Investment Strategy

The UK Equity strategy targets strong excess returns by primarily focussing on bottom-up stock selection, but with an awareness of the prevailing macroeconomic conditions.

We believe that long-term outperformance comes from investing in companies with sustainably high returns that can compound growth over time, subject to valuation. We therefore seek to identify well-managed companies with sustainably high returns, good growth potential, and attractive valuations. Such companies make up the core of the portfolio. This core is augmented by other market mispricing opportunities, including balance sheet optionality, restructuring, corporate change, asset value, and special situations.

Portfolio construction is the synthesis of idea generation, conviction and risk management. The strategy will typically hold between 30 and 55 stocks. We have a disciplined approach to risk management that aims to preserve capital and control downside risk. This is reinforced by TT's independent risk management team.

We believe the following aspects of our investment process set TT apart from the competition:

Strong, repeatable and differentiated process. Our VVC-ESG process takes a pragmatic and flexible approach to Valuation, incorporates a wide range of inputs (both conventional and unconventional) when Verifying each investment case, identifies clear Catalysts that should crystallise value within an investable timeframe, and integrates ESG analysis throughout.

Unconstrained. We are focused on deploying capital where we have the highest conviction and where we see the best returns. Consequently, we are comfortable with deviating substantially from index weightings.

Strong sell discipline. We believe the process of selling investments is just as important as the process of buying them.

Flexibility. Whilst our research process is extremely thorough, our structure, focus, and size affords us the ability to make timely investment decisions when market conditions require it. This gives us a significant edge over the competition.

Why TT?

TT International offers a range of long-only and hedge fund strategies designed to meet clients' investment objectives and risk budgets. We have over 30 years' experience of conviction investing and a strong track record of delivering compelling risk-adjusted returns.

TT manages assets for a growing institutional client base, which is increasingly diverse in type and location.

To align our interests, TT's investment teams are compensated based on the returns they deliver to clients, and many of our employees also invest their own assets alongside those of our clients.

Furthermore, we believe that investment performance suffers from diseconomies of scale if assets under management grow too large. We therefore limit capacity in all of our products, enabling us to remain nimble and maximising our chances of success. Rather than simply being asset gatherers, we pride ourselves on our investment-led culture that focuses on doing what is right for existing clients.
