## MORNINGSTAR MEDALIST RATING™

Analyst-Driven %  
100  
Data Coverage %  
100

## FUND OBJECTIVE

To increase the value of your shares through a combination of growth and income from investments in real estate securities.

The fund invests predominantly in securities issued by US Real Estate Investment Trusts (REITs) and does not invest directly in real estate. REITs are companies or trusts that invest mainly in income-producing real estate. They may invest broadly or specialise in a particular sector such as offices, industrial buildings or shopping centres.

## MANAGEMENT TEAM

**Steve Shigekawa**

Senior Portfolio Manager

**Brian C. Jones**

Portfolio Manager

**Archana Alagappan**

Associate Portfolio Manager

## FUND FACTS

Inception Date (Fund)	01 February 2006
Base Currency (Fund)	USD
Fund AUM (USD million)	475.62
Domicile	Ireland
Vehicle	UCITS
Valuation	Daily
Settlement (Subscription)	T+3
Trading Deadline	15:00 (Dublin Time)
Regulator	Central Bank of Ireland
Benchmark	FTSE NAREIT All Equity REITs Index (Total Return, Net of tax, USD)

## CUMULATIVE PERFORMANCE

Past performance does not predict future returns.

This chart shows how an investment of USD 100 in the fund on its inception date would have performed and compares it against how a hypothetical investment of USD 100 in the Benchmark(s) would have performed.

PERFORMANCE (%) <sup>1</sup>	1m <sup>2</sup>	3m <sup>2</sup>	YTD <sup>2</sup>	1y <sup>2</sup>	3y <sup>3</sup>	5y <sup>3</sup>	10y <sup>3</sup>	SI <sup>3,4</sup>

Benchmark (USD)	21.37	3.48	4.07	-2.26	18.69	-16.88	32.93	22.50	-20.28	6.67

CALENDAR (%)	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024 <sup>5</sup>
USD I Accumulating Class	2.28	3.18	10.76	-6.25	30.87	-3.22	41.31	-28.01	10.55	-3.33
Benchmark (USD)	1.67	7.45	7.41	-5.47	27.23	-6.12	40.08	-25.71	9.95	-1.59

The fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The fund is not constrained by its benchmark, which is used for comparison purposes only. The fund gives some consideration to the benchmark constituents in the selection of securities and may not hold all or many of the benchmark's components.

<sup>1</sup>Performance to latest month end. YTD - Year to Date, SI - Since Inception, m - month, y - year.

<sup>2</sup>Returns for these periods are cumulative.

<sup>3</sup>Returns are annualised for periods longer than one year.

<sup>4</sup>Returns from 01 February 2006 to latest month end.

<sup>5</sup>Performance for the current calendar year is the year to date.

Fund performance is representative of the USD I Accumulating Class and has been calculated to account for the deduction of fees. Investors who subscribe in a currency other than the base currency of the fund should note that returns may increase or decrease as a result of currency fluctuations. **Fund performance does not take account of any commission or costs incurred by investors when subscribing for or redeeming shares.**

## RISK CONSIDERATIONS

**Market Risk:** The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy.

**Liquidity Risk:** The risk that the fund may be unable to sell an investment readily at its fair market value. In extreme market conditions this can affect the fund's ability to meet redemption requests upon demand.

**Real Estate Risk:** Real estate investments, including Real Estate Investment Trust Securities ("REITs") or similar structures, are subject to volatility and additional risks, and the share value may decline due to events affecting the real estate industry. The properties held by REITs could fall in value for a variety of reasons, such as declines in rental income, poor property management, environmental liabilities, uninsured damage, increased competition, or changes in real estate tax laws. There is also a risk that REIT stock prices overall will decline over short or even long periods because of rising interest rates.

**Counterparty Risk:** The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date.

**Operational Risk:** The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.

**Derivatives Risk:** The fund is permitted to use certain types of financial derivative instruments (including certain complex instruments). This may increase the fund's leverage significantly which may cause large variations in the value of your share. Investors should note that the fund may achieve its investment objective by investing principally in Financial Derivative Instruments (FDI). There are certain investment risks that apply in relation to the use of FDI. The fund's use of FDI can involve significant risks of loss.

**Currency Risk:** Investors who subscribe in a currency other than the base currency of the fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. Where past performance is shown it is based on the share class to which this factsheet relates. **If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.**

For full information on the risks please refer to the fund prospectus and offering documents, including the KID or KIID, as applicable.

## ESG DISCLOSURES

The fund complies with the Sustainable Finance Disclosure Regulation (the "SFDR") and is classified as an Article 8 SFDR fund. Neuberger Berman believes that Environmental, Social and Governance ("ESG") factors, like any other factor, should be incorporated in a manner appropriate for the specific asset class, investment objective and style of each investment strategy.

## IMPORTANT INFORMATION

Except for performance, the data shown is for the fund and is not specific to the share class, it has not been adjusted to reflect the different fees and expenses of the share class.

Performance of another share class may vary from the results shown based on differences in fees and expenses, and currency.

United Kingdom and outside the EEA: This document is a financial promotion and is issued by Neuberger Berman Europe Limited, which is authorised and regulated by the Financial Conduct Authority and is registered in England and Wales, at The Zig Zag Building, 70 Victoria Street, London, SW1E 6SQ. Neuberger Berman Europe Limited is also a registered investment adviser with the Securities and Exchange Commission in the US, and the Dubai branch is regulated by the Dubai Financial Services Authority in the Dubai International Financial Centre.

This fund is a sub-fund of Neuberger Berman Investment Funds PLC, authorised by the Central Bank of Ireland pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011, as amended. The information in this document does not constitute investment advice or an investment recommendation and is only a brief summary of certain key aspects of the fund. **Investors should read the prospectus along with the relevant prospectus supplements and the key information document (KID) or key investor information document (KIID), as applicable** which are available on our website: [www.nb.com/europe/literature](http://www.nb.com/europe/literature). Further risk information, investment objectives, fees and expenses and other important information about the fund can be found in the prospectus and prospectus supplements. The fees and charges paid by the Fund will reduce the return on your investment. Certain costs paid by the Fund will be charged in USD, EUR, GBP, CHF, CNY, HKD, DKK, SGD or other currencies and exchange rate fluctuations may cause these costs to increase or decrease when converted into your local currency.

The KID may be obtained free of charge in Danish, Dutch, English, Finnish, French, German, Greek, Icelandic, Italian, Norwegian, Portuguese, Spanish and Swedish (depending on where the relevant sub-fund has been registered for marketing), and the prospectus and prospectus supplements may be obtained free of charge in English, French, German, Italian and Spanish, from [www.nb.com/europe/literature](http://www.nb.com/europe/literature), from local paying agents (a list of which can be found in Annex III of the prospectus), or by writing to Neuberger Berman Investment Funds plc, c/o Brown Brothers Harriman Fund Administration Service (Ireland) Ltd, 30 Herbert Street, Dublin 2, Ireland. In the United Kingdom the key investor information document (KIID) may be obtained free of charge in English at the same address or from Neuberger Berman Europe Limited at their registered address.

Neuberger Berman Asset Management Ireland Limited may decide to terminate the arrangements made for the marketing of its funds in all or a particular country.

A summary of the investors' rights is available in English on: [www.nb.com/europe/literature](http://www.nb.com/europe/literature)

For information on sustainability-related aspects pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector please visit [www.nb.com/europe/literature](http://www.nb.com/europe/literature). When making the decision to invest in the fund, investors should take into account all the characteristics or objectives of the fund as described in the legal documents.

This document is presented solely for information purposes and nothing herein constitutes investment, legal, accounting or tax advice, or a recommendation to buy, sell or hold a security. We do not represent that this information, including any third-party information, is complete and it should not be relied upon as such.

No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of any investment, and should consult its own legal counsel and financial, actuarial, accounting, regulatory and tax advisers to evaluate any such investment.

It should not be assumed that any investments in securities, companies, sectors or markets identified and described were or will be profitable. Investors may not get back the full amount invested.

Any views or opinions expressed may not reflect those of the firm as a whole.

All information is current as of the date of this material and is subject to change without notice.

The fund described in this document may only be offered for sale or sold in jurisdictions in which or to persons to which such an offer or sale is permitted. The fund can only be promoted if such promotion is made in compliance with the applicable jurisdictional rules and regulations. This document and the information contained therein may not be distributed in the US.

Indices are unmanaged and not available for direct investment.

An investment in the fund involves risks, with the potential for above average risk, and is only suitable for people who are in a position to take such risks. For more information please read the prospectus which can be found on our website at: [www.nb.com/europe/literature](http://www.nb.com/europe/literature).

**Past performance is not a reliable indicator of current or future results.** The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred by investors when subscribing for or redeeming shares.

The value of investments designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital.

Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.

Investment in the fund should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.

No part of this document may be reproduced in any manner without prior written permission of Neuberger Berman.

**Notice to investors in Spain:** The Fund Neuberger Berman Investment Fund plc is registered with the Comisión Nacional del Mercado de Valores ("CNMV") under registration number 295 in Spain.

# Neuberger Berman Glossary of Terms

**ABS (Asset-Backed Security):** A security that is backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities.

**Accumulating Class:** Any share class which accumulates all net investment income and net realised capital gains and does not declare dividends.

**Alpha:** The risk-adjusted excess return on an investment in the Fund compared to the benchmark.

**Annualised Performance:** The returns from a period of time longer than one year, expressed as a yearly geometric average return.

**AUM:** Assets Under Management.

**Average Credit Quality:** A weighted average of the credit ratings of all of the bonds in the portfolio.

**Base Currency:** The currency in which the net asset value of each portfolio is evaluated.

**Basis point (Bps):** Basis point (Bps) refers to a unit of measure for interest rates and other percentages in finance. One basis point is equal to 1/100th of 1%, or 0.01% (0.0001).

**Beta:** A measure of the systematic risk of a portfolio relative to the benchmark based on historical returns. The beta of the benchmark will always be 1. For example, a portfolio with a beta above the benchmark (as in, more than 1) indicates that the portfolio has greater volatility than the benchmark and would be expected to outperform in up markets and expected to underperform in down markets.

**Bmrk/Benchmark:** An index that is used to compare the performance of a fund, or that is used with the purpose of tracking the return of such index, or that is used to define the asset allocation of a portfolio or to calculate performance fees.

**Cash Equivalent:** A short-term money-market instrument, such as a Treasury bill or repurchase agreement, of such high liquidity and safety that it is easily converted into cash.

**Core Strategy:** The Core strategy is the portion of the portfolio invested mainly in short- to medium-term investment grade bonds with maturity on average less than 3 years.

**Cumulative Performance:** The returns generated by an investment over an entire specified period, as opposed to the performance of an investment over each discrete period of, for example, one month, one quarter or one year.

**Distributing Class:** Any share class which declares dividends.

**Dividend Yield:** The annual percentage return earned by a fund from company dividends, calculated by dividing the amount of the annual dividends per share by the current net asset value or public offering price.

**Domicile:** The geographical location where a fund is incorporated.

**Duration:** This measurement is used as an indication of the sensitivity to interest rate movements of the price of a bond. Longer duration indicates greater sensitivity.

**EPS Growth:** EPS growth (earnings per share growth) illustrates the growth of earnings per share over time. EPS growth rates help investors identify stocks that are increasing or decreasing in profitability. Estimated 3-5 Year EPS Growth is an estimate of how earnings per share are expected to grow in the next 3 to 5 years. There is no guarantee that the estimated EPS growth will be achieved.

**ESG:** ESG represents Environmental issues, (such as the impact on natural resources), Social issues (such as human rights) and Governance, (being the way in which the company is run).

**Forward Price/Earnings (P/E) ratio:** This is the price of a share at a given time divided by its forecasted earnings per share for the next fiscal year. The forecasted earnings are based on consensus estimates, not Neuberger Berman's own projections, and forecasts may or may not be realized. In addition, any revision to a forecast could affect the market price of a share. If the forward P/E ratio is higher than the current P/E ratio, it indicates decreased expected earnings.)

**Gross Exposure:** The notional value exposure to market movements in an investment portfolio, expressed as a total

of both its "long" positions (where securities are owned directly or via the usage of derivatives) and its synthetic "short" positions (where securities are borrowed and sold to be repurchased later). For example, a strategy that has 50% of portfolio assets in "longs" and 50% in "shorts" would have 0% net market exposure but 100% gross market exposure.

**High Yield:** A security or asset, usually a bond or loan, that has received a rating below BBB-/Baa3, or not even received a rating from a nationally recognised statistical rating organisation (NRSO). Sometimes referred to as "speculative-grade", "non-investment grade" or "junk" bonds or loans.

**Information Ratio (IR):** The expected active return, relative to its benchmark of reference, of an investment strategy (Alpha) divided by its tracking error. This is a measure of the efficiency with which an investment strategy takes risk against its benchmark.

**Initial Sales Charge (Max):** The maximum amount that an investor in an investment fund may be required to pay when investing in the fund, expressed as a percentage of the value of the investment.

**Investment Grade:** A security or asset, usually a bond or loan, that has received a rating from a leading credit ratings agency of BBB/Baa or above.

**KIID (Key Investor Information Document):** A short document that fund management companies are required to provide for investors, giving the key facts and figures about an investment fund.

**Listing:** The stock exchange on which a security or investment fund has been floated and is traded.

**Long Exposure:** Indicates the proportion of the Fund's NAV invested in long positions. A long position means the Fund owns a security (such as an equity, a bond or an option) and will profit if its price goes up.

**Management Fee:** The fixed annualised fee that an investor pays in order to have assets managed in an investment fund or by an investment manager.

**Maturity:** The date upon which an asset, for example a bond or derivative, must be redeemed by its issuer. In the case of a bond, this is the date upon which the final coupon is paid and the principal is returned to investors. In the case of a derivative, this is the date upon which the contract expires.

**MV:** An abbreviation of 'Market Value'.

**NAV (Net Asset Value):** The net asset value of a portfolio.

**Net Exposure:** The notional value exposure to market movements in an investment portfolio, expressed as its "long" positions (where securities are owned) minus its "short" positions (where securities are borrowed and sold to be repurchased later).

**Non-Investment Grade:** A security or asset, usually a bond or loan, that has received a rating below BBB/Baa, or has not received a rating from a nationally recognised statistical rating organisation (NRSO). Sometimes referred to as "speculative-grade", "high yield" or "junk" bonds or loans.

**NRSO:** Nationally Recognised Statistical Rating Organisation.

**NV (Notional Value):** The total underlying asset value of an exposure implemented, or part implemented, using derivative instruments, given the current spot price of the underlying assets. A large total asset value exposure to markets can be created with a relatively small allocation of cash collateral against a derivative contract. The true size of the exposure is therefore better represented by this leveraged notional value than by the value of the cash allocation.

**OAS (bps):** The "Option-Adjusted-Spread" ("OAS") is the difference, in basis points ("bps"), between the yield of an asset and the yield of a benchmark rate such as the risk free rate cash index, adjusted to take account of the value of options embedded in that asset. Some bonds and loans, for example, give the issuer the option to "call" the security earlier than the maturity date (in other words, to redeem and repay the principal value to the investor early).

**Ongoing Charge Figure (OCF):** The ongoing charge figure represents the annual costs of a fund, and it includes the ongoing costs of running the fund, such as operating

costs, management costs, administration costs, distribution costs and transaction costs incurred as a result of buying or selling investments. The ongoing charge figure does not include one-off costs such as entry or exit charges and performance fees. The ongoing charge figure replaced the Total Expense Ratio (TER).

**Price / Sales:** A company's share price divided by its sales revenue per share. An alternative method to price/earnings ratio for valuing a stock

**R-Squared:** A statistical measure representing the percentage of an investment portfolio's movements that can be explained by movements in the benchmark. A high R-squared (between 85 and 100) indicates the portfolio's performance patterns have been historically in line with the benchmark.

**Return on Equity:** Return on equity is the level of net income returned as a percentage of the shareholder's equity.

**Settlement (Subscription):** The process by which securities or units in an investment fund are delivered in exchange for cash.

**Sharpe Ratio:** Characterises how well the return of the Fund compensates the investor for the risk taken relative to a risk free cash investment. When comparing two funds versus a common benchmark, the one with a higher Sharpe Ratio provides better return for the same risk (or, equivalently, the same return for lower risk).

**Short Exposure:** Indicates the proportion of the Fund's NAV invested in short positions. A short position means the Fund benefits from a fall in the price of a security. Funds implement short exposures via synthetic investments using derivatives, which will generate leverage in the portfolio.

**Standard Deviation:** Measures the historical volatility of the Fund's return. Standard deviation is a statistical measure of the dispersion of a set of data relative to its mean value. The higher the standard deviation, the wider the variability of the returns is and the higher the portfolio risk. In investment the term is usually applied to a series of historical returns, and is often referred to as "volatility".

**Tactical Strategy:** The tactical strategy is the portion of the portfolio invested mainly in Eurozone government bonds (rated A or below) with maturity above 3 years and non-investment grade bonds.

**Tracking Error:** A measure of the volatility of the difference between the return to an investment strategy and the return to its benchmark. It is a measure of how closely the strategy's performance may differ from that of the benchmark. A higher tracking error implies that a portfolio is actively managed versus its benchmark.

**Trading Deadline:** The last point on each day at which a request to subscribe or redeem units in an investment fund can be submitted to the fund management company. Requests to trade submitted after this deadline will be executed the next day.

**Vehicle:** Any structure established to accept cash from investors with which to make investments in assets and securities. Examples include closed- or open-ended collective investment funds, limited partnerships, and exchange traded funds.

**Volatility:** Also referred to as the standard deviation of the stream of returns to an asset, portfolio, market or benchmark.

**Yield to Maturity:** The total annualised return anticipated on a bond if it is held until the end of its lifetime. Yield to maturity is considered a long-term bond yield, but is expressed as an annual rate.

**Yield to Worst:** The lowest potential annualised total return that can be received on a bond without the issuer defaulting. This can be different from the yield to maturity because it assumes that the issuer will exercise any option it has to "call" the security at the earliest opportunity (to redeem and repay the principal value to an investor early).

**WAL (Weighted Average Life):** The weighted average life for a bond or another interest-bearing investment means the average number of years that the unpaid principal amount takes to be repaid. Bonds with higher weighted average life values may be riskier. Bonds that pay back more money sooner will have shorter weighted average life.
