Estimado Accionista:

Este informe recoge una actualización de AllianceBernstein (el "Fondo") correspondiente al ejercicio semianual finalizado el 28 de febrero de 2011.

La economía mundial parece lista para continuar el crecimiento en 2011 y la actividad empresarial ha tenido un fuerte arranque. Asistimos a mejoras perceptibles en el empleo en los principales países desarrollados, y los consumidores parecen estar más dispuestos al gasto, a pesar de que los estudios reflejen una baja confianza. Los países del G7, especialmente EE. UU. y Alemania, se encuentran entre los de mejor rendimiento del sector productivo, mientras que la demanda en las economías de los mercados emergentes impulsa un sólido ciclo de exportaciones. El aumento de los pedidos es reflejo igualmente de una mayor fortaleza en la producción mundial. Sin embargo, las revueltas de Oriente Próximo y los trágicos acontecimientos de Japón han ensombrecido las perspectivas generales. En Oriente Próximo, los trastornos en la producción de petróleo en la región han hecho subir los precios, con el consiguiente repunte de los precios de las materias primas. El desarrollo de la crisis en Japón y sus ramificaciones aún están siendo valorados. Entretanto, no creemos que los fundamentales básicos del ciclo de crecimiento mundial estén en peligro, anticipamos una mayor inflación y un menor crecimiento.

En EE. UU., se prevé que la combinación de un crecimiento relativamente rápido y una mejora en la determinación de los precios produzca aumentos en los beneficios de explotación empresariales. Es probable que también el trabajo se beneficie, ya que un crecimiento sostenido del empleo contribuye a reducir la tasa de desempleo, con planes de contratación de altos directivos empresariales a comienzos de 2011 en máximos no vistos desde hace años. Creemos que el crecimiento seguirá impulsado principalmente por una mezcla de exportaciones, así como por un mayor gasto en capital, a fin de afrontar la demanda de los mercados emergentes y responder al paquete de estímulos de finales de año. Aunque se prevé que el gasto en consumo, la inversión en vivienda e inmuebles no residenciales crezca a un ritmo mucho más lento, estos deberían contribuir en gran medida

a la aceleración del crecimiento en 2011. El mayor riesgo para la economía actual es la incertidumbre y la volatilidad en torno al precio del petróleo.

El crecimiento en la zona del Euro ha ganado impulso en los primeros meses de 2011, y creemos que la zona avanza hacia un ciclo de crecimiento de cierta normalidad. Un buen indicador es el índice compuesto PMI (Purchasing Managers Index) de producción y servicios, que se encuentra en su máximo nivel desde julio de 2006. El Banco Central Europeo (BCE) ha indicado que pretende subir sus tipos de interés próximamente, para evitar un repunte de la inflación subyacente. Además, es probable que aumente la presión en el Banco de Inglaterra. El BCE tendrá que mantener cierta flexibilidad en caso de que una subida de tipos lleve a una intensificación de la crisis de la deuda soberana.

En el momento de redactar esta carta, el impacto del reciente terremoto, del posterior tsunami y de la crisis nuclear en Japón no ha cesado y es difícil de sopesar. Creemos, no obstante, que es una gran oportunidad para la recuperación y la reconstrucción, teniendo en cuenta, además que el país tiene muy cerca grandes perspectivas de crecimiento a largo plazo en los mercados emergentes.

El crecimiento parece haberse frenado en los mercados emergentes, donde muchas regiones padecen los efectos de los golpes del precio de la energía. En los mercados de países emergentes de Europa, Oriente Próximo y África, la producción industrial se expandió a un ritmo sólido al cierre de 2010, y se espera cierta corrección a lo largo de 2011. La inflación se ha acelerado en algunas regiones, si bien se ha relajado en el resto de la zona, gracias a los efectos favorables del periodo de referencia sobre los alimentos y la energía. A pesar del incremento de las presiones sobre la inflación subyacente, casi todos los bancos centrales se mantuvieron a la espera.

La Cartera mantiene en la actualidad inversiones garantizadas por préstamos hipotecarios subprime. Los préstamos subprime se ofrecen a los propietarios inmobiliarios que no presentan un historial de deuda o que han tenido problemas para cumplir sus obligaciones de deuda. Debido a que la amortización es menos cierta, los prestatarios subprime pagan un tipo de interés superior al de los prestatarios de primera categoría. A 28.02.11, la exposición total de la Cartera a las inversiones subprime era del 8.16%. Estas inversiones se valoran según las Políticas de Valoración de la Cartera (véase Nota B1 para obtener más información).

NOTA A: Información General

ACMBernstein (el “Fondo”) es un fondo de inversión colectivo (*fonds commun de placement*) constituido de conformidad con las leyes del Gran Ducado de Luxemburgo. El Fondo está gestionado en interés de sus copropietarios (los “Accionistas”) por AllianceBernstein (Luxemburgo) S.A. (la “Sociedad Gestora”), una compañía establecida bajo las leyes del Gran Ducado de Luxemburgo y con sede social en Luxemburgo. El fondo realiza operaciones fuera de Austria, Alemania y Suiza bajo el nombre de AllianceBernstein.

La cartera Pacific Ex-Japan Equity Portfolio comenzó a operar el 16 de septiembre de 2010.

El 24 de enero de 2011, el Consejo de Administración de la Sociedad Gestora decidió aprobar la liquidación, con vigencia el 28 de febrero de 2011 de la American Equity Blend Portfolio, la Japan Equity Blend Portfolio y la Japan Growth Portfolio.

El Fondo está compuesto por grupos de activos independientes formados en la actualidad por 32 carteras (individualmente, una “Cartera” y, conjuntamente, las “Carteras”). Cada clase de acciones representa un interés en los valores de inversión de cada Cartera según corresponda y otros activos netos. Todas las acciones de una misma clase tienen los mismos derechos en cuanto a dividendos y reembolsos. A continuación se enumeran las fechas de lanzamiento de cada Cartera, así como las Clases de acciones ofrecidas:

NOTA B: Políticas Contables Relevantes

Los Estados Financieros se han elaborado de conformidad con las exigencias legales y normativas de Luxemburgo relacionadas con el Fondo. A continuación se encuentra un resumen de las principales políticas contables de las Carteras.

1. Valoración

1.1 Inversiones en Títulos

Los títulos cotizados en un mercado de títulos o contratados en cualquier otro mercado regulado se valorarán según el último precio disponible en dicha bolsa o mercado o, si no está disponible dicho precio, según el promedio del precio de demanda y de oferta cotizados dicho día. Si un valor se cotiza en diversas bolsas o mercados, se utiliza el último precio disponible en la bolsa o mercado que constituya el principal mercado para dicho valor.

Los títulos se valoran según su valor actual de mercado, calculado sobre la base de cotizaciones de mercado o, si las cotizaciones de mercado no están disponibles fácilmente o se estiman poco fiables, según el “valor justo” determinado de conformidad con los procedimientos establecidos por, y bajo la supervisión general del Consejo de Administración de la Sociedad Gestora. Los procedimientos de valor justo están diseñados para ajustar los precios de cierre de mercado de los valores de la Cartera, con el fin de reflejar lo que se considera que es el valor justo de dichos valores en el Punto de Valoración de la Cartera.

Cuando se emplean procedimientos de valoración justa con relación a un título particular en Cartera, se pueden considerar varios factores objetivos y subjetivos, incluidos, entre otros, los

desarrollos que afecten al título o que impliquen a un mercado completo desde el último precio notificado del título, las valoraciones actuales de índices de acciones relevantes o declaraciones de determinadas autoridades estatales. Los precios de valor justo basados en herramientas de ajuste de proveedores terceros pueden utilizarse en la medida en que estén disponibles. Por tanto, cuando se utilizan procedimientos de valoración justa, los precios de los títulos individuales en Cartera utilizados para calcular el VNC del activo de la Cartera pueden diferir de los precios cotizados o publicados para los mismos títulos.

En consecuencia, como puede ser el caso de un precio en bolsa comunicado previamente, el precio de cualquier título de la Cartera determinado utilizando los procedimientos de fijación de precios de valor justo puede ser sustancialmente diferente del precio a realizar con la venta de dicho título.

Para los títulos de la Cartera negociados principalmente en las bolsas de los Estados Unidos, se espera que los procedimientos de determinación de precios de valor justo se empleen sólo en circunstancias muy restringidas tales como, por ejemplo, el cierre temprano de una bolsa en la que se negocia un título particular o la suspensión de negociación de un determinado valor. No obstante, se prevé que los procedimientos de determinación de precios de valor justo se utilizarán frecuentemente para títulos negociados en bolsas u otros mercados fuera de EE.UU., en particular en mercados europeos y asiáticos, porque, entre otros motivos, estos mercados cierran mucho antes que el Punto de Valoración de la Cartera. Entre el cierre de estos mercados y el Punto de Valoración de la Cartera respectivo pueden suceder eventos muy significativos, incluidos los movimientos del

mercado en su conjunto. De forma especial, los eventos en el mercado de EE.UU. en un día de negociación después del cierre de estos otros mercados pueden afectar al valor de los títulos de la Cartera. Por favor, tenga en cuenta que durante el ejercicio fiscal actual las carteras Japan Equity Blend Portfolio, Japan Growth Portfolio, y Japan Strategic Value Portfolio han adoptado la política de aplicar únicamente el valor justo a los títulos cuando se considere relevante en base al rendimiento de una referencia y a los flujos relativos de las acciones de capitalización. Las carteras European Growth Portfolio, European Value Portfolio, y European Strategic Value Portfolio actualmente no aplican bajo ninguna circunstancia el valor justo a los títulos.

Los títulos de renta fija (i), los títulos no cotizados en ningún mercado bursátil o negociados en un mercado regulado (ii), y los títulos cuya negociación en un mercado bursátil o regulado es estrecha (iii), se valoran al precio de oferta más reciente ofrecido por los principales creadores de mercado. Si no existe dicho precio de mercado, o si el precio de mercado no es representativo de un valor justo de mercado de un título, el título se valorará de una forma determinada para reflejar su valor justo de conformidad con los procedimientos establecidos por, y bajo la supervisión general del Consejo de Administración de la Sociedad Gestora.

Los títulos de deuda y las obligaciones a corto plazo con una vigencia inferior a 60 días se valoran al coste de amortización, salvo que este método no represente su valor justo.

OTC y otros derivados se valoran en base al precio de oferta o diferencial cotizado por un agente bursátil en dicho título.

1.2 Contratos de Futuros Financieros

Los depósitos de garantía iniciales se realizan al establecer contratos de futuros. Durante el periodo en el que está abierto el contrato de futuros, las variaciones del valor del contrato se reconocen como ganancias no obtenidas o pérdidas diarias y reales para reflejar el valor de mercado del contrato al final de cada día de negociación. Los pagos de márgenes de variación se realizan o se reciben en función si se originaron ganancias no obtenidas o pérdidas. Cuando se cierra el contrato se registra una ganancia no obtenida o una pérdida. Esta ganancia obtenida o pérdida es igual a la diferencia entre el proceso de la transacción de cierre (o coste de) y la base del Fondo en el contrato.

Los contratos futuros abiertos se valorarán utilizando el precio de liquidación al cierre o, a falta de este precio, el precio de oferta cotizado más reciente. Si no existen cotizaciones disponibles para el día de las valoraciones, se utilizará el último precio de liquidación al cierre disponible.

1.3 Contratos de Divisas a Plazos

La ganancia o pérdida no realizada en contratos abiertos en moneda extranjera se calcula como la diferencia entre el tipo contratado y el tipo al cierre del contrato. La ganancia o pérdida realizada incluye las ganancias o pérdidas netas en los contratos a plazo en moneda extranjera que se hayan liquidado o compensado por otros contratos con la misma contraparte.

1.4 Opciones compradas y opciones suscritas

Cuando se compra una opción, se registra un importe igual a la prima pagada como una inversión y se ajusta posteriormente al

valor actual de mercado de la opción comprada. Las primas pagadas para la compra de opciones que vencen sin ser ejercidas se consideran como pérdidas sufridas en la fecha de vencimiento. Si se ejerce una opción de venta comprada, la prima se resta de los ingresos de la venta del título subyacente o la divisa extranjera para la determinación de si la Cartera en cuestión ha obtenido una ganancia o sufrido una pérdida. Si se ejerce una opción de compra, la prima aumenta la base de coste del título o divisa extranjera comprados por la Cartera en cuestión. Si se suscribe una opción, se registra un importe igual a la prima recibida por la Cartera pertinente como una deuda y se ajusta posteriormente al valor actual de mercado de la opción suscrita. Las primas recibidas de opciones suscritas que vencen sin ser ejercidas son consideradas por la Cartera pertinente como ganancias obtenidas en la fecha de vencimiento. Si se ejerce una opción de compra suscrita, la prima se suma a los ingresos de la venta del título o divisa extranjera subyacentes para determinar si la Cartera en cuestión ha obtenido una ganancia o sufrido una pérdida. Si se ejerce una opción de venta, la prima reduce la base de coste del título o divisa extranjera comprados por la Cartera pertinente.

1.5 Acuerdos de Recompra

En virtud de un acuerdo de recompra, el Fondo adquiere valores y acuerda revenderlos en una fecha y a un precio acordados mutuamente. Los acuerdos de recompra se valoran según el coste con el interés acumulado desde la fecha de la adquisición.

1.6 Inversiones en otros organismos de inversión colectiva

Las inversiones en otros organismos de inversión colectiva se valoran al último valor neto contable disponible para el organismo de inversión colectiva en cuestión.

1.7 Contrato de swap (permuta financiera)

Las carteras acumulan diariamente pagos anticipados en contratos de swap, con un importe neto contabilizado en revalorización (desvalorización) no realizada en el estado de pasivo y activo. Una vez hechos los pagos provisionales en efectivo o cuando se rescinde un contrato de swap, el importe neto se contabiliza como ganancia o pérdida realizada en swaps en el estado de operaciones. Las fluctuaciones en el valor de los contratos de swap se contabilizan como componente del cambio neto en las ganancias o pérdidas no realizadas en swaps.

2. Gastos de Constitución

Los gastos corporativos para las siguientes Carteras se irán amortizando de forma lineal en las siguientes fechas:

| AllianceBernstein- | Fechas |
|-----------------------------------|----------------|
| Global Value, Active Sterling | mayo de 2013 |
| Asia Global Balanced Portfolio | abril de 2015 |
| Pacific Ex-Japan Equity Portfolio | agosto de 2015 |

3. Método de Asignación

Los ingresos y gastos (excepto las comisiones por distribución y gestión específicas de cada clase) para las Carteras “equilibradas” y de “renta fija” se asignan diariamente utilizando un modelo de asignación híbrido. Este modelo realiza las asignaciones basándose en el porcentaje proporcionado de cada clase del valor combinado de las acciones pagadas para aquellas clases que dan derecho a un dividendo diario y el valor de las acciones en circulación para aquellas clases que dan derecho a un dividendo

mensual o a ningún dividendo. Los ingresos y gastos para las Carteras de “renta variable” se asignan a diario por el valor de sus acciones proporcionales en circulación de cada clase de acciones. En el caso de todas las Carteras, las pérdidas y ganancias realizadas o no realizadas se asignan a diario por el valor de sus acciones proporcionales en circulación de cada clase. Los gastos específicos de distribución y de la sociedad gestora y las ganancias obtenidas y no obtenidas y las pérdidas sufridas en los contratos a plazo de divisas relativos a las clases de acciones con cobertura frente al riesgo de cambio se cargan/asignan directamente a la clase respectiva.

Debido a la naturaleza institucional distinta de todos los tipos de las acciones de clase S de las Carteras, ciertos gastos de los fondos se asignan, cuando procede, a las acciones de clase S que corresponda, en función de la actividad mínima del accionista y de los requisitos de nivel de la cuenta.

4. Conversión de Divisas

Los valores expresados en una divisa distinta a la divisa base en la que se denomina una Cartera determinada en el Reglamento de Gestión, serán convertidos aplicando la media del último precio de compra y de venta disponible.

Las transacciones en monedas extranjeras se convierten a la moneda de cada Cartera con la tasa de cambio vigente en la fecha de la transacción.

Los Estados Financieros que combinan Activos y Pasivos se presentan en USD a la tasa de cambio vigentes en la fecha de los

Estados Financieros que combinan Activos y Pasivos, y los Estados Financieros que combinan Transacciones y Modificaciones de los Activos netos se presentan en USD a la tasa de cambio media vigente durante el ejercicio.

Los tipos de cambio aplicados en los estados financieros son: tipo nominal 1.3799 y tipo medio 1.4024 para EUR respecto a USD, tipo nominal 0.0122 y tipo promedio 0.0121 para JPY respecto a USD, tipo nominal 1.6257 y tipo medio 1.5810 para GBP respecto a USD.

5. Ingresos por Inversión y Operaciones de Inversión

Los ingresos por dividendos se contabilizan en la fecha en que se acuerda el reparto de dividendos. Los ingresos por intereses se devengan diariamente. Las ganancias y pérdidas de inversión de las Carteras se determinan sobre la base del coste medio y las primas amortizadas. El Fondo aumenta los descuentos como ajustes de base a los ingresos por intereses. Las operaciones de inversión se contabilizan indicando el día siguiente a la fecha de negociación.

6. Cálculos

La preparación de los Estados Financieros de conformidad con los principios contables comúnmente aceptados en Luxemburgo exige a la gestión la realización de cálculos y presunciones que afectan a los importes comunicados de los activos y los pasivos y la revelación de activos y pasivos condicionados en la fecha de los Estados Financieros y los importes comunicados de ingresos y gastos durante el ejercicio de análisis. Los resultados reales pueden diferir de esos cálculos.

NOTA C: Impuestos

Como un *fonds commun de placement* (FCP) luxemburgués y de conformidad con las leyes fiscales vigentes, el Fondo no está sujeto al impuesto sobre la renta, retenciones a cuenta de impuestos ni al impuesto sobre las ganancias patrimoniales de Luxemburgo. El Fondo está sujeto a la *taxe d'abonnement* de Luxemburgo, a un tipo de gravamen anual del 0.05% (la cartera Short Maturity Dollar Portfolio y todas las Clases de acciones S,

S1, S1 2 y (y las acciones H aplicables) S1A GB, SA GB, SB IE, SB GB, S1B IE, S1B GB, S1X y SK están sujetas a un tipo del 0.01% anual), determinado sobre la base de los activos netos totales establecidos del último día de cada trimestre. En determinados países, los intereses, los dividendos y las ganancias patrimoniales de los valores pueden estar sujetos a retención en origen o al impuesto sobre las ganancias patrimoniales.

NOTA D: Distribuciones

Cuando resulte aplicable, las distribuciones pagadas a los accionistas se contabilizan en la fecha de reparto de las mismas.

NOTA E: Comisión de Gestión de Inversiones y Otras Transacciones con Afiliadas

El Fondo paga a AllianceBernstein (Luxembourg) S.A. (la Sociedad Gestora) una comisión de gestión. Según los términos de los respectivos Contratos de Gestión de Inversiones respecto a cada Cartera, la Sociedad Gestora paga a Alliance Bernstein L.P. (el “Gestor de Inversiones”) una comisión de inversiones de la comisión de gestión obtenida).

La Sociedad Gestora ha aceptado voluntariamente asumir ciertos gastos en la medida necesaria para limitar los gastos operativos totales sobre una base anual.

Estas limitaciones se han establecido de la siguiente manera (como un porcentaje del activo neto medio y diario):

NOTA F: Acuerdos de Comisión En Especie

Durante el periodo finalizado el 28 de febrero de 2011, AllianceBernstein L.P. recibió y celebró contratos/comisiones blandas en dólares con corredores en relación con las carteras del Fondo que invierten en títulos de renta variable y con respecto a los cuales pueden recibirse ciertos bienes y servicios como apoyo en el proceso de toma de decisión en la inversión. Tales acuerdos de comisión blanda se basaron en que la ejecución de las transacciones a nombre del Fondo debía ser coherente con los mejores estándares de ejecución y que las comisiones de corretaje no sobrepasaran las comisiones institucionales habituales por un servicio completo. Los bienes y servicios recibidos incluyen una investigación especialista de la industria, de empresas y

consumidores, análisis de cartera y mercado, así como el software informático empleado para facilitar tales servicios. La naturaleza de los productos y servicios recibidos es tal que los beneficios recibidos en virtud del acuerdo deberán ayudar a proporcionar servicios de inversión para el Fondo y podrán contribuir a una mejora del mismo. Cabe destacar, para evitar cualquier tipo de duda, que estos productos y servicios no incluyen viajes, alojamiento, actividades de ocio, servicios o productos administrativos generales, instalaciones o equipos generales de oficina, cuotas de socios, salarios de empleados o pagos monetarios directos. En los informes periódicos del Fondo se revelarán los acuerdos de comisión blanda.

NOTA G: Contratos a plazo en moneda extranjera

Un contrato a plazo en moneda extranjera es un compromiso de compra o venta de una moneda extranjera en una fecha futura a una tasa a plazo negociada. La pérdida o ganancia resultante de la diferencia entre el contrato original y el cierre de dicho contrato se incluye en las pérdidas y ganancias netas realizadas en inversiones y divisas.

Las fluctuaciones en el valor de contratos a plazo en moneda extranjera abiertos se reflejan a efectos de información financiera como un componente de valorización o desvalorización a plazo en contratos a plazo en moneda extranjera.

Uno más de las clases de acciones de una cartera que se ofrecen en una divisa particular (individualmente un “Divisa Ofrecida”) se pueden cubrir contra las fluctuaciones de la divisa ofrecida. Toda clase de acción de este tipo constituirá una “Clase de Acción con Cobertura frente al Riesgo de Cambio”. Las Clases de Acción con Cobertura frente al Riesgo de Cambio tienen como objetivo proporcionar a los inversores un rendimiento que se corresponda de manera más cercana con el rendimiento de la divisa base de la Cartera reduciendo el efecto de las fluctuaciones del tipo de cambio entre la divisa base de la cartera y la Divisa Ofrecida relevante, teniendo en cuenta aspectos prácticos como los costes de las transacciones. La estrategia de cobertura empleada se ha diseñado para reducir, aunque puede no eliminar,

la exposición al riesgo de cambio entre la divisa base de la cartera y la Divisa Ofrecida.

Existe el riesgo de que una contraparte no sea capaz de cumplir los términos de un contrato y de que se produzcan movimientos imprevistos en el valor de una divisa con relación al dólar estadounidense o al euro o al yen japonés o a la libra esterlina, o al dólar australiano.

Dado que no existe una separación del pasivo entre las distintas clases de acciones de una cartera, existe el riesgo remoto de que, en determinadas circunstancias, las transacciones de cobertura frente al riesgo de cambio en relación con una Clase de Acción con Cobertura frente al Riesgo de Cambio pudiera resultar en pasivos que podrían afectar al Valor Neto Contable de las demás clases de acciones de la misma cartera, en cuyo caso los activos de las demás clases de acciones de la cartera se podrían utilizar para cubrir los pasivos contraídos por dicha Clase de Acción con Cobertura frente al Riesgo de Cambio.

Los títulos del Fondo se utilizan como garantía de los contratos a plazos sobre divisa incluidos los utilizados para la cobertura de las clases de acción.

En la Tabla 2 (página 263) se encuentran los contratos a plazo en moneda extranjera pendientes al 28 de febrero de 2011.

NOTA H: Pactos de Recompra

Los pactos de recompra están garantizados mediante obligaciones de los Estados Unidos, sus organismos o agencias. Los valores subyacentes al pacto de recompra serán mantenidos por el Depos-

itario en todo momento en una cuantía que, al menos, equivalga al precio de recompra, incluido los intereses devengados.

A fecha de 28 de febrero de 2011, no estaban vigentes Pactos de recompra.

NOTA I: Contratos de Futuros Financieros

El Fondo puede comprar o vender contratos de futuros financieros. El Fondo asume el riesgo bursátil que puede derivarse de

las variaciones en el valor de estos instrumentos financieros. Las actividades del Fondo en contratos de futuros financieros se llevan a cabo a través de bolsas reguladas por lo que las mismas no conllevan el riesgo de contrapartida.

En el momento en que el Fondo celebra un contrato de futuros, el Fondo deposita y mantiene con el agente bursátil, en concepto de garantía prendaria, un margen inicial en la proporción que exija la bolsa en la cual se efectúa la transacción. A tenor del contrato, el Fondo conviene en recibir de o pagar al intermediario un monto de efectivo equivalente a la fluctuación diaria del valor del contrato.

El líquido mantenido por/en poder del broker al 28 de febrero de 2011 se registra como parte del líquido en el Estado de Activos y Pasivos. La siguiente tabla muestra el efectivo poseído/debido al Agente Bursátil a 28 de febrero de 2011.

NOTA J: Transacciones de swap

Un swap es un acuerdo que obliga a dos partes a intercambiar una serie de flujos de efectivo a intervalos específicos basándose o calculados conforme a cambios en precios o tipos específicos por una cantidad específica de un activo subyacente o una cantidad notional determinada de otra manera.

Swaps de incumplimiento de crédito

El comprador de un acuerdo de swap de incumplimiento de crédito está obligado a hacer al vendedor un flujo periódico de pagos mientras dure el contrato a cambio de un pago contingente al ocurrir un acontecimiento de crédito con respecto a una obligación de referencia subyacente. La siguiente table refleja la apreciación/(depreciación) no realizada en posiciones abiertas de swap de la Emerging Markets Debt Portfolio el 28 de febrero de 2011:

| Emerging Markets Debt Portfolio | 28 de febrero de 2011 | |

NOTA K: Préstamos de los títulos de la cartera

Una cartera puede hacer préstamos garantizados de sus títulos. Los riesgos en el préstamo de títulos, así como en otras ampliaciones de crédito, consisten en la posible pérdida de derechos en la colateral si el prestatario no responde financieramente. Además, una cartera estará expuesta al riesgo de que la venta de una colateral realizada ante el incumplimiento del prestatario no produzca ganancias suficientes para sustituir los títulos prestados. Al determinar si prestar títulos a un prestatario particular, el Gestor de Inversiones tendrá en cuenta todos los hechos y circunstancias relevantes, incluida la solvencia crediticia del prestatario.

Tales recibos o pagos se conocen como el margen de variación y los mismos son contabilizados por el Fondo como ganancias no obtenidas o pérdidas. Cuando se cierra el contrato, el Fondo contabiliza una ganancia obtenida o pérdida equivalente a la diferencia entre el valor del contrato en el momento en que se abrió y en el momento en que se cerró.

Los contratos de futuros financieros pendientes del Fondo a fecha de 28 de febrero de 2011 se detallan en la Tabla 3 (página 271).

Cada Cartera del Fondo tiene una limitación de préstamo del 10% de sus activos netos respectivos. Las disposiciones efectuadas al amparo de la Línea de Crédito están sujetas a un tipo de interés fijado de mutuo acuerdo y están garantizadas con los activos subyacentes de cada Cartera.

NOTA M: Transacciones con opciones

El Fondo puede comprar y suscribir (vender) opciones de venta "put" y de compra "call" sobre valores gubernamentales estadounidenses y extranjeros y sobre divisas que se negocien en las bolsas estadounidenses y extranjeras y OTC.

El riesgo asociado a la compra de una opción es que el Fondo paga una prima se ejerza o no la opción. De manera adicional, el Fondo soporta el riesgo de pérdida de la prima y un cambio en el valor de mercado si la contraparte no actúa según lo acordado en el contrato. Las opciones de compra y de venta se contabilizan de la misma manera como títulos de la cartera. El coste de los títulos obtenidos mediante el ejercicio de opciones de compra se aumenta por las primas pagadas. El importe pagado por las primas se resta de los beneficios de los valores vendidos mediante el ejercicio de opciones de venta "put."

Cuando el Fondo suscribe una opción, la prima recibida por el Fondo se registra como una deuda y se ajusta posteriormente al valor actual de mercado de la opción suscrita. Las primas

recibidas de opciones suscritas que llegan a su vencimiento sin ejercerse son registradas por el Fondo en la fecha de vencimiento al igual que las ganancias realizadas a partir de opciones suscritas. La diferencia entre las primas recibidas y el importe pagado al efectuar una transacción de cierre de la compra, incluidas las comisiones de intermediación, se considera también como una ganancia obtenida, o si la prima recibida es menor que el importe pagado en la transacción de cierre de la compra, se considera una pérdida. Si se ejerce una opción de compra "call", la prima recibida se suma a las ganancias de la venta del valor o de la moneda subyacente para determinar si el Fondo ha obtenido una ganancia o una pérdida. Si se ejerce una opción de venta "put", la prima recibida reduce la base de coste del valor o divisa comprada por el Fondo. Al suscribir una opción, el Fondo soporta el riesgo de mercado de un cambio desfavorable del precio del valor o de la divisa subyacente a la opción suscrita. El ejercicio de una opción suscrita por el Fondo podría dar lugar a que el Fondo venda o compre un valor o una moneda a un precio diferente al valor actual de mercado.

NOTA N: Gestión Conjunta de Activos

Para el propósito de una gestión eficiente del Fondo y las Carteras, la Sociedad Gestora puede gestionar colectivamente todos o parte de los activos de ciertas Carteras cuando sea apropiado hacerlo con relación a sus sectores respectivos de inversión. A los activos así gestionados se hace referencia como un “Grupo de Activos”, independientemente del hecho de que dichos Grupos de Activos se creen sólo para fines internos de gestión. Los Grupos de Activos no constituyen una entidad legal separada de las Carteras gestionadas de forma conjunta, ni tampoco están directamente disponibles para los inversores. Cada una de las Carteras seguirá teniendo derecho a sus propios activos específicos.

Cuando los activos de diversas Carteras se agrupen para el propósito de una gestión colectiva, se mantendrá un registro de la
