk. The Fund may invest in non-U.S. and non-Eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The Fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Key Investor Information Document.

High Yield Bond Fund EUR (Hedged)

AS OF: 31 OCT 2012

Europe represents European Union instruments that cannot be separated by specific country.

About the Benchmark

BofA Merrill Lynch U.S. High Yield, BB-B Rated, Constrained (Euro Hedged) Index tracks the performance of BB-B Rated U.S. Dollar-denominated corporate bonds publicly issued in the U.S. domestic market. Qualifying bonds are capitalization-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. It is not possible to invest directly in an unmanaged index.
