Benchmark

Since: 17/04/2006

100% JP Morgan EMBI Global Diversified

The Fund is actively managed with deviation expected in term of constitution and performance compared to benchmark that is likely to be significant.

The performance of the fund can differ from the benchmark's performance.

The benchmark is not adapted to the social or environmental characteristics promoted by the fund.

Fund Manager

Magda BRANET / Mikhail VOLODCHENKO - Co-Manager

Objective and investment strategy

The Sub-Fund's investment objective is to seek performance by investing mainly in the emerging market universe and to a broader extent in bonds world wide, over a long term period.

The Sub-Fund is actively managed in reference to the JP Morgan EMBIG Diversified Hedged USD benchmark index (the "Benchmark") in order to capture opportunities in emerging markets debt, while limiting its credit risk. The Sub-Fund invests at minimum one third of its net assets in the components of the Benchmark. Depending on its investment convictions and after comprehensive macroeconomic and microeconomic analysis of the market, the Investment Manager can take more active positioning in terms of duration (duration measures in numbers of years, the portfolio's sensitivity to interest rate variations), geographical allocation and/or sector or issuer selection compared to the Benchmark. Thus, the deviation from the Benchmark is expected to be significant. However, in certain market conditions (high credit market volatility, turmoil...), the Sub-Fund's positioning on the above indicators may be close to the Benchmark. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:- geographical allocation- duration positioning (duration measures in numbers of years the portfolio's sensitivity to the interest rate variations)- yield curve positioning (the yield curve illustrates the relation between investment term and bond yield)- issuer selection. The Sub-Fund invests:- at least two thirds of its assets in debt securities issued in emerging countries (Latin America, Eastern Europe, Asia, Africa, Middle East) by governments or quasi government issuers as well as private or public companies denominated in USD, Euro or local currencies- up to one third of its assets in money market instruments- up to 20% of its assets in debt securities denominated in local currencies, unhedged. The Sub-Fund may invest in or be exposed to up to 10% of its net assets in securities traded on the CIBM through Bond Connect. The Sub-Fund may, up to 10%, hold distressed and defaulted securities as a result of their rating downgrade, if they are considered to be consistent with the Sub-Fund's objective. These securities are expected to be sold within 6 months unless specific events prevent the Investment Manager from sourcing their liquidity. The Sub-Fund may also invest in or be exposed to callable bonds up to 50% of its net assets. The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos). Within a limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes. The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Risk Indicator

The information shown below is from the KID PRIIPS.

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7 which is the a medium-low risk class. This rates the potential losses from future performance at a medium-low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance & Risk

Past performance is not a reliable indicator of future results.

NAV data - in base 100 (in USD) - Accumulation share

Past performances, and the past NAV data are not a reliable indicator as to future performance or future NAV data. Performance calculations and the NAV data are based on the NAV, net of management fees, dividends reinvested, out of fees and taxes for the investors.

ESG-metrics definition

The fund integrates ESG criteria (environment, social, governance) into its management. Managers have ESG scores ranging from 0 to 10 for each of the ESG criteria for a large part of the investment universe. These ESG scores are based on raw data provided by external providers such as MSCI, Ethifinance, Gaia, but also AXA IM's fundamental and qualitative analysis teams.

E pillar: an analysis is made of environmental risks such as vulnerability to climate change, natural capital (risk of water shortage, solid programs to preserve biodiversity if important impact on fragile ecosystems, raw materials used to reduce environmental impact), toxic emissions, hazardous waste, environmental regulations, ...

S pillar: quality in the social pillar is assessed by considering personnel management, human capital development, financial protection of consumers, product safety and quality, community relations, access to health services, finance,

G pillar: the general organization of companies is analyzed through the structure of the board of directors, the directors' remuneration, business ethics, fiscal transparency...

The absolute ESG rating is based on a weighted average of the absolute ESG scores of the assets in the portfolio. If the fund has obtained 1 tree (5 trees), it means that it belongs to the lowest (highest) absolute ESG rating category.

The relative ESG rating is the difference between the absolute ESG score of the portfolio and that of the benchmark index. If the relative ESG rating is mentioned in green, this means that the absolute ESG score of the portfolio is at least 3% higher than that of the benchmark index. If the relative ESG rating is mentioned in yellow, this means that the absolute ESG score of the portfolio is between -3% and + 3% to that of the benchmark index. If the relative ESG rating is indicated in orange, this means that the absolute ESG score of the portfolio is at least -3% lower than that of the benchmark index.

To find out more about the integration of ESG criteria, the evaluation method, the ESG ratings and their scale, go to <https://private-investors.axa-im.be/fr/esg>. The ESG ratings are used for informational purposes only. The portfolio does not have regulatory nor contractual ESG objectives.

The fact that the fund obtains the ratings does not mean that it meets your sustainability objectives. For more information on this subject, please refer to www.fsma.be/fr/finance-durable or www.fsma.be/nl/duurzame-financiering.

The decision to invest in the promoted fund should take into account all the characteristics of the fund in question.

'Nominee'-structure**	Applicable according to the choice of the distributor. Fee applicable according to the distributor
Swing pricing***	2% max of the NAV

*See fee schedule from each distributor.

**The shares of the shareholders are registered in a securities account under their own name at the 'Nominee'. Then all shareholders of shares are globally registered on an investors 'nominee'-account in the shareholders register of the sub-fund.

***The swing pricing mechanism consists in adjusting a fund share price to subscriptions / redemptions up (in case of positive net flows) or down (in case of negative net flows) for a given dealing day, to counter the trading costs incurred by large in- or outflows, thus preserving the fund performance.

As disclosed in the most recent Annual Report, the ongoing charges calculation excludes performance fees, but includes management and applied services fees. The effective Applied Service Fee is accrued at each calculation of the Net Asset Value and included in the ongoing charges of each Share Class. The investment will be reduced by the payment of the above mentioned fees.

Subscription Redemption

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors. The Net Asset Value of this Sub-Fund is calculated on a daily basis.

How to Invest

Before making an investment, investors should read the relevant Prospectus and the Key Investor Information Document (particularly for UK investors) / Key Information Document / scheme documents, which provide full product details including investment charges and risks. The information contained herein is not a substitute for those documents or for professional external advice.

Retail Investors

Retail investors should contact their Financial intermediary.

Disclaimers

This marketing communication does not constitute on the part of AXA Investment Managers a solicitation or investment, legal or tax advice. This material does not contain sufficient information to support an investment decision. The information contained herein is intended solely for the entity and/or person(s) to which it has been delivered, unless otherwise allowed under applicable agreements.

The tax treatment associated with holding, buying or disposing of shares or units in a fund depends on the status or tax treatment of each investor and may be subject to change. Potential investors are strongly encouraged to seek the advice of their own tax adviser.

Due to its simplification, this document is partial and opinions, estimates and forecasts herein are subjective and subject to change without notice. There is no guarantee forecasts made will come to pass. Data, figures, declarations, analysis, predictions and other information in this document is provided based on our state of knowledge at the time of creation of this document. This material does not contain sufficient information to support an investment decision.

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding. Commissions and costs have an adverse effect on the performance of

Specific characteristics (Continued)

the fund.

The Fund's characteristics do not protect the investors from the potential effect of inflation over time. The investments and/or any potential income generated during the period will not be adjusted by the rate of inflation over the same period. Thus, the return on the fund adjusted from the rate of inflation could be negative. Consequently, the inflation might undermine the performance and/or the value of your investment.

In the case where the currency of investment is different from the shareclass currency the gains can vary considerably due to the fluctuations of the exchange rate.

Exchange rate fluctuations may have a positive or a negative impact on the returns in Euro.

During some periods, the net asset value and some historical returns presented, converted into euro, were negatively impacted by the exchange rates fluctuations between the USD and Euro.

Cash includes liquid assets and equivalent items such as cash held in bank accounts, positions in money market funds or unrealised gains receivable or payable in respect of currency hedging transactions.

The Fund referenced herein has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly in the United States or to any US Person unless the securities are registered under the Act, or an exemption from the registration requirements of the Act is available. A US Person is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).

The fund or sub fund is a part of AXA World Funds. AXA WORLD FUNDS 's registered office is 49, avenue J.F Kennedy L-1885 Luxembourg. The Company is registered under the number B. 63.116 at the "Registre de Commerce et des Sociétés" The Company is a Luxembourg SICAV UCITS IV approved by the CSSF and managed by AXA Investment Managers Paris, a company incorporated under the laws of France, having its registered office located at Tour Majunga – La Défense 9 – 6, place de la Pyramide – 92800 Puteaux, registered with the Nanterre Trade and Companies Register under number 353 534 506, and a Portfolio Management Company, holder of AMF approval no. GP 92-008, issued on 7 April 1992.

Companies shown are for illustrative purposes only at the date of this report and may no longer be in the portfolio later. It does not constitute investment research or financial analysis relating to

transactions in financial instruments, nor does it constitute an offer to buy or sell any investments, products or services, and should not be considered as solicitation or investment, legal or tax advice, a recommendation for an investment strategy or a personalized recommendation to buy or sell securities.

In the credit rating (per holding), to each holding of the portfolio is a rating issued by the two following rating agencies : Moody's (www.moody.com), and S & P (www.standardandpoors.com). Based on a comparison between the ratings for each holding, the management company takes into account the worst rating (Moody's or S & P) for each holding. The identified ratings are expressed or converted into S&P ratings to obtain a uniform graph with the total portfolio breakdown. For the meaning of the letters of the ratings as listed on the graph, please refer to the website www.standardandpoors.com. For more information on the methodology, please refer to the websites of the rating agencies or please contact the financial service CACEIS Bank, Belgium Branch.

Belgian Tax on Savings : The physical person investing in the Fund will be subject to the withholding tax rate of 30% on dividends distribution (distribution class) and/or on the gain when redeeming accumulating shares (accumulating and/or distribution class) in the Fund

- holding more than 25% in debt securities if the physical person acquired the share before January 1st, 2018 or
- holding more than 10% in debt securities if the physical person acquired the shares from January 1st, 2018.

For further information, please contact the financial service CACEIS Bank, Belgium Branch.

Likewise for information on the rating agencies.

Should you have a problem, we suggest you make your complaint to your distributor. You can find the contact persons of the internal complaint service of each distributor via the following web link: <https://private-investors.axa-im.be/fr/plainte>. If the treatment given does not satisfy you, we recommend you contact the Ombudsman in financial conflicts: ombudsman@ombudsfm.be.

In the event of dissatisfaction with the products or services, you have the right to make a complaint either with the marketer or directly with the management company (more information on our complaints policy <https://private-investors.axa-im.be/fr/plainte>). You also have the right to take legal or extra-judicial action at any time if you reside in one of the countries of the European Union. The European online dispute resolution platform allows you to enter a complaint form

Specific characteristics (Continued)

(<https://ec.europa.eu/consumers/odr/main/?event=main.home2.show> and informs you, depending on your jurisdiction, about your means of redress

(<https://ec.europa.eu/consumers/odr/main/?event=main.adr.show2>).

Please note that the management company reserves the right, at any time, to no longer market the product(s) mentioned in this communication in a European Union country by notification to its authority of supervision in accordance with European passport rules. A summary the investors' rights is available in French and Dutch on our website <https://private-investors.axa-im.be/droits-des-investisseurs>

Glossary

Duration: Corresponds to the weighted average life of a bond portfolio, taking into account coupon payments and redemption of the nominal amount.

Modified duration is the change in the price of a bond caused by an increase or decrease in interest rates of 100-basis-point (1%).

Modified duration to worst: It is the sensitivity of a bond's price in response to an interest rate movement of +/-1%, using the nearest early redemption date or the maturity date, whichever comes first. Note that the price of a bond has an inverse relationship with interest rates: an increase in the latter will cause the price of a bond to fall, and vice versa (duration measures, in number of years, the portfolio's sensitivity to changes in interest rates).

Current yield: Current yield is the rate of return on a bond investment. In other terms, an investment's annual income (interest) divided by the current price of the security.

Yield to worst: This calculation takes into account bonds with an early redemption option. It is similar to the lowest yield that a bond can offer its holder, excluding payment default.

Yield (to Maturity): The total rate of return that will have been earned by a bond when it makes all interest payments and repays the original principal.

NDS: Negotiable debt securities

Rating: The rating corresponds to the rating issued by a rating agency.

Option adjusted spread (OAS): The measurement in basis point of the spread of a fixed-income security rate and the risk-free rate of return, which is then adjusted to take into account an integrated option. This integrated option is generally linked to the investment in bonds with a redemption option before the maturity date.

Weighted average maturity (WAM): The weighted average amount of time until the securities in a portfolio mature. The higher the WAM, the longer it takes for the overall portfolio to mature.

Volatility (%): is an indicative measure of degree of variation of an asset's price changes over time.

Relative Risk/Tracking Error (%): measures, in standard deviation, the fluctuation of returns of a portfolio relative to the fluctuation of returns of a reference index. The tracking error can be viewed as an indicator of how actively a fund is managed. The lower the number the closer the fund's historic performance has followed its benchmark.

Sharpe ratio: is the measure of the risk-adjusted excess return over risk free rate of a financial portfolio and is used to compare the excess return of an investment to its risk. The higher the Sharpe ratio the better the return compared to the risk taken.

Information Ratio (IR): is a measurement of portfolio returns above the returns of a benchmark to the volatility of those excess returns. The IR is used to compare excess return over a benchmark to excess risk over a benchmark. E.g : A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance who has taken more risk.
