Morningstar Rating™ ★★★★★

Fund Description

The Global Bond Fund is a diverse, actively managed portfolio of global fixed-income securities. The average duration of the fund will normally vary within +/-3 years of the benchmark. The fund invests primarily in a diversified portfolio of investment grade bonds denominated in major world currencies.

Investor Benefits

This fund offers efficient exposure to a sector that can be difficult to access directly, and potential for enhanced returns through diversification.

The Fund Advantage

The fund captures the returns of global bonds but aims to limit volatility by hedging out most currency exposure as it seeks to outperform its benchmark.

Risk Profile

Share value can go up as well as down and any capital invested in the Fund may be at risk. The Fund may invest in non-U.S. and non-Eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The Fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Key Investor Information Document.
