Coyuntura económica y financiera

Los activos de riesgo cerraron los 12 últimos meses en tono positivo, tras uno de los períodos más complicados para los inversores jamás registrados. El renovado clima de confianza se debió a varios factores. En el plano macroeconómico, la economía estadounidense parece dirigirse a un "aterrizaje suave", aunque algunos economistas habían venido anticipando una recesión. Los consumidores estadounidenses han seguido gastando, alentados por el exceso de ahorro acumulado durante la pandemia y por los sólidos aumentos salariales. El mercado de trabajo se ha revelado más resiliente de lo previsto, lo que también ha contribuido a reducir la tasa de desempleo hasta mínimos históricos (por debajo del 4%). La fortaleza de la economía se reflejó en la lectura del PIB del segundo trimestre, con un crecimiento del 2.1% en términos anualizados. La ralentización de la inflación también aportó un cierto alivio. En la mayoría de los países desarrollados los índices de precios dejaron de apreciarse a finales del último año y, a continuación, comenzaron a ralentizarse, lo que permitió a las autoridades monetarias moderar sus posturas restrictivas. Con todo, las recientes declaraciones políticas sugieren que los bancos centrales no saben exactamente cuándo interrumpirán las medidas de endurecimiento, simplemente porque la inflación se mantiene todavía por encima del objetivo. Los últimos datos (de agosto) apuntan a una inflación del 5.2% en la zona euro, del 6.7% en el Reino Unido y del 3.7% en Estados Unidos. Para completar nuestro resumen, nos remontamos al mes de marzo, cuando las medidas de endurecimiento monetario aplicadas por la Fed y otros grandes bancos centrales provocaron turbulencias en algunos segmentos del sector bancario, lo que evocó la crisis de crédito mundial que sacudió los mercados financieros en 2008. Asistimos a la quiebra de dos grandes bancos estadounidenses (el colapso de Silicon Valley Bank fue la segunda mayor bancarrota de la historia de Estados Unidos), mientras que el regulador bancario suizo organizó un matrimonio forzado para Credit Suisse, lo que puso fin a la larga historia de 166 años de este ilustre banco. Con posterioridad, los temores se disiparon con rapidez, gracias también a la inyección de liquidez urgente por parte de las autoridades estadounidenses y de otros países.

Informe de gestión (continuación)

El comportamiento de los mercados financieros merece varias observaciones. El periodo finalizó en un tono muy positivo para la renta variable. En moneda local, el índice MSCI World avanzó un 20.4%, debido principalmente a un aumento del 17.6% en el múltiplo de precio/beneficios. A escala regional, dos mercados se desmarcaron del resto. Japón se situó a la cabeza, con una notoria revalorización del 29.8%, y tanto el Nikkei como el Topix marcaron máximos de 33 años. La combinación de una sólida recuperación económica, un yen débil y una inflación moderada se tradujo en unas perspectivas más halagüeñas para Japón. Las entradas de fondos procedentes de inversores extranjeros también fueron considerablemente elevadas durante el periodo. El mercado estadounidense (+21.0%) se vio favorecido por la abultada ponderación de las grandes capitalizaciones, que se vieron impulsadas por el reciente entusiasmo en torno a la IA como tema de inversión. Ahora bien, un análisis más pormenorizado revela un escenario menos alentador. El índice S&P 500 equiponderado (SPW), que elimina el impacto de los grupos más grandes, se revalorizó un 13.6%, un dato menos espectacular. En el extremo opuesto, los mercados emergentes se situaron a la zaga (+10.9%), sobre todo la renta variable china (-0.6%). Los renovados temores en torno al sector inmobiliario chino socavaron la confianza, pese a la serie de nuevos estímulos destinados a reequilibrar el mercado de la vivienda. En cuanto a estilos de inversión, y a diferencia del periodo anterior, los valores de crecimiento (+24.8%) batieron con creces a sus homólogos de estilo valor (+15.8%). A escala sectorial, 9 de 11 sectores terminaron el periodo en terreno positivo. La tecnología (+36.5%) y el consumo discrecional (+25.4%) encabezaron el pelotón. Los valores de petróleo se vieron respaldados por el encarecimiento del barril de Brent (+12.0%). Los sectores sensibles al aumento de los rendimientos registraron pérdidas: el sector inmobiliario (-1.3%) y los servicios públicos (-1.2%).

Informe de gestión (continuación)

En el universo de renta fija, los rendimientos de la deuda pública se dispararon. En Estados Unidos, el aviso de la Fed de que los tipos podrían permanecer en cotas elevadas durante más tiempo catapultó el bono del Tesoro a 10 años por encima del 4.5%, su nivel más elevado desde 2007. El aumento de los rendimientos de los bonos también se vio alentado por las perspectivas de un enorme volumen de emisión de bonos en el mercado para financiar el déficit presupuestario (8% del PIB). Se observaron tendencias similares en Francia, en Alemania e incluso en Japón, países donde los rendimientos alcanzaron máximos en el transcurso de 2023. En este contexto, los bonos soberanos de los países desarrollados registraron rentabilidades negativas en moneda local (BofAML Euro Govt: -2.2%, BofAML US Govt: -1.0%). La sólida trayectoria de los activos de riesgo incitó a los inversores a posicionarse en crédito y deuda de los mercados emergentes (BofAML Global High Yield: +10.8%; ML Global Corporate: +4.0%; JPM EMBI USD: +10.0%; ML GBI-EM: +13.1%).

Durante el periodo, todos los segmentos de inversiones alternativas arrojaron rentabilidades positivas. Los precios del petróleo aumentaron considerablemente, lo que tuvo un efecto positivo en el índice de materias primas (S&P GSCI: +10.9%). El oro (+10.7%) se vio impulsado, ante todo, por la fuerte demanda y rozó un máximo histórico en mayo (2060 USD). Pero luego descendió al verse lastrado por el efecto combinado de la apreciación del dólar y la tendencia alcista de los rendimientos reales. Pese a las condiciones favorables, los fondos de gestión alternativa (*hedge funds*) (HFRX Global Index) no registraron grandes avances, al sumar tan solo un 1.7%.

Dictamen

Hemos auditado los estados financieros de Pictet (la "SICAV") y de cada uno de sus subfondos, que se componen del balance y del inventario de la cartera y otros activos netos a 30 de septiembre de 2023, así como de los resultados de sus operaciones y del estado de variaciones patrimoniales correspondiente al ejercicio finalizado en dicha fecha, y de las notas explicativas a los estados financieros, incluido un resumen de las principales políticas contables.

En nuestra opinión, los estados financieros adjuntos ofrecen, de conformidad con las disposiciones legales y reglamentarias vigentes en Luxemburgo relativas a la elaboración y la presentación de los estados financieros, una imagen fiel y exacta de la posición financiera de la SICAV y de cada uno de sus subfondos a 30 de septiembre de 2023, así como de los resultados de sus operaciones y las variaciones del patrimonio neto correspondientes al ejercicio cerrado en dicha fecha.

Párrafo de énfasis

Llamamos la atención sobre la nota 22 de los estados financieros, que describe las decisiones adoptadas por el Consejo de Administración de la SICAV, en el contexto del conflicto entre Rusia y Ucrania, de otorgar valor nulo a los valores rusos denominados en moneda fuerte y local, junto con las cuentas de depósito y efectivo en RUB, de suspender el cálculo del valor liquidativo, las suscripciones y los reembolsos de acciones del subfondo Pictet - Russian Equities y de renunciar a las comisiones de gestión de dicho subfondo, todo ello a partir del 28 de febrero de 2022.

Nuestra opinión no se ha visto modificada por lo anteriormente expuesto.

Fundamento del dictamen

Hemos procedido a realizar nuestra auditoría conforme a la ley de 23 de julio de 2016 sobre la profesión del auditor (la "Ley de 23 de julio de 2016") y las normas internacionales sobre auditorías (NIA) adoptadas para Luxemburgo por la Commission de Surveillance du Secteur Financier (CSSF). Nuestras responsabilidades conforme a la Ley de 23 de julio de 2016 y las NIA se describen de forma más detallada en el apartado "Responsabilidades del auditor autorizado (Réviseur d'entreprises agréé)" en relación con la auditoría de los estados financieros" de nuestro informe. También somos independientes del Fondo de conformidad con el Código Internacional de Ética para Profesionales de la Contabilidad (incluidas Normas Internacionales de Independencia) elaborado por el Consejo de Normas Internacionales de Ética para Contadores (Código IESBA) adoptado para Luxemburgo por la CSSF junto con los requisitos éticos que resultan pertinentes para nuestra auditoría de los estados financieros, y hemos satisfecho el resto de responsabilidades éticas con arreglo a tales requisitos éticos. A nuestro juicio, las pruebas justificativas que hemos obtenido son suficientes y adecuadas para ser utilizadas como fundamento de nuestro dictamen.

Otra información

El Consejo de Administración de la SICAV es responsable de la otra información. La otra información comprende el contenido del informe anual, si bien no incluye los estados financieros ni el informe del Auditor autorizado al respecto.

Nuestro dictamen sobre los estados financieros no abarca la otra información y no expresamos ninguna forma de conclusión que proporcione un grado de seguridad sobre esta.

En relación con nuestra auditoría de los estados financieros, nuestra responsabilidad es leer la otra información y, al hacerlo, considerar si existe incongruencias significativas entre la otra información y los estados financieros o de lo que tengamos constancia a raíz de la auditoría o si induce a pensar que existe una incorrección importante en la otra información por algún otro motivo. Si, basándonos en el trabajo que hemos realizado, concluimos que existe una incorrección importante en esta otra información, estamos obligados a declararla. No tenemos nada que comunicar en este sentido.

Responsabilidades del Consejo de Administración de la SICAV respecto a los estados financieros

El Consejo de Administración de la SICAV es responsable de la elaboración y correcta presentación de los estados financieros de acuerdo con los requisitos legales y reglamentarios de Luxemburgo relativos a la elaboración y presentación de los estados financieros, así como del control interno que el Consejo de Administración de la SICAV considere oportuno para completar la elaboración de unos estados financieros libres de incorrecciones significativas, ya se deban a fraude o a error.

Al elaborar los estados financieros, el Consejo de Administración de la SICAV es responsable de evaluar la capacidad del Fondo para seguir el principio de empresa en funcionamiento, declarando, según proceda, los aspectos relativos a la empresa en funcionamiento y utilizando el principio contable de empresa en funcionamiento a menos que el Consejo de Administración de la SICAV tenga previsto liquidar el Fondo o cesar sus operaciones, o no tenga ninguna otra alternativa realista.

Responsabilidades del Auditor autorizado en relación con la auditoría de los estados financieros

Nuestra auditoría tiene como objetivo la obtención de una garantía razonable de que los estados financieros en su conjunto no contienen incorrecciones significativas, ya se deban a fraude o a error, y la emisión de un informe del Auditor autorizado que incluya nuestro dictamen. Por "garantía razonable" se entiende un elevado nivel de seguridad, si bien no se garantiza que una auditoría llevada a cabo de conformidad con la Ley de 23 de julio de 2016 y las NIA adoptadas para Luxemburgo por la CSSF siempre detectará una incorrección significativa cuando se dé el caso. Las incorrecciones pueden deberse a fraude o a error y se consideran significativas si cabría esperar de ellas que, individualmente o en conjunto, influyeran en las decisiones económicas de los usuarios tomadas sobre la base de los presentes estados financieros.

Como parte de una auditoría llevada a cabo de conformidad con la Ley de 23 de julio de 2016 y las NIA adoptadas para Luxemburgo por la CSSF, ejercemos nuestro criterio profesional y mantenemos nuestro escepticismo profesional a lo largo de toda la auditoría. Asimismo:

- Identificamos y evaluamos los riesgos de incorrección significativa en los estados financieros, ya se deba a fraude o a error, diseñamos y llevamos a cabo procedimientos de auditoría en respuesta a tales riesgos, y obtenemos pruebas de auditoría suficientes y adecuadas con el propósito de proporcionar una base para nuestro dictamen. El riesgo de no detectar una incorrección significativa derivada de fraude es más elevado que el de no detectar una incorrección derivada de error, puesto que el fraude puede conllevar connivencia, falsificación, omisiones intencionadas, declaraciones falsas o no aplicación de los controles internos.

Informe del auditor autorizado (continuación)

- Obtenemos información sobre las medidas de control interno pertinentes para la auditoría a fin de diseñar procedimientos de auditoría que sean apropiados dadas las circunstancias, aunque no para expresar un dictamen sobre la eficacia del control interno del Fondo.
- Evaluamos la idoneidad de las políticas contables empleadas y del fundamento de las estimaciones contables y la información relacionada proporcionadas por el Consejo de Administración de la SICAV.
- Alcanzamos una conclusión sobre la idoneidad del uso del principio contable de empresa en funcionamiento realizado por el Consejo de Administración del Fondo y, en función de las pruebas de auditoría obtenidas, sobre si existe una incertidumbre significativa relativa a acontecimientos o condiciones susceptible de cuestionar la capacidad del Fondo para continuar como empresa en funcionamiento. Si determinamos que existe una incertidumbre significativa, debemos destacar en nuestro informe de auditoría la información correspondiente que figura en los estados financieros o, si dicha información es inadecuada, debemos modificar nuestro dictamen. Nuestras conclusiones se basan en las pruebas de auditoría obtenidas hasta la fecha de nuestro informe de auditoría. No obstante, las condiciones o los acontecimientos futuros podrían provocar que el Fondo cese como empresa en funcionamiento.
- Evaluamos la presentación, la estructura y el contenido en general de los estados financieros, incluidas cualesquiera declaraciones, y si los estados financieros representan las operaciones y los acontecimientos subyacentes de forma que la presentación obtenida sea una imagen fiel.

Nos ponemos en contacto con las personas responsables del gobierno corporativo en lo relativo, entre otros asuntos, al alcance y el calendario previstos de la auditoría y a las conclusiones de la auditoría significativas, lo que incluye cualquier deficiencia importante en las medidas de control interno que identifiquemos durante nuestra auditoría.

Todas las acciones que representan el patrimonio de un subfondo forman una categoría de acciones. En el supuesto de emitirse distintas clases de acciones, se detallarán sus especificaciones en los anexos del folleto de la SICAV.

El Consejo de Administración de la SICAV podrá decidir crear, para cada subfondo, varias clases de acciones, cuyos activos se invertirán de conformidad con la política de inversión específica del subfondo en cuestión, aunque dichas clases de acciones podrán diferenciarse en las estructuras de comisiones de suscripción y/o de reembolso, en las políticas de cobertura del riesgo cambiario, en las políticas de distribución y/o en las comisiones de gestión o de asesoramiento en materia de inversión específicas o cualesquiera otros aspectos específicos aplicables a cada clase. Si procede, dicha información se incluye en el folleto en vigor de la SICAV.

Agrupación de activos (*pooling*)

La SICAV recurre a la agrupación de activos por dos razones: en primer lugar, para lograr una gestión eficaz de la cartera y, en segundo lugar, por motivos técnicos relacionados con la contabilidad de las comisiones de rentabilidad y la cobertura del riesgo cambiario de sus clases de acciones cubiertas denominadas en divisas distintas de la moneda de referencia de los subfondos. Dicho agrupamiento se constituirá como una "agrupación-fondo subordinado" (*pool-feeder*).

Agrupación de activos (*pooling*) - Gestión eficiente de activos

Con el fin de lograr una gestión eficiente y si las políticas de inversión de los subfondos así lo permiten, el Consejo de Administración de la Sociedad Gestora podrá adoptar la decisión de cogestionar una parte o la totalidad de los activos de determinados subfondos de la SICAV. En dicho caso, los activos de diferentes subfondos se gestionarán de forma conjunta recurriendo a la técnica citada con anterioridad. Se utiliza el término "agrupación" (o *pool*) para hacer referencia a los activos cogestionados. Estas agrupaciones solo podrán emplearse con fines de gestión interna. No constituyen entidades jurídicas independientes y los inversores no pueden acceder a ellas directamente. A cada uno de los subfondos cogestionados se le asignan sus propios activos.

Cuando los activos de un subfondo se gestionan mediante esta técnica, los activos que deben atribuirse inicialmente a cada uno de los subfondos cogestionados se calculan con arreglo a su aportación inicial a la agrupación de activos. Posteriormente, la composición de estos activos cambiará en función de las aportaciones o retiradas de activos realizadas por los subfondos.

Este sistema de asignación se aplicará a cada una de las líneas de inversión de la agrupación. Por lo tanto, toda inversión suplementaria realizada en nombre de los subfondos cogestionados se atribuyen a dichos subfondos en función de sus respectivos derechos, mientras que los activos vendidos se deducen de la misma forma de los activos atribuibles a cada uno de los subfondos cogestionados.

Todas las operaciones bancarias necesarias para el funcionamiento del subfondo (dividendos, intereses, comisiones no contractuales y gastos) se contabilizan en la agrupación y se reasignan, desde un punto de vista contable, de forma proporcional entre los subfondos en la fecha en que se registren las operaciones (provisiones para riesgos y gastos, registro bancario de ingresos y/o gastos). Por otra parte, las comisiones contractuales (comisiones del depositario, de administración y gestión, etc.) se contabilizan directamente en los respectivos subfondos.

El activo y el pasivo atribuibles a cada uno de los subfondos se pueden identificar en cualquier momento.

El método de agrupación respeta la política de inversión de cada uno de los subfondos afectados.

El proceso de agrupación respeta la política de inversión de cada uno de los subfondos afectados.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

Las plusvalías/minusvalías latentes y/o materializadas sobre inversiones financieras se registran en la agrupación en la moneda de referencia de dicha agrupación. A continuación se registran en el subfondo (que puede tener una moneda de referencia distinta a la de la agrupación) en función de su participación en la agrupación, utilizando el tipo de cambio vigente el día en que se calcule el valor liquidativo ("VL").

El balance y el inventario de la cartera y otros activos netos presentan la situación de la cartera en la fecha de cierre correspondiente a los tipos de cambio aplicados, así como la parte proporcional invertida por el subfondo en la o las agrupaciones en dicha fecha.

Agrupación técnica de activos (comisiones de rentabilidad y clases de acciones cubiertas)

Las inversiones, así como otras operaciones y partidas del patrimonio neto (tales como dividendos, intereses, resultados materializados sobre las inversiones, etc.) que sean comunes a todas las clases de acciones serán mantenidas en el subfondo a través de las inversiones presentes en el agrupamiento, mientras que las partidas específicas a cada clase de acciones (como las comisiones del depositario, servicio, gestión y rentabilidad) y las partidas específicas a las clases de acciones cubiertas (como los contratos a plazo sobre divisas y otras comisiones contractuales relacionadas con la cobertura) se contabilizarán en las cuentas destinadas a los fondos subordinados (*feeders*).

A cada fondo subordinado se le asigna una parte de la agrupación (participación porcentual) en función de su aportación inicial. Posteriormente, la cuota de la participación porcentual de cada fondo subordinado se determina en cada fecha de cálculo del valor liquidativo en función del tamaño de cada fondo subordinado, y se convierte a la moneda de referencia de la agrupación al tipo de cambio aplicable en la fecha de cálculo del valor liquidativo.

Presentación y repercusión de la agrupación de activos en los estados contables

Los datos registrados en la cuenta de pérdidas y ganancias y estado de variaciones del patrimonio neto en el epígrafe "Plusvalía/minusvalía materializada neta sobre la agrupación – efecto de agrupación" representan:

- el efecto del cambio de divisas debido a las diferencias entre los tipos de cambio utilizados en la fecha de cierre y los utilizados en cada cálculo del VL. Durante el año y al final del año, las inversiones mantenidas al nivel de un grupo específico se asignan íntegramente a un subfondo específico.

2. Resumen de las principales políticas contables

Información general

Los estados financieros han sido formulados de conformidad con los principios contables generalmente aceptados y con arreglo a las obligaciones declarativas vigentes en Luxemburgo en materia de organismos de inversión colectiva ("OIC").

Gastos de constitución

Los gastos de constitución han sido amortizados durante un periodo máximo de cinco años.

Conversión de divisas para cada subfondo

Los bancos, otros activos netos y el valor de mercado de los valores de la cartera de inversiones expresados en monedas distintas de la moneda base del subfondo se convierten a la moneda base del subfondo aplicando los tipos de cambio en vigor en la fecha de cierre.

Los ingresos y gastos expresados en una moneda distinta a la moneda base del subfondo se convierten a dicha moneda aplicando los tipos de cambio vigentes en la fecha de operación.

Las diferencias positivas y negativas de cambio resultantes se contabilizan en la cuenta de pérdidas y ganancias y variación del patrimonio neto.

Estados financieros consolidados de la SICAV

Los estados financieros consolidados de la SICAV se expresan en euros y corresponden a la suma de las partidas de los estados financieros de cada subfondo, convertidas a euros aplicando los tipos de cambio vigentes en la fecha de cierre.

Valoración de los activos de cada subfondo

1. Los valores cotizados en una bolsa de valores oficial u otro mercado regulado se valoran al último precio conocido o precio en un momento dado y valor razonable, siempre y cuando este precio sea representativo.
2. Los valores que no coticen en una bolsa oficial o en otro mercado regulado, y los valores cotizados cuyo último precio disponible no sea representativo, serán valorados por el Consejo de Administración de la SICAV en función de sus precios de venta probables, con prudencia y de buena fe.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

3. El valor de las empresas no cotizadas en una bolsa de valores o mercado regulado puede determinarse sobre la base de un método de valoración expuesto por el Consejo de Administración de la SICAV con prudencia y de buena fe, y basado en los últimos estados financieros anuales auditados disponibles, y/o sobre la base de acontecimientos recientes que pudieran repercutir en el valor del título en cuestión y/o cualquier otro método de valoración disponible. La elección de los medios y el método utilizados para la valoración depende de la pertinencia estimada de los datos disponibles. El valor determinado podría ser objeto de corrección conforme a cualquier estado financiero provisional no auditado disponible. Si el Consejo de Administración de la SICAV considera que el precio obtenido de esta manera no refleja el valor probable de realización de dicho título, procederá a estimar el valor del título en función de su precio de venta probable, estimado con prudencia y de buena fe.
4. El valor de los contratos de futuros y los contratos de opciones que se negocien en una bolsa de valores u otro mercado regulado se basará en los precios al cierre o de liquidación publicados por dicha bolsa de valores o mercado regulado que, como regla general, constituye el principal lugar en el que se negocian los contratos en cuestión. Los contratos de futuros y los contratos de opciones no negociados en una bolsa de valores u otro mercado regulado se valorarán a su valor liquidativo determinado de conformidad con las normas fijadas con prudencia y de buena fe por el Consejo de Administración de la SICAV, según criterios uniformes establecidos para cada tipo de contrato.
5. Las participaciones/acciones emitidas por organismos de inversión colectiva de tipo abierto se valoran de la siguiente manera:
 - en función del último VL disponible en el seno del Agente de administración central, o;
 - en función del VL estimado en la fecha más próxima al día de valoración del subfondo.
6. Los instrumentos del mercado monetario se valoran según el método del coste amortizado, a su valor nominal más cualquier interés devengado, o mediante el método de ajuste al valor de mercado o *mark-to-market*.
7. Los contratos por diferencias ("CFD") se valorarán en función de la diferencia entre el precio de su subyacente del día de valoración y del día de la adquisición.
8. Las plusvalías o minusvalías latentes resultantes de los contratos a plazo sobre divisas no vencidos se determinan el día de la valoración en función de los tipos de cambio a plazo aplicables en esa fecha y se contabilizan en el balance.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

9. Los contratos de permuta financiera de tipos de interés ("IRS"), los futuros flujos de efectivo previstos, tanto por pagar como por cobrar sobre los contratos de permuta financiera, se valorarán a su valor actual.
10. Se volverá a estimar el valor de las permutas financieras de riesgo de crédito ("CDS") en función de los diferenciales de sustitución que facilite Bloomberg Valuation Services.
11. Las permutas financieras de rentabilidad total se valorarán en función de la diferencia entre el precio de su subyacente del día de valoración y del día de la adquisición.
12. El valor del efectivo en caja o en bancos, los pagarés y efectos a la vista y las cuentas por cobrar, los gastos prepagados, los dividendos e intereses declarados o pendientes pero aún sin recibir, consisten en el valor nominal de estos activos, a menos que parezca poco probable que dicho valor se perciba; en este último caso, el valor se determina deduciendo el importe que el Consejo de Administración de la SICAV considere apropiado para reflejar el verdadero valor de los activos en cuestión.

Si el Consejo de Administración de la SICAV lo considera necesario, podrá recurrir a un comité de evaluación al que se le confiará la valoración estimada de ciertos valores que se lleve a cabo con prudencia y buena fe.

El Consejo de Administración de la SICAV está autorizado a aplicar otros principios adecuados de valoración a los activos de un subfondo, en caso de que el empleo de los criterios arriba mencionados sea imposible o inadecuado.

La valoración específica de los títulos en ciertos subfondos

En cuanto a los subfondos Short-Term Money Market (CHF, EUR, GBP, JPY y USD) y Sovereign Short-Term Money Market (EUR y USD), los valores no admitidos a cotización oficial serán valorados mediante modelos matemáticos (*marked-to-model*), en el que se tenga en cuenta el diferencial entre el emisor y los tipos sin riesgo. Los títulos que cuentan con una cotización de mercado se valoran conforme al método de ajuste al valor de mercado (*mark-to-market*).

Valoración de inversiones no cotizadas

La incorporación de dichos títulos a la cartera de inversiones se realiza al precio de compra. La frecuencia de valoración depende de la identificación de acontecimientos relevantes que afecten al título. En el caso de que no se produzca este tipo de acontecimientos, se procederá como mínimo a una revisión semestral de la valoración. Entre los acontecimientos que desencadenan el proceso de valoración figuran en particular:

- Beneficios netamente inferiores/superiores a los esperados;
- Un nuevo proceso de financiación iniciado por la sociedad;
- Una nueva transacción (promovida por terceros inversores);
- Operaciones de reestructuración.

Reconocimiento de contratos de futuros, opciones sobre contratos de futuros y CFD

En el momento de realizarse el cálculo del VL, los requerimientos de depósito en los contratos de futuros, las opciones sobre contratos de futuros y los CFD se consignan directamente en las cuentas de pérdidas y beneficios materializados en referencia a los contratos a plazo.

Contabilización de los contratos de futuros, opciones sobre contratos de futuros y CFD

Las plusvalías y minusvalías latentes sobre contratos de futuros, opciones sobre contratos de futuros y CFD se liquidan a diario mediante el cobro o el pago de un importe en efectivo correspondiente al aumento o a la disminución diaria del valor de mercado de cada contrato de futuros, opciones sobre contratos de futuros o CFD abierto. Dicho importe en efectivo se contabiliza en la partida "Bancos" del balance, y el importe correspondiente se contabiliza en la partida "Plusvalía/minusvalía materializada neta sobre contratos a plazo" de la cuenta de pérdidas y ganancias y estado de variaciones del patrimonio neto.

Plusvalías o minusvalías materializadas netas sobre ventas de inversiones

La plusvalía/minusvalía materializada neta sobre las ventas de inversiones se calcula sobre la base del coste medio ponderado de las inversiones vendidas.

Coste de adquisición de la cartera de inversiones

El coste de adquisición de las inversiones denominadas en una moneda distinta de la moneda base del subfondo se convierte a la moneda base del subfondo al tipo de cambio aplicable en la fecha de adquisición.

Ingresos

Los dividendos se contabilizan a la fecha ex-dividendo tras deducir las retenciones en origen. Los intereses se contabilizan con arreglo al criterio del devengo.

Distribución de dividendos

El Consejo de Administración de la SICAV se reserva el derecho a introducir una política de distribución de dividendos que podría variar entre los subfondos y las subclases de acciones en circulación. Además de los repartos mencionados con anterioridad, la SICAV podrá acordar la distribución de dividendos a cuenta. La SICAV podrá distribuir los ingresos netos derivados de la inversión, las plusvalías materializadas, así como el capital y las plusvalías latentes. Así pues, los inversores deben ser conscientes de que las distribuciones podrían reducir efectivamente el patrimonio neto de la SICAV. No se distribuirán ingresos si, como consecuencia de la distribución, el patrimonio neto de la SICAV descendiera hasta situarse por debajo de 1,250,000 EUR. La SICAV podrá distribuir acciones gratuitas dentro de los mismos límites. Los dividendos y las asignaciones que no se reclamen dentro de un plazo de cinco años a partir de la fecha de pago caducarán y revertirán a los subfondos o las subclases de acciones pertinentes de los subfondos de la SICAV.

6. Otros gastos por pagar

A 30 septiembre 2023, la partida "Otros gastos por pagar" incluye principalmente las comisiones del depositario, de servicios y otros tributos.

7. Precio de suscripción, reembolso y/o conversión

El precio de emisión de las acciones (o subclase de acciones) de cada subfondo equivale al VL de la acción (o de cada subclase de acciones) del subfondo en cuestión, calculado sobre la base del método de fijación de precios a plazo en el Día de valoración correspondiente. Dicho precio podrá incrementarse con las comisiones pagadas a intermediarios financieros, que no podrán superar el 5% del VL por acción del subfondo en cuestión y que se abonarán a los intermediarios financieros y/o distribuidores (excluida Sociedad Gestora) que participen en la distribución de las acciones de la SICAV. La comisión de suscripción y reembolso pagada a los intermediarios será distinta para cada subclase de acciones. El precio de emisión se incrementará con el fin de cubrir cualquier tasa, impuesto y derecho de timbre debido.

El precio de reembolso de las acciones (o subclase de acciones) de cada subfondo equivale al VL de cada acción (o de cada subclase de acciones) del subfondo en cuestión, calculado sobre la base del método de fijación de precios a plazo en el Día de valoración aplicable. Una comisión de hasta el 1% del VL por acción puede deducirse de este importe y puede abonarse a intermediarios financieros y/o distribuidores (excluida Sociedad Gestora). La comisión de suscripción y reembolso pagada a los intermediarios será distinta para cada subclase de acciones. Además, el precio de reembolso se reducirá con el fin de cubrir cualquier tasa, impuesto y derecho de timbre debido.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

En ciertas circunstancias excepcionales, como por ejemplo:

- volumen notable de negociación;
- y/o perturbaciones del mercado;
- y en el resto de casos, cuando el Consejo de Administración de la SICAV estime, a su entera discreción, que el interés de los accionistas existentes (en lo relativo a las emisiones/canjes) o de los accionistas que permanecen (en lo relativo a los reembolsos/canjes) podría verse perjudicado.

El Consejo de Administración de la SICAV tendrá la potestad de practicar una "comisión de dilución" máxima del 2% sobre el VL.

El Consejo de Administración de la SICAV estará autorizado a aplicar correcciones del VL conforme a lo descrito en el apartado "Cálculo del VL" del Folleto vigente.

8. Mecanismo de ajuste de precios (*swing pricing*)

Con el fin de proteger a los accionistas existentes, se ha puesto en marcha un mecanismo de *swing pricing* en el momento de la recepción de suscripciones y/o reembolsos en un día de valoración determinado. Como norma general, los inversores que suscriben o los accionistas que reembolsan asumen los costes vinculados a la negociación. Estos costes estimados sobre una tarifa fija o a valor efectivo pueden facturarse por separado o ajustando el valor liquidativo de un subfondo o una clase de acciones en cuestión a la baja o al alza.

El mecanismo de swing pricing puede aplicarse a todos los subfondos. El Consejo de Administración de la SICAV establece la magnitud del ajuste de precios. El importe del ajuste podría variar de un subfondo a otro, sin que este exceda el 2%, en términos de principal general, del VL original por acción. En caso de haber excepciones, figurarán en los anexos del subfondo.

En relación con cada subfondo que aplica un mecanismo de *swing pricing*, existe un umbral de ajuste predeterminado y establecido como un porcentaje del valor liquidativo ("VL") del subfondo. Este umbral predeterminado puede ser del 0% (lo que equivale a un "ajuste completo") o distinto del 0% (lo se conoce como "ajuste parcial").

Si en un día de valoración determinado:

- los flujos netos de entrada en un subfondo superan el umbral predeterminado, entonces el VL por acción se ajusta al alza. Los accionistas que procedan a la suscripción en un subfondo asumirán los gastos derivados de las actividades de negociación provocadas por sus suscripciones al pagar un mayor VL.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

- los flujos netos de salida de un subfondo superan el umbral predeterminado, entonces el VL por acción se ajusta a la baja. Los accionistas que procedan al reembolso en un subfondo asumirán los gastos derivados de las actividades de negociación provocadas por sus reembolsos al recibir un menor VL.

En circunstancias excepcionales y con carácter temporal, el Consejo de Administración de la SICAV podrá aumentar el límite de ajuste máximo (facturado por separado o cobrado mediante un ajuste del valor liquidativo) que se indica en el Folleto con el fin de salvaguardar los intereses de los Accionistas.

Los siguientes subfondos utilizaron el mecanismo de *swing pricing* durante el ejercicio finalizado el 30 septiembre 2023:

9. Comisiones de rentabilidad

En el seno de la SICAV, las comisiones de rentabilidad han sido aplicadas a dos subfondos y se pretende remunerar a las gestoras de inversiones de estos subfondos.

La Comisión de rentabilidad se calcula conforme a lo indicado a continuación:

La gestora de inversiones recibe una comisión de rentabilidad por todas las acciones del subfondo, salvo por las acciones de la clase "X", que se devengará cada día de valoración y se abonará anualmente, basada en el valor liquidativo (VL) y equivalente al tipo mencionado en la tabla más abajo de la rentabilidad del VL por acción (medida en comparación con la *high water mark*) frente al índice que se muestra más abajo para cada clase de acciones desde el último pago de la comisión de rentabilidad.

Notas a los estados financieros a 30 septiembre 2023 (continuación)

La comisión de rentabilidad se calcula sobre la base del VL por acción tras deducir todos los gastos, pasivos, y comisiones de gestión (pero no la comisión de rentabilidad), y se ajusta con el fin de tener en cuenta todas las suscripciones y reembolsos.

El primer periodo de cálculo (un periodo comprende 12 meses como mínimo) comenzará en la fecha de lanzamiento de la clase pertinente y finalizará el último Día de valoración del ejercicio fiscal en curso. Los siguientes periodos de cálculo comenzarán el último Día de valoración al final del periodo de cálculo anterior y finalizarán el último Día de valoración del siguiente ejercicio fiscal.

La frecuencia de cristalización será anual.

La comisión de rentabilidad se calcula tomando como referencia la diferencia positiva de rentabilidad del VL por acción ajustado a las suscripciones y los reembolsos de las clases pertinentes durante el periodo de cálculo. No se abonará ninguna comisión de rentabilidad cuando el VL por acción antes de deducir la comisión de rentabilidad sea inferior a la *high water mark* del periodo de cálculo en cuestión.

En el caso de los subfondos anteriores, la *high water mark* se define como el mayor de los siguientes dos valores:

- El último VL por acción más elevado por el que se abonó una comisión de rentabilidad; y
- el VL por acción inicial.

Los dividendos abonados a los accionistas se deducen de la *high water mark*.

El periodo de referencia corresponde al ejercicio financiero de la SICAV.

En el folleto vigente se incluye un desglose del cálculo de la comisión de rentabilidad.

* Cada día de cálculo, se crea una provisión anual para la comisión de rentabilidad. Notas a los estados financieros a 30 septiembre 2023 (continuación)

El comprador de protección adquiere el derecho de vender una obligación determinada del emisor de referencia por su valor nominal (o por otro valor de referencia o precio de ejercicio) al producirse un riesgo de crédito. Por lo general, los eventos de crédito incluyen una situación de quiebra, insolvencia, administración/liquidación judicial, el aplazamiento o el impago de las deudas vencidas.
