## Pictet - Europe Index

(the "Compartment") is a compartment of Pictet (the "Fund")

I EUR (the "Share class") - ISIN LU0188800162

This Fund is managed by Pictet Asset Management (Europe) S.A., part of the Pictet group

## Objectives and Investment Policy

- The Compartment aims to replicate the MSCI Europe Standard Index in full. Its investment objective is pursued by investing in a portfolio of transferable securities or other admissible assets making up all (or, exceptionally, a substantial number of) the components of the relevant index. Consequently, any fall in the reference index could trigger a corresponding fall in the value of the Compartment's shares.
- The Compartment is passively managed and aims to minimise the tracking error (difference between returns from the Share class and those of the reference index).
- The Compartment may use financial derivative instruments for efficient portfolio management or hedging purposes.
- The Share class does not distribute a dividend.
- The price of the Share class is calculated on a daily basis. Investors may redeem shares of the Compartment on any business day in Luxembourg unless no underlying price is available (market closed).
- Costs caused by subscriptions or redemptions may be charged to investors responsible for those flows.
- Recommendation: this Compartment may not be appropriate for investors who plan to withdraw their money within 5 years.

## Risk and Reward Profile

- Historical data, such as that used to calculate the synthetic indicator, might not be a reliable indication of the future risk profile of the Share class.
- The risk category shown is neither a target nor a guarantee and may change over time.
- The lowest risk category does not mean a risk-free investment.
- Equity investments are subject to high price volatility (variations in net asset value of the Share class), but may offer rewards in line with the risks taken, which is why it is in this risk category.
- This value is affected by various factors, including:
  - The Compartment offers no capital guarantee or asset protection measures.
  - The Compartment may invest in emerging markets.

- This asset class is subject to political and economic risks which may have a significant impact on the Compartment's performance and volatility.
- Because of our investment approach, the Compartment may be exposed to currency risk.
- The Share class also bears the following risks that are not explained by the synthetic risk indicator:
  - Liquidity risk: when market conditions are unusual or a market is characterised by particularly low volumes, the Compartment may encounter difficulties in valuing and/or trading some of its assets, particularly to satisfy large redemption requests.
  - Operational risk: the Compartment is subject to the risk of material losses resulting from human error or system failures or incorrect valuation of the underlying securities.
  - Counterparty risk: the use of derivatives in the form of contracts with counterparties may imply significant losses if a counterparty defaults and cannot honour its liabilities.
- Tracking error risk: this is the risk that the Compartments's performance will be different to that of the Index due to for example and not limited to trading and other operating costs.
