

# HSBC Global Investment Funds

## TURKEY EQUITY

Monthly report - 30 April 2021

**HSBC**  
Global Asset  
Management

### Share class AC

#### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Turkish shares.

#### Investment strategy

In normal market conditions, the Fund will primarily invest in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Turkey. See the Prospectus for a full description of the investment objectives and derivative usage.

#### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

## Risk Disclosure

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the Fund's potential risks can be found in the Key Investor Information Document and Prospectus.
