

Robeco European High Yield Bonds IH EUR

Robeco European High Yield Bonds is an actively managed fund that invests in bonds with a sub-investment grade rating, issued primarily by European and US issuers. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth. The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield (BB/B). Performance drivers are the top-down beta positioning as well as bottom-up issuer selection.

Performance

Indexed value (until 31-03-2024) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 0.26%.

In March, the euro high yield bond index recorded a total return of 0.21%. Excess returns were a small positive and underlying government bonds widened a few bps. The fund outperformed the benchmark by 11 bps. Issuer selection contributed 7 bps whereas beta positioning also added to the performance. The BB category was a clear outperformer, mainly driven by a few blow ups in the lower credit quality category in bonds from Intrum, Altice and Ardagh. Our underweight in Altice France, especially the unsecured part of the debt structure, resulted in a positive contribution to performance. During the company's earnings call in March, the management of Altice France lowered its guidance and indicated it would seek potential haircuts for bond holders in order to reduce its elevated debt load. Our overweight in packaging company Ardagh detracted from performance. The company's financial metrics have been deteriorating as the packaging sector is going through a cyclical downturn. The situation worsened in March 2024, when press releases came out indicating that the company had hired financial and legal advisors to address its debt structure.

Market development

March marked spreads widening in the Euro high yield market, with spreads widening by 8 bps to reach a total of 319 bps. Concurrently, the yield-to-worst declined to 6.99%. Earnings season has started and seems to be in-line with expectations. Economic data, especially from the US, is still very supportive: decent wage growth and low unemployment. This is also the reason why inflation data is coming in slightly higher than expected. Meanwhile in Europe, growth is flat and close to zero, but PMIs continued to rise creating some positive sentiment around growth. Prior to the Fed statement, ECB President Christine Lagarde had commented that the central bank will not be able to commit to a specific interest rate reduction path, reinforcing the idea that the two main central banks are reluctant to decouple their monetary policies. At the moment, June is seen as the most likely timing for a first Fed cut. March gross supply totaled EUR 11.3 bln, which is the highest level since October 2021. However, net supply was a more modest EUR 1.8 bln and in addition to EUR 10.8 bln of net Rising Stars, the index shrunk a further 1.7% when including financials and 2.2% when excluding financials.

Expectation of fund manager

The ideal scenario for credit appears to be materializing, characterized by declining inflation and the likely avoidance of a recession in the US. Credit markets have wholeheartedly embraced this narrative and are to a large extent priced for perfection. Demand for credit has been robust, as evidenced by significant inflows into credit strategies from both institutional and retail investors. While we acknowledge the high probability of the consensus scenario, we remain mindful of the fragility of sentiment and the ever-present risks in a changing world. With current tight valuations and risk positioning, there is ample room for disappointment. While the US economy has shown remarkable resilience, the European economy is less robust. There are many sectors where companies are facing increasing difficulty to pass on higher labor costs. In the European high yield market we have seen an increase in distressed situations where some companies are now struggling to refinance upcoming maturities. Creditor-unfriendly debt restructurings are on the rise. This is the environment in which issuer selection is key. It is important to firmly hold on to our quality tilt and accept a beta below 1.

Top 10 largest positions

Our top ten holdings consist mostly of companies in the automotive and telecommunications sectors. In the automotive sector, we have large positions in ZF Industries, Forvia (formerly called Faurecia) and Renault. In large communications names, we are underweight in Cellnex and overweight in Virgin Media. Other top holdings are in healthcare research provider IQVIA and vehicle rental company Avis.

Fund price

31-03-24	EUR	267.75

Changes

Before April 2009 the benchmark was the Barclays Pan-European High Yield Corporate 2.5% Issuer Cap (Hedged into EUR)

Sector allocation

The fund currently has overweights in less cyclical sectors such as packaging and chemicals along with an off-benchmark position in financials. Additionally, there are overweights in the cyclical automotive sector and in healthcare. On the other hand, the fund holds underweights in cyclical sectors like retail, supermarkets and transportation, but also in communications.

Sector allocation		Deviation index
Consumer Non Cyclical	16.5%	0.6%
Consumer Cyclical	16.3%	-11.3%
Capital Goods	15.4%	6.7%
Communications	14.1%	-9.9%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds, and engagement. The fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile. Furthermore, the fund invests at least 2% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement.

The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on Bloomberg Pan-European HY Corporate ex Financials 2.5% Issuer Constraint index.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2024 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco’s SDG Framework. The framework utilizes a three-step approach to assess a company’s impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight	Index weight
Green Bonds	6.70%	7.12%
Social Bonds	0.00%	0.00%
Sustainability Bonds	0.00%	0.74%
Sustainability-Linked Bonds	2.32%	6.26%

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company’s SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	4.73%	12	27
Environmental	0.62%	4	12
Social	0.67%	2	6
Governance	0.00%	0	0
Sustainable Development Goals	1.95%	3	6
Voting Related	1.48%	3	3
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco European High Yield Bonds is an actively managed fund that invests in bonds with a sub-investment grade rating, issued primarily by European and US issuers. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth. The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield (BB/B). Performance drivers are the top-down beta positioning as well as bottom-up issuer selection.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement.

The majority of bonds selected will be components of the benchmark, but bonds outside the benchmark may be selected too. The fund can deviate substantially from the weightings of the benchmark. The fund aims to outperform the benchmark over the long run, while still controlling relative risk through the application of limits (on currencies and issuers) to the extent of the deviation from the benchmark. This will consequently limit the deviation of the performance relative to the benchmark. The benchmark is a broad market-weighted index that is not consistent with the ESG characteristics promoted by the fund.

Fund manager's CV

Roeland Moraal is Portfolio Manager High Yield in the Credit team. Before assuming this role, he was Portfolio Manager in the Robeco Duration team and worked as an Analyst with the Institute for Research and Investment Services. Roeland started his career in the industry in 1997. He holds a Master's in Applied Mathematics from the University of Twente and a Master's in Law from Erasmus University Rotterdam. Daniel de Koning is Portfolio Manager High Yield in the Credit team. Prior to joining Robeco in 2020, he was Portfolio Manager High Yield at NN Investment Partners. Daniel started his career in 2011 at APG Asset Management, where he held roles of Credit Analyst and Portfolio Manager High Yield. He holds a Master's in Business Economics from the University of Amsterdam and he is a CFA® and CAIA® charterholder. Sander Bus is CIO and Portfolio Manager High Yield Bonds in the Credit team. He has been dedicated to High Yield at Robeco since 1998. Previously, Sander worked for two years as a Fixed Income Analyst at Rabobank where he started his career in the industry in 1996. He holds a Master's in Financial Economics from Erasmus University Rotterdam and he is a CFA® charterholder. Christiaan Lever is Portfolio Manager High Yield and Emerging Credits in the Credit team. Before assuming this role in 2016, he was Financial Risk Manager at Robeco, focusing on market risk, counterparty risk and liquidity risk within fixed income markets. Christiaan has been active in the industry since 2010. He holds a Master's in Quantitative Finance and in Econometrics from Erasmus University Rotterdam.

Team info

The Robeco European High Yield fund is managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts. The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by three dedicated quantitative researchers and four fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.01% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.
