Allianz FinanzPlan 2050 - A - EUR

Flexibly structured fund with capital build-up aligned to the target date

Investment Objective

The fund aims to achieve capital growth by 31.12.2050. To this end, fund assets will initially be invested primarily in volatile instruments (in investment products relating to stock-market, commodity-futures, precious-metals, natural-resource, hedge-fund and private-equity indices as well as in emerging market securities). As the target date draws closer, the proportion of assets held in investments that tend not to fluctuate sharply in price (investment products relating to bond, money and real estate markets) will be increased. From the target date on, assets will be held mainly in relatively stable investments generating comparatively steady returns.

Opportunities

- Several asset classes with attractive capital gains potential
- Steady interest income on bonds and money market instruments, capital gains opportunities on declining interest rates
- Relatively steady income from real estate
- Especially broad diversification through global alignment

Risks

- Above-average volatility of assets with high return potential, losses possible
- Interest rates vary, bonds suffer price declines on rising interest rates
- Currency losses on global investments possible
- The fund unit price may be subject to increased volatility.

¹ Performance calculated on the basis of the net asset value per share (excluding any initial charge; distributions reinvested). Calculation made in accordance with the methodology recommended by BVI, Bundesverband Investment und Asset Management e. V., i.e. the German fund industry association.

² Any front-end load charged at the acquisition of the fund units may accrue in full to the sales partner. The exact amount shall be mentioned by the sales partner during the investment advice talks on request. This also applies to any trail fees paid by the Management Company to the sales partner from the management fee.

³ The administration fee applies a flat rate to certain fund expenses that have so far been charged separately to the Fund's assets and which are included in the TER.

⁴ TER (Total Expense Ratio): Total cost (except transaction costs) charged to the fund during the last financial year.
