

KEY DIFFERENTIATORS

- Quality comes first, we seek growth that can endure
- Team-based approach, rather than star-manager fund, which we believe leads to greater consistency
- ESG integrated into the investment process leveraging proprietary ESG research
- Culture matters. Comgest's broad partnership structure incentivises long-term thinking, an ESG mindset, teamwork and low employee turnover.

INVESTMENT TEAM

David Raper, Gary Pinge, Bhuvnesh Singh, Adam Hakkou
Team may include advisors from affiliates within the Comgest Group.

RISK PROFILE

The indicator represents the risk profile presented in the PRIIPs Key Information Document. The indicator assumes you keep the product for 5 years otherwise the actual risk can vary significantly. UK investors should refer to the UCITS KIID which is available on the fund pages at www.comgest.com.

INVESTMENT POLICY

The objective of the Sub-Fund ("the Fund") is to increase the value of the Fund (capital appreciation) over the long term. The Fund intends to achieve this objective through investment in a portfolio of high-quality, long-term growth companies quoted or traded on Asian or world regulated markets. The Fund will invest at least two-thirds of its assets in securities issued by companies that have their headquarters in, or principally carry out their activities in Asia excluding Japan but including the Indian sub-continent, Australia and New Zealand. The Fund is actively managed. The index is provided for comparative purposes only. The Fund is aimed at investors with a long-term investment horizon (typically 5 years or more).

Performance data expressed in USD. Returns may increase or decrease as a result of exchange rate fluctuations. Index: MSCI AC Asia Pacific ex-Japan - Net Return (changed from MSCI AC Asia Pacific ex-Japan - Price Return on 02/01/2001). The index is used for comparative purposes only and the Fund does not seek to replicate the index.

*Comgest Panda (CP) merged with Comgest Growth Asia Pac ex Japan (APexJ) on 10/01/2014. Performance data prior to 10/01/2014 is that of CP, shown in the interest of representing the track record associated with the majority of invested assets (being those of CP) and to correspond with the investment guidelines of APexJ.

Past performance does not predict future returns.

Performance figures are calculated net of investment management fees, administrative fees and all other fees with the exception of sales charges. If taken into account, sales charges would have a negative impact on performance.

The cumulative graph and "Since Inception" data may refer to the last relaunch date of the share class which may differ from its actual inception date. Calendar year past performance is only shown for years for which a full calendar year of past performance is available.

SFDR CLASSIFICATION: Article 8

The Fund promotes environmental and/or social characteristics.

ESG LABELS

The LuxFLAG ESG label has been granted from 01/04/2022 to 31/03/2023. Investors must not rely on the label with regard to investor protection issues and LuxFLAG cannot incur any liability related to financial performance or default of the labelled fund.

31 March 2023

FUND COMMENTARY

After the lockdowns of 2022, China's pivot from the zero-Covid policy was the key focus for markets over the first quarter of 2023. As expected, the process was not particularly smooth with rising infection levels and suppression of data around deaths.

Whilst China continued to work its way out of Covid, which drove some recovery in consumption spend across China, it was nothing like the revenge spending witnessed in many other countries. The initial excitement of the market with regards to a "V" shaped consumption recovery in China has abated, with more recent data pointing to a slow gradual recovery as the economic wheels of China start to turn once again.

Your portfolio, which is heavily weighted towards China, saw a strong outperformance at the start of 2023, however this advantage was erased as expectations fell. Nonetheless the data points which are emerging for China are positive, with Ping An talking about a recovery in policy sales and some consumer discretionary brands positioning for a recovery. In addition, car sales are starting to show strength and property prices are stabilising.

Aside from China's zero-Covid pivot, both geopolitics and the global inflationary environment remained key focuses. The US Federal Reserve and other reserve banks quickly raised interest rates over 1Q'23, as commodity-based inflation, especially on oil and gas, took centre stage owing to the Russia/Ukraine conflict and the winter in Europe. The rapid rise in rates drove instability in the global financial system towards the back end of the quarter, impacting markets and driving a "risk off" sentiment.

Your portfolio remains positioned towards China where we see solid opportunities as both the market and investor sentiment slowly improve. This should also drive foreign investors to revisit China after the 2021/22 view that the country was "un-investible". In our view, China remains under-owned and there are good opportunities to find and hold quality growth companies at reasonable valuations. That said, we accept that the outlook for China has changed with the Chinese Communist Party looking for slower growth targets and President Xi's third term presenting some complexities with regards to governance structures.

In the general malaise of the South Korean and Taiwanese markets, we have been finding more opportunities. Over the first quarter we continued to build our positions in companies such as Coway and Tokai Carbon Korea.

As mentioned above, our focus remains on China in the near term. While it is clear that the path to recovery will not be smooth, we believe that there will be an eventual recovery in consumption. We want to be well placed to benefit from this recovery. From a global consumer perspective, portfolio holding Samsonite continues to benefit from the improving travel trends globally. From a China perspective, companies such as Orion, Suofeiya and Tencent have been showing varying degrees of recovery. Tencent and NetEase have also been benefiting from less regulatory pressure on gaming approvals. The improving gaming pipelines should see these companies once again starting to benefit from new game launches.

Towards the end of the quarter, Alibaba was in focus as it announced a large reorganisation which would see the company split into six different units with independent management structures. These units may also look to list separately, resulting in a potential unlocking of value. The stock reacted positively to this news.

1Q'23 was also a quarter where the tech industry continued to digest the excess inventory of memory and logic chips. While it remains too early to tell when we will see the inflection in pricing for memory, managements are increasingly talking about a bottoming out in 1Q/2Q. Given the capacity cuts, we should start to see a meaningful lift in 2H pricing. Your portfolio has exposure to this through Samsung Electronics and Tokai Carbon Korea.

Over the quarter we took advantage of the recovery in some companies and trimmed positions. An example of this is Samsonite whose share price is reflecting the current robust earnings and improvement in travel trends. However, in an environment where rates are rising rapidly and with travel at the very discretionary end of consumption, we took the opportunity to trim our position. Similarly, we had been accumulating Orion during its weakness in 2022 (driven by higher commodity costs), but with the company now reporting fast improving results, we have been reducing our position in order to manage our exposure. These funds have been incrementally invested in companies such as Tokai Carbon Korea and Coway where we think the market is ignoring improving fundamentals.

For the remainder of 2023 the focus will be on how China emerges from Covid-19 and how consumption recovers. The good thing about China is that over the Covid period, households have amassed a significant level of savings. However, for these savings to be spent, consumer sentiment needs to improve markedly. A cornerstone of this is people feeling the wealth effect once more – which will be assisted by any recovery in the Chinese property market. As such, one focus is on how China stimulates the property market again and what this means for not only domestic Chinese, but also global, consumption.

The other focus is on developed market central banks and their fight against inflation. As fuel costs come down, some inflationary trends are starting to abate. However, with central banks being resolute on the 2% inflation target, how far rates need to rise and the pressure it puts on the financial system is another area of uncertainty that the markets will need to navigate.

Overall, the world is in a place where developed market consumers spent their Covid savings/stimulus cheques over 2020/21. This is now likely to take place in China and will have far reaching implications for other Asian markets which will benefit from the Chinese tourist. In a sense, barring geopolitical issues, 2023 may be the year where Asian markets come to the forefront once again. Within this, China will likely be a key focus and your portfolio remains positioned in accordance.

The views expressed in this document are valid at the time of publication only, do not constitute independent investment research and should not be interpreted as investment advice. The reference to specific companies does not constitute a recommendation to invest directly in these securities. Allocation is subject to change without notice. Remember that past performance does not predict future returns.

RISKS

This Fund has the following core inherent risks (non-exhaustive list):

- Investing involves risk including possible loss of principal.
- The value of all investments and the income derived therefrom can decrease as well as increase.
- There is no assurance that the investment objective of the Fund will be achieved.
- To the extent that the Fund is invested in or denominated in a currency other than yours, the cost and return in your currency may increase or decrease due to exchange rate fluctuations.
- The Fund invests in emerging markets which tend to be more volatile than mature markets and the value of investments can therefore move sharply up or down.
- A more detailed description of the risk factors that apply to the Fund is set out in the Prospectus.

PLEASE NOTE THAT THE DATA SHOWN BELOW IS THE OUTCOME OF OUR INVESTMENT PHILOSOPHY AND STOCK SELECTION. THESE METRICS ARE NOT ALL SPECIFICALLY TARGETED BY COMGEST BUT MAY BE ADDRESSED AS PART OF OUR RESPONSIBLE INVESTMENT PROCESS.

RESPONSIBLE INVESTMENT APPROACH

We believe a responsible approach to environmental, social and governance issues has a positive impact on a company's long-term sustainable growth. ESG is part of our fundamental analysis and we have developed and implemented a three-pronged responsible investment strategy: Integrate / Engage / Promote.

MAIN EXCLUSIONS*

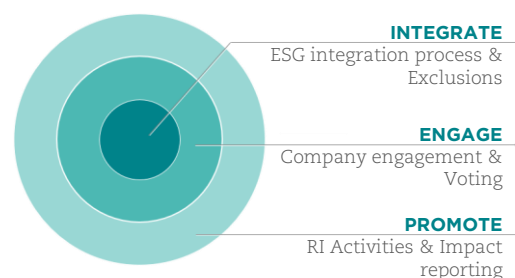

Coal Exit Policy: Coal-exposed electricity producers & thermal coal mines

Tobacco: Producers & distributors

Weapons: Conventional & controversial

UN Global Compact: Severe violations without prospect for improvement

Controversial Jurisdictions: High-risk jurisdictions & sanctions regime

* Further information on the exclusion policies and **applicable revenue thresholds** may be found in the Prospectus and the Investment Manager's Responsible Investment Policy on the Comgest website at www.comgest.com/en/our-business/esg

Comgest Growth Plc may decide to terminate at any time the arrangements made for the marketing of its UCITS.

Carbon Footprint: estimates the apportioned Scope 1 and 2 greenhouse gases emissions of the portfolio holdings.

Environmental Footprint: estimates the apportioned ratio of annual costs linked to greenhouse gases, water abstraction, waste generation, air, land & water pollutants, and natural resource use associated with the portfolio holdings per USD m invested.

Environmental Footprint Source: S&P Trucost Limited © Trucost 2023. All rights in the Trucost data and reports vest in Trucost and/or its licensors. Neither Trucost, nor its affiliates, nor its licensors accept any liability for any errors, omissions or interruptions in the Trucost data and/or reports. No further distribution of the Data and/or Reports is permitted without Trucost's express written consent.

Science Based Targets Initiative Portfolio Coverage: calculates the % of the Fund's AUM invested in companies with SBTi approved targets or which have committed to set SBTi targets.

Board Gender Diversity: this indicator represents the weighted average ratio of female board members to total board members in investee companies, expressed as a percentage of all board members.

Non-Violation of UNGC Principles: this indicator represents the percentage of investee companies that have not been involved in violations of the United Nations Global Compact (UNGC) principles.

Effective Tax Rate: an indicator of corporate responsibility and impact. Using MSCI data, Comgest calculates the average effective tax rate and average statutory tax rate of the portfolio's holdings.

Index Source: MSCI. For more detailed information on ESG integration please consult our website: www.comgest.com/en/our-business/esg

Active Share: The percentage of fund holdings that is different from the reference index holdings. A fund that has no holdings in common with the reference index will have an active share of 100%, and a fund that has exactly the same holdings as the reference index considered will have an active share of 0%.

ADR - American Depositary Receipt: A negotiable security that represents securities of a foreign company and allows that company's shares to trade in the financial markets of the United States.

Annualised: A figure converted into an annual rate. Figures covering a period of more than one year are averaged to present a figure for a 12-month period.

Bp(s) - Basis point(s): One basis point is equal to one hundredth of 1% (i.e. 0.01%).

BV - Book Value: The value of the company assets minus its liabilities.

CAGR - Compound Annual Growth Rate: The rate of return that would be required for an investment to grow from its beginning balance to its ending balance, assuming the profits were reinvested at the end of each year of the investment's lifespan.

CapEx - Capital Expenditure: The money invested by a company to acquire or upgrade fixed, physical, non-consumable assets such as property, plants, buildings, technology, or equipment.

Cash Flow: The net amount of cash and cash equivalents being transferred in and out of a company. Cash received signifies inflows, and cash spent signifies outflows.

CPI - Consumer Price Index: An index that measures the overall change in consumer prices based on a representative basket of goods and services over time. It is the metric often used to measure inflation.

DY - Dividend Yield: A ratio that shows how much a company pays out in dividends each year relative to its share price.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortisation: Used to measure a company's core profitability and is calculated by adding interest, tax, depreciation and amortisation expenses to net income.

EBIT - Earnings Before Interest and Taxes: Used to measure a company's core profitability and is calculated by adding interest and tax expenses to net income.

EPS - Earnings Per Share: The profits of a company attributed to each share, calculated by dividing profits after tax by the number of shares. EPS serves as an indicator of a company's profitability.

FCF - Free Cash Flow: The cash generated by a company from its normal business operations after subtracting any money spent on capital expenditures.

GDP - Gross Domestic Product: The total market value of all the finished goods and services produced within a country's border in a specific time period.

GDR - Global Depositary Receipt: A certificate issued by a bank that represents shares in a foreign stock on two or more global markets. A GDR is similar to an American depositary receipt (ADR), except an ADR only lists shares of a foreign country in the markets of the United States.

LTM - Last 12 Months: LTM multiples are backward-looking and are based on historical performance.

Market Cap(italisation): A measure of a company's size, calculated by multiplying the total number of shares in issue by the current share price. Companies are commonly grouped according to size, such as small cap, mid cap, large cap or all cap. There is no consensus on the definition of these groupings and they may vary from portfolio to portfolio depending on the country of investment.

NAV - Net Asset Value: The current market value of the portfolio's assets minus the portfolio's liabilities.

NTM - Next 12 Months: NTM multiples are forward-looking and are based on projected performance.

Ongoing Charges: A fund's operational costs over a year. Ongoing Charges are calculated as a percentage of the average fund size over the year and include, for example, investment manager's fees, administration fees and custody costs.

Operating Margin: Measures how much profit a company makes on a dollar (or relevant currency) of sales after paying for variable costs of production, such as wages and raw materials, but before paying interest or tax.

Operating Profit: A company's gross income less operating expenses and other business-related expenses, such as wages, cost of goods sold (COGS) and depreciation.

Organic Growth: Growth a company achieves by increasing output and enhancing sales through the business' own operations and internal processes. This does not include profits or growth attributable to mergers, acquisitions, divestitures and foreign exchange but rather an increase in sales and expansion through the company's own resources.

Organic Sales: Sales generated from within a company that are a direct result of the company's existing operations and internal processes. Organic sales do not include the impacts of mergers, acquisitions, divestitures and foreign exchange.

P/B or P/BV - Price-to-Book Value Ratio: Measures the market's valuation of a company relative to its book value. P/B or P/BV is calculated by dividing the company's stock price per share by its book value per share.

P/E - Price-to-Earnings Ratio: A ratio used to value a company's shares. It is calculated by dividing the current market price by the earnings per share.

P/S - Price-to-Sales Ratio: A valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value that financial markets have placed on each dollar of a company's sales or revenues.

PEG - Price/Earnings-To-Growth Ratio: A stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period. The PEG ratio is used to determine a stock's value while also factoring in the company's expected earnings growth.

PMI - Purchasing Managers' Index: An index of the prevailing direction of economic trends in the manufacturing and service sectors.

Reference Index: Index against which a fund's performance is compared.

ROE - Return On Equity: Measures financial performance and is calculated by dividing net income by shareholders' equity. ROE is a gauge of a company's profitability and how efficiently it generates those profits.

ROIC - Return On Invested Capital: Calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments.

SME - Small- Or Medium-Sized Enterprise: A company, or companies considered as a group, that are neither very small nor very large and which employ fewer than a given number of employees. This number varies across countries.

Volatility: Measures the movements of an asset up and down over time. Volatility is generally considered to be a measure of risk.

Engagement: Proactive, targeted dialogue with companies or other industry stakeholders (e.g. policymakers, industry bodies) in order to make known areas of concern and to incite tangible, positive change to improve outcomes for stakeholders.

Environmental Factors: Issues related to pollution, climate change, energy efficiency, natural resource use, waste management, biodiversity and other environmental challenges and opportunities.

ESG - Environmental, Social and Governance: The three key factors when measuring the sustainability and ethical impact of an investment in a business or company.

GHG - Greenhouse Gases: Gases that trap heat in the atmosphere and warm the planet. The best known greenhouse gases are carbon dioxide, methane, nitrous oxide and fluorinated gases.

Governance Factors: Governance refers to a set of rules or principles defining rights, responsibilities and expectations between different stakeholders in the governance of corporations. Governance factors include a company's leadership, executive pay, audits, internal controls and shareholder rights.

Net Zero: Achieving a balance between emitting carbon and absorbing carbon from the atmosphere. This balance, or net zero, will be achieved when the amount of carbon added to the atmosphere is no more than the amount removed.

PAI - Principal Adverse Impact: A list of sustainability factors that firms need to take into account for their investment policies and decisions. These indicators relate to environmental and social topics.

Proxy Voting: A form of voting whereby a shareholder delegates their vote to another who votes on their behalf at company meetings. This allows the shareholder to exercise their right to vote without being physically present.

RI - Responsible Investment: The integration of environmental, social and governance factors (ESG) into the selection and management of investments.

Scope 1 Emissions: Emissions directly generated by a company, such as an airline emitting exhaust fumes.

Scope 2 Emissions: Emissions indirectly generated by a company, such as emissions from the electricity or energy used to heat and cool a company's office.

Scope 3 Emissions: All other indirect emissions that occur in the value chain of a company and are not already included within scope 2. These emissions are a consequence of the company's business activities but occur from sources the company does not own or control. For example, emissions from a company's employees commuting to work. Scope 3 emissions are often difficult to measure.

SFDR Classification: SFDR product classifications fall under three categories and aim to make the sustainability profiles of funds more comparable and easier to understand by investors.

SFDR - EU Sustainable Finance Disclosure Regulation: An EU regulation which aims to make the sustainability profile of funds more comparable and better understood by end-investors. The regulation requires firms to advise whether principal adverse impacts on sustainability factors are considered in their investment decision making process.

Social Factors: Factors that examine how a company communicates with employees, suppliers, customers, governments, regulators and the communities where it operates.

tCO₂e: Tonnes (t) of carbon dioxide (CO₂) equivalent. Carbon dioxide equivalent is a standard unit for counting greenhouse gas emissions regardless of whether they are from carbon dioxide or another gas, such as methane.

UNGC - UN Global Compact: A voluntary pact of the United Nations (UN) to encourage businesses and firms worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

UN Global Compact (UNGC) Principles: Ten principles defined as part of the UNGC framework to promote responsible investment. Companies, investors and other participants are called upon to align their strategies and operations with the principles in the areas of human rights, labor, the environment and anti-corruption.

Voting: A mechanism for active owners to influence companies, usually done with the aim of influencing a company's governance or operations. Public equity investors typically have the right to vote on company and shareholder resolutions at annual and extraordinary general meetings (AGMs and EGMs).
