## Global equity fund, aggressive

### MARKET COMMENTARY

With a monthly performance of 1.5% in January, the tranche is well ahead of the benchmark, which was negative (-0.2%). Anything connected to the coronavirus and biotech did well. BioNTech, which probably produces the best coronavirus vaccine at the moment, gained 41.0%. Other very good performers included Sartorius (+19.5%), a manufacturer of bioreactors, Illumina (+18.6%), a producer of gene sequencers, Gilead (+17.2%), a manufacturer of antibodies against viral diseases, and Eurofins (+12.6%), a global testing laboratory. In addition, our four hedges also gained between 23.9% and 34.4% respectively. Individually, their weighting was not very large, but as market volatility goes up, so does their market price.

## **INVESTMENT OBJECTIVE AND - PHILOSOPHY**

The fund invests mainly in companies that have been chosen based upon traditional stock analysis (fundamental "bottom-up" analysis of individual stocks). The selection adheres to classical shareholder value aspects. The fund invests in companies that are undervalued according to at least one of the following criteria: undervalued net asset value, high earnings power (that is not reflected in the stock price), above-average dividend yield, neglected industries or countries, overrated crises. Important factors in making a decision are the transparency of the company's accounting and its corporate governance. A pre-selection of stocks is made through quantitative screening. The decision to buy is then made after a thorough analysis of the available information on each company.
