

# Schroder International Selection Fund Emerging Markets Debt Absolute Return

I Accumulation EUR Hedged | Data as at 31.03.2020

## Fund objectives and investment policy

The fund aims to provide an absolute return of capital growth and income after fees have been deducted by investing in bonds in emerging markets. Absolute return means the fund seeks to provide a positive return over a 12 month period in all market conditions, but this cannot be guaranteed and your capital is at risk. The fund is actively managed and invests at least two-thirds of its assets in bonds, currencies and money market instruments in emerging markets. The bonds are issued by governments, government agencies and companies. The fund may also hold cash. In aiming to deliver an absolute return, the fund may hold up to 40% of its assets in cash and money market instruments in developed markets. The fund may invest in excess of 50% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds and warrants. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

## Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

Exchange rate movements may cause the value of investments to fall as well as rise. The performance shown does not take account of any commissions, entry or exit charges.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The fund's performance should be assessed against its objective of providing a positive return over a 12-month period in all market conditions.

The Benchmark performance is shown in the base currency of the fund. To enable comparison between the performance of this Hedged share class and the Benchmark, and to show the effect of the currency hedge, the equivalent unhedged base currency share class performance is also shown.

The equivalent unhedged share class and benchmark will be blank if the inception date is different to the hedged share class inception date. This fund aims to achieve an absolute return and is therefore not managed to a specific benchmark. With effect from 01.06.2008 Schroder ISF Emerging Markets Debt changed its name to Schroder ISF Emerging Markets Debt Absolute Return.

## 5 year return of EUR 10.000

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

## Synthetic risk & reward indicator (SRRI)

### LOWER RISK

Potentially lower reward

### HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

## Risk considerations

---

**Currency risk/hedged share class:** The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

**Credit risk:** A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

**Currency risk:** The fund may lose value as a result of movements in foreign exchange rates.

**High yield bond risk:** High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

**Derivatives risk – Efficient Portfolio Management and Investment Purposes:** Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

**Interest rate risk:** The fund may lose value as a direct result of interest rate changes.

**Emerging Markets & Frontier risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

**No capital guarantee:** Positive returns are not guaranteed and no form of capital protection applies.

**Counterparty risk:** The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

**Issuer risk:** The fund is permitted to invest more than 35% of its scheme property in transferable securities and money market instruments issued or guaranteed by an EEA State / governments of the following countries: United States

**Performance risk:** Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

**IBOR:** The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.
