### What is this Product?

The Fund is constituted in the form of a mutual fund, domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier ('CSSF').

### Investment Objective and Investment Policy

#### Investment Objective

To achieve long term capital growth through investment worldwide in companies that are responding positively to the challenge of environmental sustainability and climate change.

#### Investment Policy

The Fund will invest primarily in worldwide equity and equity related securities (including listed preference shares, listed convertible unsecured loan stock, listed warrants and other similar securities). The portfolio will principally comprise of companies considered by the Investment Manager to provide products or services which contribute to environmental improvement, facilitate adaptation to the impacts of climate change or help mitigate the impacts of climate change.

The use of financial derivative instruments, including options, futures, portfolio swaps, forward currency contracts, is restricted to hedging and efficient portfolio management purposes only. Efficient Portfolio Management is used for either the reduction of risk or reduction of the cost for the Fund. There may be significant periods of time where there is no use of derivatives for efficient portfolio management at all.

Financial derivative instruments will not be used either extensively or primarily in order to achieve the Fund's investment objectives or for investment purposes. Nor will financial derivative instruments be used with the objective of introducing gearing into the Fund's investment portfolio.

## Investment Objective and Investment Policy *continued*

### Investment Style

The Fund has a thematic global growth bias and typically invests in businesses which provide an environmental solution. Its three investment themes are: environmental infrastructure, resource optimisation and demographics.

The Investment Manager takes a bottom-up, stock selection approach to investment, looking for businesses with strong growth potential. Every stock within the portfolio is there on the Investment Manager's view of its own fundamental merits. For each potential holding, the Investment Manager will assess the potential for its products or services, the strength of its management team and growth dynamics of its underlying market. The strength of these three aspects

of a company drives his conviction in a business as a potential holding within the portfolio.

Given this focus on emerging growth, the portfolio tends to be skewed towards small and mid cap stocks. The Investment Manager typically maintains a diversified portfolio to aim to mitigate stock specific risk.

The Fund does not seek to replicate the performance of the Benchmark (i.e. FTSE World Series World Index (Total Return)). The Fund's performance and constituents of its investment portfolio may vary from those of its Benchmark.

## What are the Key Risks?

**Investment involves risks. The key risks associated with the Fund are set out below.**

**Please refer to the offering documents for details of all the risk factors.**

### 1. General investment risk

The Fund is an investment fund, instruments invested by the Fund may fall in value and therefore investment in the Fund may suffer losses.

### 2. Risk related to investments in equities and equity-related securities

Equities and equity-related securities may be subject to strong price fluctuations, influenced by the profits or otherwise of individual enterprises and sectors as well as macro-economic developments and political perspectives which determine the expectations of the securities markets and thus the movement of prices of the securities.

### 3. Risks related to use of financial derivative instruments for hedging/efficient portfolio management

In adverse circumstances, the Fund's use of financial derivative instruments may become ineffective in hedging/efficient portfolio management and the Fund may suffer significant losses in relation to those investments.

### 4. Risks related to foreign currencies

Given that the Fund may invest in assets which are not in its base currency, the investment returns may be affected by the fluctuations in currency rates and subject to foreign exchange risks. The Investment Manager does not currently intend to hedge the foreign currency exposure of the Fund.
