Glossary

FY1 Price to Earnings: A measure of the price to earnings ratio (P/E) using forecasted earnings for the P/E calculation. The forecasted earnings for FY1 represent the forecasted earnings at the end of the next fiscal year-end period.

Historical 3 Yr EPS Growth: Historical 3 Year Earning Per Share. The portion of a company's profit allocated to each outstanding share of common stock. Serves as an indicator of a company's profitability. The past 3 years of earnings per share are used within this calculation.

Historical 3 Yr Sales Growth: The rate at which sales have increased for the fund's underlying holdings over the last three years.

Return on Equity: A measurement of a corporation's profitability that reveals how much profit a company generates with the money shareholders have invested.

Standard Deviation: A measure of the degree to which a fund's return varies from its previous returns from the average of all similar funds. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information
