

Schroder International Selection Fund Hong Kong Dollar Bond

A Distribution HKD | Data as at 31.03.2024

Fund objectives and investment policy

The fund aims to provide capital growth and income over a three to five year period by investing in fixed and floating rate securities denominated in HKD.

Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KID.

This fund does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). Any references to the integration of sustainability considerations are made in relation to the processes of the investment manager or the Schroders Group and are not specific to the fund.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Risk considerations

Bond Connect risk: The fund may be investing in the China Interbank Bond Market via the Bond Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk (including Onshore renminbi): The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses. Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Capital risk / distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.
