Potential investors are advised to read the Prospectus for the Fund, dated 2 November, 2007 and the relevant Supplement for the Sub-Fund, dated 2 November, 2007, 2007 (the "Prospectus") before making an investment decision. The rights and duties of the investor as well as their legal relationship with the Fund and the Sub-Fund are outlined in the Prospectus. Defined terms used herein will have the same meaning as set out in the Prospectus.

The Base Currency of the Sub-Fund is US Dollars.

<p>Investment Objective:</p>	<p>The investment objective of the Sub-Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing.</p> <p>The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.</p>
<p>Investment Policy:</p>	<p>The Investment Manager believes that performance of equities over longer periods of time is driven by the progression of earnings. The Sub-Fund will strive to add value by identifying stocks with superior sustainable earnings performance. The stock selection will also be influenced by valuation levels, but only to the extent that factors have been identified which are expected to drive valuation potential to be realised in terms of earnings progression.</p> <p>On a regional basis, the investment universe is categorised according to growth potential. This classification process incorporates the background of each company's historical growth patterns, resulting in an informed assessment of future prospects.</p> <p>Companies in the investment universe will be classified as follows:-</p> <ol style="list-style-type: none"> 1. Exceptional growth prospects (normally, relatively new companies or companies going through radical transformation). 2. High and stable growth.

3. High but cyclical growth.
4. Low or no growth, which are sub-divided into (a) stable, (b) cyclical and (c) turn-around situations.

Distinct quantitative and qualitative criteria are used for buy and sell decisions.

The Sub-Fund may, within the limits laid down by IFSRA, invest in equity and equity-related securities including but not limited to common stock, preferred stock and securities which are convertible into or exchangeable for such equity securities, or which carry warrants to purchase such equity securities.

The Sub-Fund may, within the limits laid down by IFSRA, purchase and sell equity index and equity-related instruments including but not limited to Low Exercise Price Options (LEPO's), Optimized Portfolios as Listed Securities (OPALS), Performance Linked to Equity Securities (PERLES), participatory receipts / participatory certificates, share index notes and share index futures notes, each of which may assist in achieving the investment objective of the Sub-Fund. Where utilised, LEPO's, OPALS and PERLES will be listed or traded on one or more of the stock exchanges or recognised markets on which the Sub-Fund is permitted to invest, as set out in Appendix II to the Prospectus. These instruments shall in each case comprise transferable securities of the issuer, notwithstanding that their value is linked to an underlying equity or equity index. In practice, the Sub-Fund will purchase such instruments from an issuer and the instrument will track the underlying equity or equity index. It should be noted that the Sub-Fund's exposure in relation to these instruments will be to the issuer of the instruments. However, the Sub-Fund will also have an economic exposure to the underlying securities themselves. Any LEPO's purchased or sold by the Sub-Fund will be exercisable at any time over the duration of its life and may be settled on a cash basis.

The Sub-Fund may invest in American, International, and Global Depository Receipts (ADR's / IDR's / GDR's) which are listed on a Recognised Exchange as set out in Appendix II to the Prospectus. Such investments must be in accordance with the investment objective, investment policy and investment restrictions of the Sub-Fund.

The Sub-Fund may invest up to 10% of its Net Asset Value in exchange traded funds and in regulated collective investment schemes, including real estate investment trusts (REITS), where the investment policies of these funds or schemes are consistent with that of the Sub-Fund and such funds or schemes are subject to a similar regulatory regime to that imposed by IFSRA on collective investment schemes domiciled in Ireland. The ability to trade REITS in the secondary market can be more limited than other stocks. The liquidity of REITS on the major US stock exchanges is on average less than the typical stock quoted on the S&P 500 Index.

The Sub-Fund may, within the limits laid down by IFSRA, hold cash and/or ancillary liquid assets and may invest in money market instruments (as defined in IFSRA's Notices and which may or may not be dealt on a regulated market), which are rated investment grade by an international rating agency. Such money market instruments may include but are not limited to non-government short term obligations (such as fixed or floating rate commercial paper), obligations of banks or other depository institutions (such as certificates of deposit and bankers acceptances), securities issued or otherwise backed by supranational organisations or by sovereign governments, their agencies, their instrumentalities and political sub divisions.

The Sub-Fund may, within the limits laid down by IFSRA, hold deposits with credit institutions as prescribed in IFSRA's Notices.

The Sub-Fund may also engage in forward foreign exchange contracts for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by IFSRA. The Sub-Fund may also hedge currency exchange risk by entering into forward, futures and currency swap contracts and purchasing and selling put or call options on foreign currency and on foreign currency futures contracts within the limits set out by IFSRA. Because currency positions held by the Sub-Fund may not correspond with the asset position held, the performance may be strongly influenced by movements in the FX exchange rates.

The performance of the Sub-Fund's portfolio of investments will be measured against the Standard & Poors 500 Total Return Index (the "Index"). The Index is a total return, market-weighted index, representing the aggregate market value of the common equity of 500 stocks traded on the New York Stock Exchange.

The Investment Manager may consider that, where the Sub-Fund's portfolio make up is different to that of the Index, it is necessary or desirable to replicate the currency exposure of the Index and therefore the Investment Manager is entitled to alter the currency exposure characteristics of certain of the assets held within the Sub-Fund through the use of forward and futures currency contracts so that, whilst its own determination of portfolio make up may be reflected in the actual portfolio make up, the currency exposure can reflect that of the Index.

The Investment Manager is, however, entitled at any time to change the Index where, for reasons outside the Investment Manager's control, the Index has been replaced by another index or where another index may reasonably be considered by the Investment Manager to have become the industry standard for the relevant exposure. Unitholders will be advised of any change in the Index in the next annual or half-yearly report of the Sub-Fund.

The Sub-Fund will not be leveraged as a result of engaging in forward foreign exchange contracts, forward, futures and swap currency contracts, call options on foreign currency or foreign currency futures contracts.

Any changes to the investment objective of the Sub-Fund and any material changes to the investment policy may not

	<p>be made without approval on the basis of a majority of votes cast at a general meeting of Unitholders of the Sub-Fund. Any such changes may not be made without the approval of IFSRA. In the event of a change in investment objective and/or a change to the investment policy, a reasonable notification period will be provided by the Manager to enable Unitholders redeem their Units prior to implementation of such change.</p> <p>The Sub-Fund will be managed so as to be fully invested, other than during periods where the Investment Manager believes that a larger cash position is warranted.</p> <p>The Sub-Fund's investments are subject to the investment restrictions as set out in the section headed "Investment Restrictions".</p> <p>No assurance can be given that the Sub-Fund's investment objective will be achieved.</p> <p>The Manager will, on request, provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the investments.</p> <p>It is not the current intention of the Sub-Fund to use financial derivative instruments for investment purposes. Should this intention change the Prospectus and this Supplement shall be amended accordingly.</p> <p>A list of the stock exchanges and markets in which the Sub-Fund is permitted to invest, in accordance with the requirements of IFSRA, is contained in Appendix II to the Prospectus and should be read in conjunction with, and subject to, the Sub-Fund's investment objective and investment policy, as detailed above. IFSRA does not issue a list of approved markets. With the exception of permitted investments in unlisted securities, investment will be restricted to those stock exchanges and markets listed in Appendix II to the Prospectus.</p>
<p>Risk Profile:</p>	<p>Potential investors should be aware that the value of Units in the Sub-Fund can fall as well as rise. An investor may receive back less than his/her investment.</p> <p>Please consult the Prospectus under the heading "Risk Factors" together with the relevant supplement for the Sub-Fund for a more detailed analysis of the risk profile of the Sub-Fund. Principal risk factors outlined in the Prospectus are; Accounting Standards Risk, Co-Management of Assets, Credit Default Swap Risk, Currency Risk, Emerging Markets Risk, Exchange Rate Risk, Forward Exchange Contract Risk, Interest Rate Risk, Investment Return, Legal Infrastructure, Liquidity Risk, Market Risk, Non-Convertibility of Currency, Political and/or Regulatory Risks, Remittance of Principal and Investment Income, Reliability of Information, Settlement Risk, Stocklending Risk, Sub-Custody Risk, Unit Currency Designation Risk and Valuation Risk.</p>
